## Signature

Ordinance: ORD-0049-2024

File Number: ORD-0049-2024

### AN ORDINANCE TO AMEND THE CITY OF GAHANNA 2023-2027 CAPITAL IMPROVEMENT PLAN AS ADOPTED BY ORD-0060-2023 AND SUBSEQUENTLY AMENDED BY ORD-0024-2024

**WHEREAS**, on August 21, 2023, City Council adopted ORD-0060-2023, the 2023-2027 Capital Improvement Plan ("CIP"); and

**WHEREAS**, the City Council approved CIP amendments through ORD-0024-2024; and

**WHEREAS**, the CIP requires new amendments based on project updates, project additions, and updated financial information; and

**WHEREAS**, it is desirable that the CIP amendments precede the City's annual budget process so that the plan can inform the FY 2025 Capital Budget.

**NOW, THEREFORE, BE IT ORDAINED BY THE COUNCIL OF THE CITY OF GAHANNA, COUNTY OF FRANKLIN, STATE OF OHIO:**

**Section 1.** That the City of Gahanna 2023-2027 Capital Improvement Plan as adopted by ORD-0060-2023 and subsequently amended by ORD-0024-2024 is hereby amended to reflect the changes as recommended by the Administration in EXHIBIT A, attached hereto and made a part herein.

**Section 2.** That this Ordinance shall be in full force and effect after passage by this Council and 30 days after the date of signature of approval by the Mayor.

At a regular meeting of the City Council on September 3, 2024, a motion was made by Schnetzer, seconded by Renner, that the Ordinance be Adopted. The vote was as follows:

Ms. Bowers, yes; Ms. Jones, yes; Ms. McGregor, yes; Ms. Padova, yes;  
Mr. Renner, yes; Mr. Schnetzer, yes; Mr. Weaver, yes.

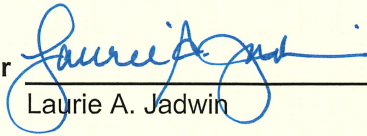

President Merisa Bowers  
Merisa K. Bowers

# 1 CAPITAL IMPROVEMENT PLAN – OVERVIEW

---

## 1.1 CAPITAL IMPROVEMENTS

The City of Gahanna Capital Improvement Plan (CIP) is intended to identify, plan for, and prioritize all major financial investments that support the City's core functions. The CIP is primarily a financial management tool used by the City to ensure public dollars are being leveraged strategically to address critical needs.

Capital improvements refer to major, non-recurring physical expenditures such as upgrading or expanding public infrastructure, acquiring land or buildings for public purposes, purchasing equipment, or implementing core technology systems. Common projects identified for capital expenditures include:

1. Improvements to infrastructure such as streets, sanitary & storm sewer systems, potable water systems, and communication infrastructure.
2. Upgrading parks and recreation facilities such as playgrounds, trail networks, park amenities, aquatic facilities and other quality of life items.
3. Purchasing of major equipment such as snowplows, specialized maintenance equipment, police cruisers, and communication equipment.
4. Implementing information technology equipment, systems and applications which are critical in supporting all of the major functions and city operations.
5. Acquisition of land for public purposes, including right-of-way, parks, and government facilities.
6. Construction, expansion or major renovation of a public building or facility (ex. City Hall, parks shelters, renovation projects, building retrofit for energy efficiency).
7. Related planning, engineering, design, appraisal, or feasibility costs (ex. LEED certification, architectural fees).

These projects increase a capital assets value in both monetary and service measures. In practice, the principal purpose of capital improvement programming is to assign priorities to the capital improvements which represent major financial investments, are considered critical to the operation of the City, and are not otherwise programmed and undertaken as a regular, continuing operational function.

There are also annual maintenance programs that fall within the purview of the Capital Improvement Plan. These programs consume capital resources and address capital items that require routine maintenance or are a recurring expense every few years. Examples of annual programs that fall under capital maintenance are: street rebuilds, asphalt overlay, streetlight painting, traffic control upgrades, vehicle and equipment replacements. This categorization allows Council and the public to understand the true capital costs of sustaining the City's current level of service.

Typical capital improvement and maintenance projects:

- improve, replace and maintain capital assets,
- satisfy accumulated or newly recognized public service needs,
- may require special financing considerations and methods.

This Capital Improvement Plan is a working document and will be reviewed and updated annually to reflect changing community needs, priorities, and funding opportunities. Specific projects and related financial information will be reviewed and updated as projects advance through the implementation process.

The plan includes road, bridge, public utilities, city facilities, parks, open space, gateways and equipment related projects.

Projects are organized into the following focus areas:

- Transportation & Mobility
- Utility Systems
- Parks & Recreation
- City Facilities
- Equipment
- Technology Program

These focus areas will help the City to prioritize the physical improvements in specific geographical areas and/or categorize projects that have a city-wide impact. The initial 5 years of the Capital Improvement Plan identifies \$195,862,011 in projects over the life of the plan. The budget breakdown, by focus area, is illustrated in Figure 1.

Figure 1 --CIP 20-Year Budget

## 1.2 PROJECT IDENTIFICATION

One of the most difficult tasks in capital improvement planning is correctly identifying the needs and desires of the community. The purpose of any public undertaking is to maximize the “general welfare” or the well-being of its citizens. General welfare is defined as an aggregation of individual welfares, or an aggregation of the shared needs and wants of individuals.

The starting place for this Capital Improvement Plan is identifying and prioritizing capital projects, from the following key City of Gahanna plans:

- 2023 Parks Master Plan
- 2022 Capital Needs Assessment
- 2021 Gahanna Facility Planning Study
- 2020 ADA Transition Plan
- 2019 Gahanna Thoroughfare Plan
- 2019 Gahanna Land Use Plan
- 2016 GoForward Gahanna Strategic Plan

Each of these projects are organized into one of six general categories and then further characterized by project type. While most projects fit neatly within this structure, it should be noted that some projects fall into more than one category. The planning process will help identify overlapping priorities and assist in strategically allocating funding. These overlapping projects will be organized into the category that requires the greatest financial resources.

The categories and project types are as follow:

- **Transportation & Mobility**
  - Roads & Bridges
  - Traffic Control
  - Gateways & Wayfinding
- **Utility Systems**
  - Sanitary Sewer
  - Stormwater\Storm Sewer
  - Water
- **Park & Recreation**
  - Play Elements & Surfacing
  - Park & Trail Asphalt
  - Park Renovation
  - Pool Infrastructure
- **City Facilities**
  - Facility Maintenance
  - Renovation & Expansion
  - Sustainability
- **Equipment**
  - Wheeled Assets
  - Mechanical Equipment
  - Public Safety Equipment
- **Technology Program**
  - Gahanna Fiber Optic Network
  - IT Infrastructure
  - Systems & User Applications

### 1.3 PROJECT LOCATIONS

Along with organizing project by category and type, the geographical location in which capital improvements are being made are also identified. This plan defines these geographical areas as established in the 2019 Gahanna Land Use Plan. The land use plan established 5 specific geographic areas; Downtown, Central Corridor, North Gateway, West Gateway, and South Gateway. A general Neighborhood geography was established for the remaining residential areas throughout the city. For CIP purposes, the neighborhood geography will identify projects that will have a smaller impact within a single neighborhood.

While the plan strives for specificity for each activity being undertaken with capital funds, projects that are organized as citywide projects, e.g. Annual Street Asphalt Overlay project, will be listed within a Citywide geography. Equipment and Technology projects will not be reported on by a specific geographic location.

Figure 2 - Project Locations

Adopted: August 21, 2023

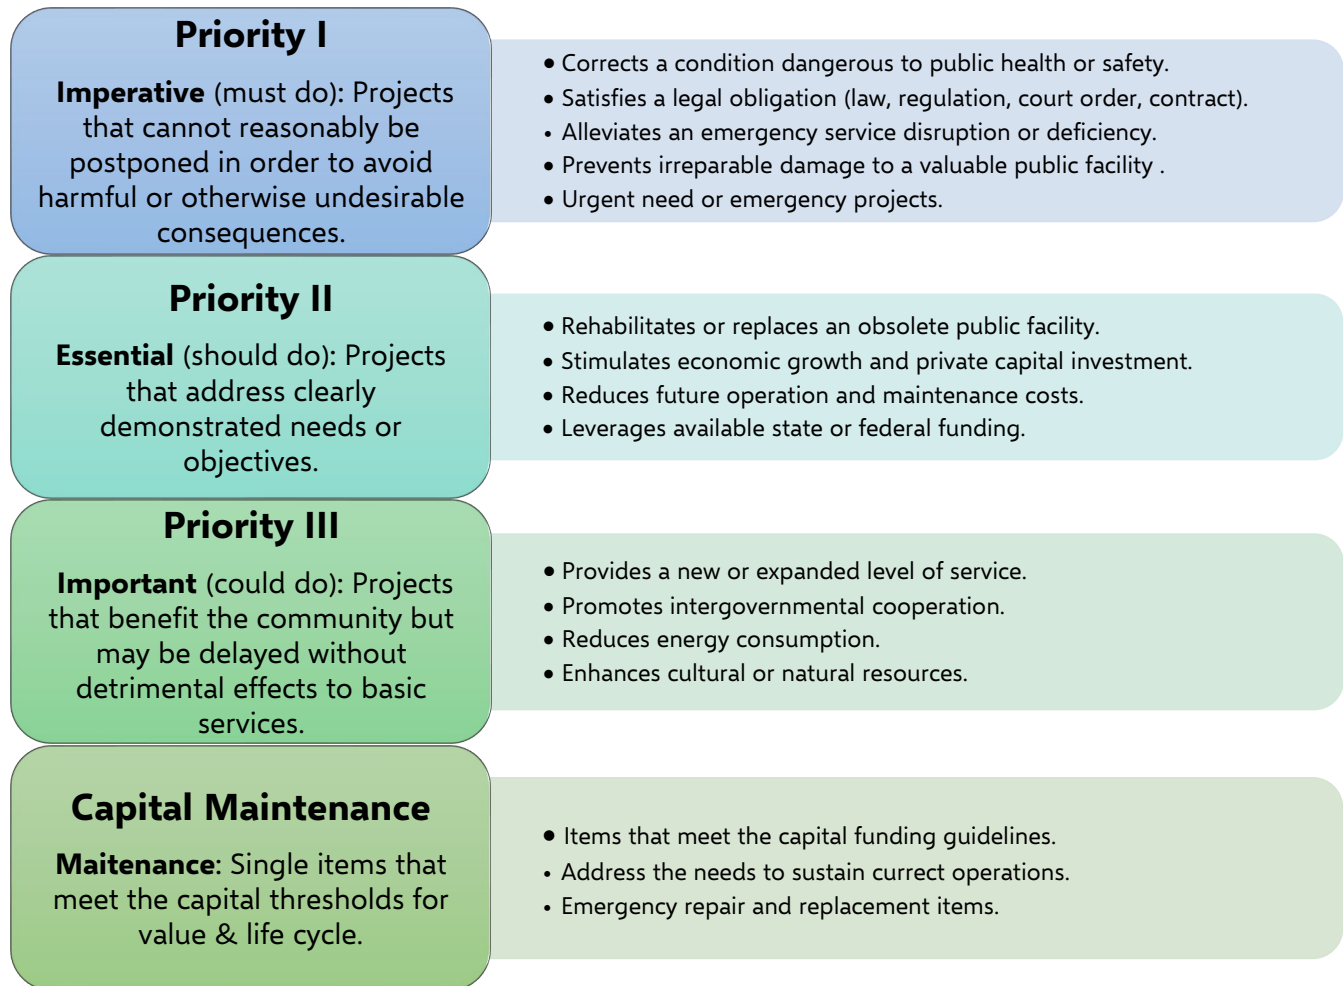

Last Revised: August 2024

## 1.4 PROJECT PRIORITY

Prioritizing projects is a critical step in the capital improvement planning process. Over the years, the city has utilized a 3-tier ranking system. For consistency, this same system is being utilized to prioritize projects identified as part of the CIP.

The Plan will prioritize projects in the following manner:

Many of the challenges facing the city and impacting the capital improvement program is years of deferred maintenance on many critical items across all project categories. The passing of Issue 12, by the voters in 2019, established a dedicated funding source to address these items. Until the city has the ability to address the deferred maintenance items, the plan will have an excess of capital maintenance and Priority I projects. The longer-term goal is a balanced plan across all priorities.

Properly prioritizing projects:

- Ensure the timely repair and replacement of aging infrastructure.

- Provide a level of certainty for residents, businesses, and developers regarding the location and timing of public investments.
- Identify the most economical means of financing capital improvements to public utilities, transportation networks, facilities, and major equipment.
- Coordination of capital improvements and typical maintenance projects.
- Provide planning for future land acquisition and economic development activities.
- Provide an opportunity for public input in the budget and financing process.
- Eliminate sharp increases in tax rates, user fees, and debt levels to cover unexpected capital improvements.
- Ensure that patterns of growth and development are consistent with the strategic & comprehensive plans.
- Balance desired public improvements with the community's financial resources.

## 1.5 PROJECT BUDGETING AND SCHEDULE

Once projects are identified and prioritized, they must also be budgeted and ultimately scheduled within the CIP. A significant number of projects will span several years before completion. More complicated projects require due diligence to ensure potential solutions are future focused and not merely temporary measures that do not address the specific problem. With proper estimating and scheduling, projects can be budgeted and planned with greater certainty. All these activities help determine the impact each project has on funding sources, year over year. Properly setting a budget each year of the project versus requesting all funding in one year, avoids placing undo limitations on resources that could be used for another project.

### 1.5.1 CAPITAL BUDGET

The Capital Improvement Plan is used to formulate the annual capital budget. The current or first year of the CIP, outlines specific projects and appropriates funding for those projects. The capital budget is adopted in conjunction with the annual operating budget. Projects and financing outlined in subsequent years is not authorized until the annual budget for those years is completed and formally adopted. All future years serve as a guide for planning and are subject to further review and modification.

### 1.5.2 FUNDING MECHANISMS

In 2019, voters approved Issue 12, which changed the city income tax credit for payments made to another municipality, from a reduced credit of 83.33 percent to a full 100 percent credit and increased the income tax rate from 1.5 percent to 2.5 percent. Issue 12, specifies that seventy-five (75) percent of the one (1) percent increase is to fund capital improvements and equipment for infrastructure, public safety, municipal facilities or parks and recreation, including without limitation streets, buildings, park facilities, trails, and playground elements, maintenance and repair of the same and paying debt service for such purposes. The remaining twenty-five percent is to be used for funding operations for public safety, public service, or parks and recreation. The dedicated capital funds will be the primary means in which projects identified in the CIP are funded.

Special revenue and proprietary funds, Tax Increment Finance (TIF), state and federal grants, and debt financing are also options to finance capital improvements. Many projects will utilize multiple funding sources to be completed. Below are lists that identify funds that may be used for capital purposes the local sources within those funds and possible state and federal contributors.

#### ▪ Capital Funds

- Capital Improvement
- Water Capital
- Sewer Capital
- Court Building

#### ▪ Special Revenue & Proprietary Funds

- Street
- Utility Funds (Sanitary, Storm, Water)
- Tax Increment Finance (TIF)
- State Highway
- Law Enforcement Trust
- County Permissive Tax

- Federal Law Enforcement Trust
- Treasury Equitable Sharing
- **Local Funding Sources**
  - Special Assessments
  - Business Improvement Districts
  - Private Grants
  - Donations
  - Tax Levies
  - User Charges
  - Intergovernmental revenue
- **TIF (Tax Increment Financing) Districts**
  - Central Park
  - Creekside
  - Crescent
  - Eastgate Pizzutti
  - Eastgate Triangle
  - Hamilton Road
  - Johnstown Road
  - Manner Homes
  - North Triangle
  - Olde & West
- **State & Federal Grant Programs**
  - Ohio Department of Transportation
  - Ohio Department of Natural Resources
  - Ohio Department of Development
  - Ohio Public Works Commission
  - Ohio Biennial Grant Appropriations
  - US Department of Transportation
  - US Environmental Protection Agency
  - Federal Emergency Management Agency (FEMA)
  - Congressional Appropriations Grants

## 2 CAPITAL IMPROVEMENT PLAN PROCESS

---

The planning process is critical in addressing years of deferred maintenance and ensuring that financial resources are being utilized in a manner that maximizes effectiveness. It is through this process that all critical needs can be addressed. As this plan matures, policies should be reviewed and adjusted that streamline the way the plan is managed and how projects are incorporated into the plan.

### 2.1 CIP ADVISORY COMMITTEE

The Capital Improvement Plan (CIP) Advisory Committee was established at the beginning of the planning process and serves to review and make recommendations to the Administration for changes and modifications to the plan. The plan will be presented to City Council for annual adoption or when changes and modifications to the plan require supplemental appropriations. The committee is made up of the Mayor, Council President, Finance Committee Chairperson, one Council Representative (as designated by Council President), Senior Director of Administrative Services, Senior Director of Operations, and the Director of Finance. Stakeholders from the Departments of Finance, Engineering, Public Service, Public Safety, Parks & Recreation, and Economic Development will make presentation to the advisory committee. This group will meet, at a minimum, quarterly, to gather information regarding the status and priority of projects, and to identify the need for supplemental appropriations. This group will make recommendations to the Administration that will assist in establishing the annual capital budget. The Administration, based on the adopted CIP, will make recommendations to City Council for annual capital appropriations.

The Senior Director of Operations, Senior Director of Administrative Services, and the Finance Director or their designees will serve as staff to the advisory committee and be responsible for the overall management of the Capital Improvement Plan process.

### 2.2 ASSESSING AND PRIORITIZING

Projects being brought forward for incorporation into the plan will be assessed for readiness. The following will be completed by the department requesting the improvement and reviewed by the committee prior to the project being included in the plan:

- Department has assessed the project for inclusion in the CIP.
- Department completed the project worksheet and justification.
- Project materials are delivered to the staff of the CIP Advisory Committee.
- Staff assess the project, timelines, and resource allocations.
- Project is presented to the CIP Advisory Committee
- CIP Advisory Committee recommends changes and modification to the Administration.
- When supplemental appropriations are needed, the modifications are presented to Council
- Modifications are incorporated into the plan document for annual adoption.
- All projects follow the procurement and legislative processes as required.

Active projects that require supplemental appropriations based on additional information shall complete a similar process as outlined above. It is critical that the allocation of all capital resources is done following a standardized process to ensure these resources are used efficiently and effectively.

## **2.3 CAPITAL MAINTENANCE ALLOCATIONS**

A portion of the capital budget will be allocated annually for the maintenance and replacement of capital assets. The amount allocated for capital maintenance shall not exceed 25% of the entire capital budget. This will help shift the City to a proactive versus reactive model when addressing capital needs. The planning process will help projects and associated expenditures be more predictable. However, the City also has a need to address emergency maintenance quickly. When assets become damaged and emergency maintenance is required, it is critical the City have a mechanism to address these items without having to return to the legislative process. A process will be adopted that follows the City's adopted procurement policy.

## **2.4 PROJECT EXPIRATIONS**

While this planning process will greatly enhance how projects are budgeted and performed, extenuating circumstances may cause a project to become stalled. To avoid a situation where capital resources become unavailable for long periods of time without producing results, projects that have been placed on hold for longer than 24 months will have their allocations returned to the appropriate funding source to be used to address other priorities. Projects that are in an active implementation and drawdown state are not subject to this provision.

The following measures should be in place:

- All projects are subject to a periodic review by the CIP Advisory Committee.
- Proper notification should be made when a project falls into inactive status.
- Upon project close, all related purchase orders shall be closed, and funds redirected.

## **2.5 PLAN UPDATES AND ANNUAL ADOPTION**

The Administration will provide to Council updates on the plan on a quarterly basis. These updates will be an overview of plan status, highlight any changes to projects listed in the plan, and be the time supplemental appropriations could be requested.

The plan will also go through an annual adoption process prior to the Capital Budget being formally presented to Council. The annual adoption process will begin at the end of the 2<sup>nd</sup> quarter or the start of the 3<sup>rd</sup> quarter each year and run for a period of no less than 8 weeks. Keeping this annual timeline will provide the public a consistent timeframe in which to participate in the plan process.

### **Schedule for Annual Adoption:**

- Week 1 – Draft plan published.
- Week 2 – Presentation of draft plan
- Week 3 – Public Comment
- Week 4 – Continued Discussion

- Week 5 – Public Comment
- Week 6 – Final Plan Introduced
- Week 7 – Public Hearing and 1<sup>st</sup> Reading.
- Week 8 – Committee Discussion
- Week 9 – Public Hearing and 2<sup>nd</sup> Reading.

\* Weeks listed above are not consecutive weeks

### 3 PLAN TIMELINE

---

The intent of this plan is to establish accurate scope and cost estimates for projects that are scheduled to be completed in the next 5 years. The uncertainty of projects beyond five years is very high and can only be considered preliminary. Project scope, potential solutions, and cost estimates would only be accurate at the beginning of the process established by this plan. It is important to have a comprehensive list of projects that can be reviewed and assessed as part of the capital planning process. This plan is divided into the 4 categories described below.

#### 3.1 CURRENT 5 YEAR BUDGET PROJECTION

Year one of this 5-year interval would be considered the current year capital budget as discussed in section 1.5 above. Projects established in this interval are;

- Ready for and/or undergoing implementation.
- Project alternatives have been considered and solution selected.
- Scope of the project is properly identified.
- A firm budget and contingencies established, and
- The Administration has recommended appropriations be included in the capital budget.

#### 3.2 NEXT 5 YEAR PHASE I

The next 5-Year phase of the plan, years 4-8, are projects that are on the horizon and the feasibility of conducting this specific project is under consideration. Projects established in this interval are;

- Pending planning and assessment work to establish feasibility.
- General cost estimates are based on best known information.
- Project listed on a summary worksheet, but a detailed worksheet is only in draft form.

#### 3.3 NEXT 5 YEAR PHASE II

The next 5-Year phase of the plan, years 9-13, are projects that have been identified and are considered on-deck for feasibility and assessment. Projects established in this interval are;

- Being considered for incorporation in the long-term plan
- Cost estimates are preliminary and lack certainty.
- Project listed on a summary worksheet only.

#### 3.4 NEXT 5 YEAR PHASE III

The final 5-Year phase of the plan, years 14-20, are long-term visionary projects that have been identified but have not been established. Projects established in this interval are;

- Lacking in a fully defined scale, scope, and approach.
- Projects are listed in a conceptual manner.

Projected Cost by Year	Current 5	Phase I	Phase II	Phase III	Totals
<b>Transportation &amp; Mobility</b>					
<b>Transportation Total</b>	<b>\$44,775,115</b>	<b>\$30,500,000</b>	<b>\$30,500,000</b>	<b>\$30,500,000</b>	<b>\$136,275,115</b>

<b>Totals</b>	<b>\$195,862,011</b>	<b>\$116,563,500</b>	<b>\$54,225,000</b>	<b>\$54,275,000</b>	<b>\$420,925,511</b>

## 4 TRANSPORTATION & MOBILITY

### 4.1 TRANSPORTATION AND MOBILITY

The City manages over 280 lane miles of paved roadways, 18 bridges, and over 30 signalized intersections. In addition, sidewalks that connect neighborhoods and overhead streetlighting that improves safety are included in this section of the CIP. Multi-use trail systems while critical to mobility throughout the City, are inventoried and described in Section 6.3. Each of these elements work cohesively to create safe and efficient movements into and throughout the City. The annual street rebuilds, and asphalt overlay programs are captured in this section of the CIP.

#### 4.1.1 TRANSPORTATION AND MOBILITY GOALS

- Create safe transportation and mobility systems.
- Improve multi-modal movements through the City.
- Maintain pavement ratings of 75 or greater city-wide.

#### 4.1.2 TRANSPORTATION AND MOBILITY PROGRAM

Prj #	Project Name	Priority	Start Yr	Status	Total
TR-CM-01	Street Program - Asphalt Overlay	CM	Annual	Annual	\$15,894,099
TR-CM-02	Street Program - Street Rebuild	CM	Annual	Annual	\$12,259,761
TR-CM-03	Sidewalk Maintenance Program	CM	Annual	Annual	\$4,666,818
TR-CM-04	Traffic Control Upgrades & Maintenance	CM	Annual	Annual	\$1,150,000

TR-26-02	Havens Corners Rd - Improvements	1-Imperative	2025		\$0
					<b>\$45,760,288</b>

See Section 10 for full project detail.

## 5 UTILITY SYSTEMS

### 5.1 SANITARY SEWER SYSTEMS

The City manages a complex network of sewer infrastructure that services the entire city. This infrastructure ranges in age depending on the age of the original developments. Adding to this complexity the system feeds into the City of Columbus wastewater treatment facilities. Overall capacity and infiltration issues are typical with systems of this age. As development pressures increase so does pressure on the overall system. Capacity improvements are necessary in various parts of the system and proactive maintenance techniques are being programmed to improve the overall health of the system.

#### 5.1.1 SANITARY SEWER SYSTEM GOALS

- Establish an annual inspection & cleaning process.
- Identify trouble areas and study alternative solutions.
- Provide capacity to meet Economic Development objectives.

#### 5.1.2 SANITARY SEWER SYSTEM PROGRAM

Prj #	Project Name	Priority	Start Yr.	Status	Current 5
SS-CM-01	Sanitary System Rehab & Replacement	2-Essential	CM		\$3,140,739
SS-CM-02	Sanitary CCTV Program	2-Essential	CM		\$1,625,000
SS-21-01	West Gahanna Sanitary Sewer Analysis	1-Imperative	2021	Design	\$602,122
SS-22-03	Serran Dr Sanitary Sewer Replacement	1-Imperative	2022	Pre-Bid	\$290,000
SS-22-01	Sanitary Pump Station Improvement	2-Essential	2022		\$1,000,000
SS-22-04	East Johnstown Rd Sanitary Sewer	2-Essential	2022		\$300,000
SS-23-01	Olde Gahanna Sanitary Sewer Study	1-Imperative	2023		\$224,883
SS-23-02	SSES Phase 3 (Capital Planning)	1-Imperative	2023		\$150,000
SS-23-02	Gahanna Middle School East, Capacity Imprv	1-Imperative	2023		\$139,900
SS-24-01	Gahanna Lincoln High School, Capacity Imprv	1-Imperative	2024		\$400,000
					<b>\$7,972,644</b>

See Section 10 for full project detail.

## 5.2 STORM WATER SYSTEMS

The City is responsible for 115 miles of storm sewers, 2,767 catch basins, 2,922 curb inlets, 2,067 storm manholes, 762 outfalls, and 35 water quality structures. With the presence of the Big Walnut & Rocky Fork waterways there are areas located within the FEMA Flood Zone. These systems must work together to mitigate and limit the impacts of stormwater runoff. Proactive maintenance of the stormwater collection system ensures the safe and reliable conveyance of stormwater. Storm Water System Goals

### 5.2.1 STORM WATER SYSTEM PROGRAM

Prj #	Project Name	Priority	Start Yr	Status	Total
SW-CM-01	Stormwater System Rehab & Replacement	CM	Annual	-	\$3,818,815
SW-CM-02	Stormwater CCTV Program	CM	Annual	-	\$750,000
SW-21-01	E Johnstown Drainage Improvements	1-Imperative	2021	Completed	\$488,770
					<b>\$5,057,585</b>

See Section 10 for full project detail.

### 5.3 WATER SYSTEM

The City of Gahanna provides water utility service within its geographic boundaries. As a master-meter community the City purchases water from the City of Columbus. This water is stored in two above ground storage tanks maintained by the City. Water mains, fire hydrants, curb boxes, and other water utility assets are maintained by the City of Gahanna Public Service Utilities Divisions.

#### 5.3.1 WATER SYSTEM GOALS

#### 5.3.2 WATER SYSTEM PROGRAM

Prj #	Project Name	Priority	Start Yr	Status	Total
W-CM-01	Waterline Replacement	CM	Annual	-	\$5,361,121
W-CM-02	Fire Hydrant Replacement Program	CM	Annual	-	\$1,000,000
W-22-01	Havens Corners Storm Waterline Replace	1-Imperative	2022	Completed	\$2,382,460
W-22-02	Water Tower Rehabilitation	1-Imperative	2022	Construction	\$1,403,842
W-22-03	Claycraft Road Waterline Replace	1-Imperative	2022	Completed	\$3,434,308
W-23-01	Water Distribution Plan Study - Zone 2	1-Imperative	2023	Completed	\$100,000
W-24-01	Taylor Road Waterline Replacement	1-Imperative	2024	Design	\$300,000
					<b>\$13,981,731</b>

See Section 10 for full project detail.

## 6 PARKS & RECREATION

### 6.1 PLAY ELEMENTS & SURFACES

The City manages and maintains approximately 18 large play structures throughout the park system. It is critical that these elements remain safe and up to date. Just as critical is the surfaces these elements are built upon. Play elements have a useful life of 20 years and safety surfaces approximately 10 years. Preventative and ongoing maintenance are necessary to ensure National Playground Safety Standards are met while maximizing equipment lifespans. Maintaining and replacing existing park assets is necessary for safety, citizen satisfaction and resource management. Included in this section are surface replacement and repairs, play element and skate element maintenance, replacement, or improvements.

#### 6.1.1 PLAY ELEMENTS & SURFACES GOALS

- Maintain safe and operable play elements and surfaces.
- Improve Americans with Disabilities access to play elements.
- Update amenities and expand the user group.

#### 6.1.2 PLAY ELEMENTS & SURFACES PROGRAM

Prj #	Project Name	Priority	Start Yr.	Status	Current 5
PK-CM-02	Annual Repairs	CM	2023		\$115,000
PK-23-01	Ambassador Park - Play & Shade Structures	2-Essential	2023	Completed	\$200,000
PK-23-02	Upper McCorkle - Surface Replacement	2-Essential	2023	Completed	\$100,000
PK-24-01	Academy Park - Play & Shade Structures	2-Essential	2024	Design	\$450,000
PK-25-01	Friendship Park - Play & Shade Structures w/ Surface	2-Essential	2025		\$500,000
PK-26-01	Pizzurro Park - Dog Play & Shade Structures	2-Essential	2026		\$90,000
PK-26-02	Ashburnham - Play & Shade Structures	2-Essential	2026		\$187,000
PK-27-01	Hannah Park - Play & Shade Structures w/ Surface	2-Essential	2027		\$1,750,000
PK-28-01	Bryn Mawr - Play & Shade Structures	2-Essential	2028		\$152,000
PK-28-02	Rice Avenue Play Structure	2-Essential	2028		\$170,000
PK-29-01	Rathburn - Play & Shade Structures	2-Essential	2029		\$175,000
PK-30-01	Hunter's Ridge Park - Play Structures	2-Essential	2030		\$210,000
PK-30-02	Trapp - Play & Shade Structures	2-Essential	2030		\$200,000
PK-32-01	Upper McCorkle - Play Structure	2-Essential	2032		\$203,000
PK-36-01	Sunpoint Park - Play Structure	2-Essential	2036		\$1,250,000
PK-39-01	Headley Park - Play Structure	2-Essential	2039		\$900,000
PK-40-01	Woodside Green - Play Structure	2-Essential	2040		\$400,000
					<b>\$7,052,000</b>

See Section 10 for full project detail.

## 6.2 PARK RENOVATIONS & IMPROVEMENTS

The City of Gahanna owns over 750 acres of parkland. This acreage is made up of developed parks designed for active recreational use, multi-purpose trails and over 200 acres of preservation and conservation properties. The Gahanna Parks & Recreation Department is charged with the stewardship of these resources. Improving amenities, while maintain existing park facilities and grounds are of high priority for the City. Projects included in this section of the CIP include shelter additions and renovations, park fencing, lighting, shade structures, restroom additions and renovations, signage, and irrigation are some examples.

### 6.2.1 PARK RENOVATION GOALS

- Improve participant satisfaction level.
- Remove and update equipment and features.
- Reduce hazards.

### 6.2.2 PARK RENOVATION PROGRAM

Prj #	Project Name	Priority	Start Yr	Status	Current 5
PK-CM-01	Park Asset Repair & Replacement	CM	2024		\$450,000
PK-22-081	Academy Park Mountain Bike Trail	3-Important	2022	Construction	\$250,000
PK-22-02	Price Road House Renovations	2-Essential	2022	Pre-Bid	\$675,000

PK	Headley Park Field Redesign	2-Essential		\$0
PK	Academy Park Redesign	2 - Essential		\$0
				<b>\$6,882,000</b>

See Section 10 for full project detail.

### 6.3 TRAILS, PATHS, & OTHER PARK SURFACES

There are over 20 miles of paved trails, nearly 150,000 square feet of asphalt parking lots, and a variety of other hard surfaces (e.g. trails, walkways, play courts) within the park system. Expansion of the trail system is the number one amenity identified by the community in the Parks Master Plan. Multi-use trails provide an alternate mode of transportation through the city and connect residents with other destinations. These surfaces also require ongoing maintenance. Resurfacing asphalt surfaces throughout City parks including parking lots, park trails, park sidewalks is a priority to ensure safety of the users of the system. The Parks & Recreation Department will continue to collaborate with the Engineering Department to ensure work is bid alongside the annual street program for competitive pricing.

#### 6.3.1 TRAILS, PATHS, & OTHER PARK SURFACE GOALS

- Improve and invest in existing surfaces.
- Reduce hazards.
- Decrease the cost of deferments.

#### 6.3.2 TRAILS, PATHS, & OTHER PARK SURFACE PROGRAM

Prj #	Project Name	Priority	Start Yr	Status	Total
PK-CM-01	Asphalt Lot Maintenance	CM	2024		\$300,000
PK-22-01	Big Walnut Trail Section 8	2-Essential	2022	Construction	\$2,331,781
PK-22-02	Trapp Park Trail & Park Improvements	2-Essential	2022	Completed	\$60,000
PK-23-01	Link to Literacy Trail	2 - Essential	2023	Design	\$1,600,000
PK-23-02	Hannah Walking Path Trail Repair	2-Essential	2023	Completed	\$48,750
PK-23-03	Old Ridenour/Granville Trail Repair	2-Essential	2023		\$45,150
PK-23-04	Price Road Parking Lot Replacement	2-Essential	2023		\$341,356
PK-23-05	Woodside Green Parking Lot Replace	2-Essential	2023	Completed	\$373,781
PK-23-06	Woodside Green Trail Repairs	2-Essential	2023		\$125,000
PK-23-07	Friendship Basketball Court Repair	2-Essential	2023	Completed	\$16,769
PK-24-01	Royal Gardens Sidewalk	2-Essential	2024		\$8,500
PK-24-02	Woodmark Woods Reserve Sidewalk	3-Important	2024		\$12,000
PK-24-04	Golf Course Cart Path Replacement	2-Essential	2024	Construction	\$405,000
PK-24-05	Academy Park Parking Lot Replacement	2-Essential	2024	Pre-bid	\$800,000
PK-24-06	Hannah to Headley Connector Trail	2-Essential	2024	Planning	\$836,500
PK-25-01	Gahanna Woods Parking Lot Replace	2-Essential	2025		\$200,000
PK-25-02	Lower McCorkle Parking Lot Replacement	2-Essential	2025		\$200,000
PK-25-03	Hunter's Ridge Basketball Court Replace	2-Essential	2025		\$50,000
PK-25-04	Morse Road Multi-use Trail Tunnel Drain	2-Essential	2025		\$0
PK-26-01	Hannah Park Parking Lot	2-Essential	2026		\$850,000
PK-26-02	Ashburnham Sidewalk	2-Essential	2026		\$16,000

Adopted: August 21, 2023

Last Revised: August 2024

PK-26-03	East Johnstown Multi-use Trail	2-Essential	2026	Moved	\$517,500
PK-27-01	Friendship Park Parking Lot	2-Essential	2027		\$300,000
PK-27-02	Hunter's Ridge Parking Lot Replacement	2-Essential	2027		\$300,000
PK-28-01	Sunpoint Loop Trail	2-Essential	2028		\$50,000

PK-29-04	W. Johnstown to Big Walnut Trail	Identified	2029		\$0
PK-29-01	Vets Memorial Park Parking Lot	2-Essential	2029		\$175,000
					<b>\$ 9,963,087</b>

See Section 10 for full project detail.

## 6.4 POOL INFRASTRUCTURE

The City maintains 5 aquatic or water related facilities at three separate locations. Each of these facilities require ongoing repairs, replacements, and improvements. The improvements and maintenance include features such as slides, diving boards and climbing walls, boiler replacements, decking and pool repair and/or replacement and chlorinators.

### 6.4.1 POOL INFRASTRUCTURE GOALS

- Maintain safe and operable aquatic facilities.
- Increase resident satisfaction with updated amenities.
- Increase operation's efficiencies by updating aging equipment.

### 6.4.2 POOL INFRASTRUCTURE PROGRAM

Prj #	Project Name	Priority	Start Yr.	Status	Current 5
PK -CM-01	Pump Room Maintenance	CM		On-going	\$66,000
PK-23-01	Gahanna Swimming Pool Starter Blocks	2-Essential	2023	Completed	\$30,000
PK-23-02	Gahanna Swimming Pool New Roof	2-Essential	2023	Completed	\$29,000
PK -24-01	Aquatic Assessment/Facilities Plan	2-Essential	2024	Underway	\$60,000
					<b>\$185,000</b>

See Section 10 for full project detail.

# 7 CITY FACILITIES

## 7.1 CITY FACILITIES

Over the last two decades city facilities have been assessed for condition and overall functionality. A study conducted in 2005 concluded that the city needed an addition 100,000 square feet to meet the needs at that time. Minimal investment has been made in the City’s facilities and has left the city facing many challenges in this area. In 2022, the City began addressing these needs with the purchase of 825 Tech Center Drive. This will address the needs of the Police Department, City Hall, and the Senior Center.

Solutions for the Public Service and Parks Maintenance facility on Oklahoma Ave. are under consideration but are challenged with the lack of open land for a facility of this size. In addition, the residents have identified a desire for a Community Center. As these facility needs are addressed, it will be critical that the replacement of building systems is properly planned in the future.

### 7.1.1 CITY FACILITIES GOALS

- Provide safe and healthy working environments.
- Address facility needs 30 years into the future.
- Utilize sustainability measures to reduce operating costs.

### 7.1.2 CITY FACILITIES CIP PROGRAM

Prj #	Project Name	Priority	Start Yr	Status	Current 5
FA-20-1401	City-Wide ADA Evaluation	1-Imperative	2020		\$80,000
FA-20-1401	Creekside Flood Mitig. & Plaza Imp.	1-Imperative	2020	Design	\$12,752,218
FA-22-825	825 Tech Center Drive Renovation & Expansion	1-Imperative	2022	Construction	\$61,895,000
FA-23-1401	Parks & Service Maintenance Complex	1-Imperative	2024	Planning	\$12,000,000
FA-23-	Strategic Land Acquisition for Development	3-Important	2027		\$1,000,000
FA-27-	Community Recreation Center	3-Important	2028		\$60,000,000
					\$0
					<b>\$147,727,218</b>

See Section 10 for full project detail.

## 8 EQUIPMENT

Equipment is utilized by city staff to perform the specific duties of the department. These assets are generally not fixed to one specific area or job site but have the ability to be mobile and can be utilized where they are needed. This section of the CIP is broken down into 3 categories, wheeled assets, mechanical equipment, and public safety equipment. Examples of these are police cruisers, heavy construction equipment, certain classes of lawn equipment, vehicle lifts utilized by the Fleet Division, portable traffic control devices, and police radio equipment utilized for emergency communications. Building Systems such as mechanical systems, generators, furniture is listed in the Facilities section of the CIP.

Prj #	Project Name	Priority	Start Yr	Status	Total
FL-AN-1401	Heavy Equipment Replacement	CM	CM		\$3,547,000
FL-AN-1402	Specialty Equipment Replacement	CM	CM		\$1,969,018
FL-AN-1403	Police Vehicle Replacement	CM	CM		\$1,254,165
FL-AN-1404	Vehicle Replacement	CM	CM		\$1,971,000
FL-AN-1405	Fleet Equipment Replacement	CM	CM		\$510,000
FL-25-085	Golf Cart Replacement	3-Important	2025		\$120,000
EQ-22-01	Police Radio & System Replacement	1-Imperative	2022		\$2,494,879
EQ-24-01	Brine Machine for Snow & Ice	2-Essential	2024		\$110,000
EQ-24-310	Electric Vehicle Charging Stations	3-Important	2024	Identified	\$1,090,000
EQ-25-01	Dispatcher Workstations	1-Imperative	2025	Design	\$185,000
EQ-25-02	Emergency Alert Sirens	1-Imperative	2025	Design	\$175,000
EQ-26-01	VR Police Simulator	3-Important	2026	Planning	\$400,000
					<b>\$13,826,062</b>

See Section 10 for full project detail.

# 9 TECHNOLOGY PROGRAM

## 9.1 GAHANNA FIBER OPTIC NETWORK (G-NET)

The Gahanna Fiber Optic Network (G-NET) is comprised of approximately 20 miles of fiber optic assets that run throughout the City. This network is managed by the City with the purpose of providing diverse and redundant connectivity for public safety and business continuity purposes. Other public agencies such as the Gahanna Jefferson Public Schools and Mifflin Fire Department also utilize the network to interconnect their own facilities. Secondly, the network through a partnership with the Community Improvement Corporation (CIC) is used as an economic development resource.

### 9.1.1 G-NET GOALS

- Maintain a diverse and redundant fiber optic network to connect city facilities.
- Expand the presence of fiber optic assets throughout the city increasing reliability and resiliency.
- Utilize the network as an economic development incentive and revenue generator.
- Maximize the investment by continually exploring interconnections and new service opportunities.

### 9.1.2 G-NET PROGRAM

Prj #	Project Name	Priority	Start Yr	Status	Current 5
TE-AN-700	Fiber Optic Network Expansion & Red.	1-Imperative	Annual		\$2,604,545
TE-22-705	Big Walnut Fiber Loop	1-Imperative	2022	Completed	\$599,924
TE-23-701	400 W. Johnston Lateral Capacity Improvements	1-Imperative	2023	Completed	\$49,370
TE-24-701	200 South Hamilton Redesign	1-Imperative	2024	Design	\$0
TE-24-702	825 Tech Center Drive Laterals	1-Imperative	2024	Design	\$0
TE-24-703	Trunk 4 Capacity Improvements	1-Imperative	2024	Design	\$0
					<b>\$3,253,839</b>

See Section 10 for full project detail.

**9.2 TECHNOLOGY INFRASTRUCTURE**

The City maintains a full complement of information technology assets that are utilized to provide technology services to each city department and agency. These resources are critical in providing business continuity in the event of a disaster and recovery event. While this infrastructure is kept under warranty and other service agreements to mitigate the impacts of any failures, it is critical that these components are routinely upgraded and replaced.

**9.2.1 TECHNOLOGY INFRASTRUCTURE GOALS**

- Utilize industry best practices for maintaining and replacing core network equipment.
- Utilize industry best practices for maintaining and replacing server equipment.
- Utilize best practices for maintaining and replacing storage area network (SAN) equipment.
- Ensure redundancy in all elements of Information Technology Infrastructure.

**9.2.2 TECHNOLOGY INFRASTRUCTURE PROGRAM**

Prj #	Project Name	Priority	Start Yr	Status	Current 5
TE-24-750	Network Switches & Core Lifecycle	1-Imperative	2024		\$600,000
TE-26-730	Server Lifecycle	1-Imperative	2025		\$149,000
TE-27-740	Storage Area Network (SAN) Lifecycle	1-Imperative	2025		\$410,994
					<b>\$1,159,994</b>

See Section 10 for full project detail.

### 9.3 SYSTEMS & USER APPLICATIONS

Systems that perform specific duties related to a department fall inside of this category. It is these systems that serve as the backbone for the tasks each department performs. At the pace in which technologies advance and the evolution in which technological change takes place, it is critical that core systems are routinely assessed and, in some instances, replaced. Over the last several years, the city has invested in enterprise class systems. While this class of systems generally cost more to implement, their longevity, if procured appropriately, decrease the frequency at which the systems need replaced.

#### 9.3.1 SYSTEMS & USER APPLICATION GOALS

- Invest in enterprise class systems and applications to support the core functions of the City.
- Utilize industry best practices for maintaining each of these systems.
- Maximize these investments, when possible, by meeting multiple departments needs in a single application.
- When appropriate, cloud and hybrid solutions should be investigated.

#### 9.3.2 SYSTEM & USER APPLICATION PROGRAM

Prj #	Project Name	Priority	Start Yr	Status	Current 5
TE-22-1401	CityWorks Asset Management	2-Essential	2021	Completed	\$328,941
TE-23-110	Police Dispatch & Records System	1-Imperative	2023	Design	\$1,100,000
TE-23-2001	Code & Permitting Management System	1-Imperative	2023	Completed	\$91,022
TE-24-110	Parks & Recreation Programing System	1-Imperative	2026	Moved	\$77,5000
TE-24-110	Community ALPR Cameras	2-Essential	2024	Competed	\$125,000
TE-25-110	911 System Upgrade & Lifecycle	1-Imperative	2025		\$700,000
					<b>\$2,428,941</b>

## TR-CM-01 - Street Program - Asphalt Overlay

Start Year: 2020  
 Project Created: Jan-23  
 Last Updated: Aug-24

<b>Project Priority:</b>	CM	Capital Maintenance	<b>Project Type:</b>	Transportation & Mobi
<b>Projected Cost:</b>		Current Year	<b>Project Category:</b>	Roads & Bridges
<b>Duration:</b>			<b>Project Area:</b>	Citywide
<b>Current Status:</b>		Planning & Assessment	<b>Project Completion:</b>	Annual

**Project Overview:**

The City uses a pavement condition rating (PCR) system as defined by the Ohio DOT. The system rates the condition of streets (1-100) for, four categories: extent cracking, concrete condition, crack seal condition and pavement defects (e.g. potholes). All four categories contribute to the overall rating, but the pavement defects category is weighted the heaviest because it relates to the ride quality and current maintenance costs. The annual street repaving program is based upon these ratings. Other infrastructure improvements are also considered (e.g. water line replacement) when the annual plan is developed.

Project Overview:

When pavement reaches the end of its useful life and preventative maintenance treatments, including asphalt overlay or crack sealing are no longer effective, the street will need to be reconstructed. The useful life of a street is generally 75 years. The street rebuild prioritizes rebuilding Detroit Style (Concrete) streets, which were a common street construction throughout the City in the 1950s and 1960s. Other streets also meet the conditions for a complete rebuild to be performed. All streets are rebuilt to current street standards and include a concrete base, asphalt surface and separate curb and gutter. Sidewalk improvements along these streets are also completed during these rebuilds. Other infrastructure improvements are considered (e.g. water line replacement) when the annual plan is

## TR-CM-03 - Sidewalk Maintenance Program

Start Year: 2021  
Project Created: January-23  
Last Updated: Aug-24

**Project Priority:** CM Capital Maintenance  
**Projected Cost:** Current Year  
**Duration:**  
**Current Status:** Planning & Assessment

**Project Type:** Transportation & Mobility  
**Project Category:** Mobility  
**Project Area:** Citywide  
**Project Completion:** Annual

**Project Overview:**

Sidewalks provide connectivity within neighborhoods and increase pedestrian safety. Maintaining public walks is essential to preserving these benefits. Sidewalk maintenance is the responsibility of the property owner and this project does not remove this responsibility (ORC 729.01). The sidewalk maintenance program goal is the targeted repair and spot panel replacement of the estimated 300 miles of sidewalk throughout the city. The program area will follow the annual street program to minimize resident impacts and have a cost sharing provision.

# TR-CM-04 - Traffic Control Upgrades & Maintenance

Start Year: 2022  
 Project Created: January-22  
 Last Updated: Aug-24

**Project Priority:** CM Capital Maintenance  
**Projected Cost:** Current Year  
**Duration:**  
**Current Status:** Planning & Assessment

**Project Type:** Transportation & Mobility  
**Project Category:** Traffic Control  
**Project Area:** Citywide  
**Project Completion:** Annual

## Project Overview:

Signalized intersection provide for the controlled movement of vehicular and pedestrian traffic throughout the city. The equipment at signalized intersections has a useful life and need to be periodically updated. This includes detection cameras, controllers, conflict monitors, traffic and pedestrian signal heads, cabinets, and school zone flashers. Traffic signal equipment has a useful life of 15-20 years. Energy efficient LED equipment will be installed reducing the City's cost of operating each intersection. The City maintains approximately 40 signaled intersections throughout the city. Addition of signalized intersections will be presented as individual projects within this CIP. Pavement markings, such as crosswalks & lane markings will also be covered under this CIP item.

## Next Steps\Update:

The City is in need of inventorying our 40 signalized intersections to determine where each falls within the lifecycle replacement. A plan and appropriate budgets will be developed to address these assets beginning in 2024 and beyond.

Start Year: 2022  
 Project Created: January-22  
 Last Updated: Aug-24

**Project Priority:** CM Capital Maintenance  
**Projected Cost:** Current Year  
**Duration:**  
**Current Status:** Planning & Assessment

**Project Type:** Transportation & Mobility  
**Project Category:** Safety  
**Project Area:** Citywide  
**Project Completion:** Annual

**Project Overview:**

Illuminated intersections provide for safer vehicular and pedestrian environment throughout the city. The city manages over 2,000 streetlights. These conversation of these assets, many of which still utilize incandescent bulbs, to energy efficient LED equipment will reduce the City's cost of operating each streetlight. Intersections that are not illuminated will be evaluated and then prioritized for the installation of new streetlights. In addition to upgrading and installing new streetlights, the existing poles require routine maintenance such as painting.

# TR-25-1405 - Morse Rd Improv. (Hamilton - Trellis Ln.)

Start Year: 2020  
Project Created: January-20  
Last Updated: August-24

<b>Project Priority:</b>	1 Imperative	<b>Project Type:</b>	Transportation & Mobility
<b>Projected Cost:</b>	\$1 M	<b>Project Category:</b>	Roads & Bridges
<b>Duration:</b>	36 Months	<b>Project Area:</b>	North Gateway
<b>Current Status:</b>	Construction & Inspection	<b>Project Completion:</b>	

## Project Overview:

In partnership with the City of Columbus, City of New Albany, and Franklin County this project will rebuild Morse Road with a 5-lane section with curb and gutter, a multi-use path and sidewalks. Traffic control, such as signalization and roundabouts are to be evaluated and determined in the planning phase. Utility improvements (Water, Sanitary, Storm, Fiber, others) will be made in partnership with these improvements. This project will happen in three phases but presented in a single worksheet.

Phase I - Hamilton Rd to Trellis Ln (Complete)

Phase II - Trellis Ln - US 62

Phase III - US 62 - Reynoldsburg New Albany Rd

Projected Cost	Encumbered	2023	2024	2025	2026	2027 - 2031	2032 - 2042	Totals

## Next Steps\Update:

[Update] Future improvements to Morser Road Phase II & III are being studied by the Franklin County Engineers office. Future funding will be requested as a result of these studies.

This project is being completed by the City of Columbus and is complete with in the City of Gahanna. The encumbered balance is for the cost share of the project and waiting project close out.

Start Year: 2022  
 Project Created: January-22  
 Last Updated: February-23

**Project Priority:** 1 Imperative  
**Projected Cost:**  
**Duration:**  
**Current Status:** Construction & Inspection

**Project Type:** Transportation & Mobility  
**Project Category:** Roads & Bridges  
**Project Area:** North Gateway  
**Project Completion:** Dec-23

**Project Overview:**

Cherry Bottom Road is classified as Major Collector due to the moderate amount of traffic it receives and the high level of access it provides to surrounding properties. Unstable soil along Cherry Bottom Road between Coldwell Drive and Campus Drive is causing the banks to erode and could lead to the roadway being undermined. The stabilization of the roadway is critical and should be a prerequisite to any repaving work that would be done to the road surface.

**Next Steps\Update:**

Emergency stabilization efforts started on a portion of Cherry Bottom in 2021. Construction of this project was completed in 2022 with project closeout taking place in 2023.

## TR-22-01 - Hamilton Road Bridge Enhancements

Start Year: 2022  
 Project Created: January-22  
 Last Updated: August-24

<b>Project Priority:</b>	2	Essential	<b>Project Type:</b>	Transportation & Mobility
<b>Projected Cost:</b>		\$1.1 Million	<b>Project Category:</b>	Roads & Bridges
<b>Duration:</b>		60 Months	<b>Project Area:</b>	South Gateway
<b>Current Status:</b>		Planning & Assessment	<b>Project Completion:</b>	December-25

**Project Overview:**

The Ohio State Department of Transportation is reconstructing the bridge and bridge deck that carries South Hamilton Road over Interstate 270. The city portion of the project will be to enhance the bridge features by adding decorative lighting and vandal fence with the letters reading "GAHANNA".

**Next Steps\Update:**

**[Update]** Construction of this project began in June 2023 and is scheduled to be completed in the Summer 2025.

This project is currently in the design phase with construction slated to begin in 2024. The design of the lighting features and fencing has been completed. The Big Walnut Trail Section 8 project is dependent on this project and is included in the trails section of the CIP.

## TR-24-01 - Tech Center Drive Extension

Start Year: 2021  
 Project Created: January-21  
 Last Updated: August-24

<b>Project Priority:</b>	3 Important	<b>Project Type:</b>	Transportation & Mobility
<b>Projected Cost:</b>		<b>Project Category:</b>	Roads & Bridges
<b>Duration:</b>		<b>Project Area:</b>	South Gateway
<b>Current Status:</b>	Planning & Assessment	<b>Project Completion:</b>	

**Project Overview:**

A vacated right-of-way exists between the intersection of Tech Center Drive and Science Boulevard, east to Taylor Station Road. Extending Tech Center Drive would provide traffic relief to Claycraft Road, Taylor Road, and Morrison Road. Signalization of the new intersection and sidewalks and multi-use path extensions are to be studied and included with this project. Construction of this extension opens land for development and encourages further development throughout the Office, Commerce, and Technology District which Tech Center Drive services. Approximately 60 acres of underdeveloped commercial land located in Jefferson Township would be serviced by this extension. This project would also include improvements to fiber networks, sanitary sewers, stormwater and water

<b>Total</b>	<b>\$335,100</b>	<b>\$0</b>	<b>\$0</b>	<b>\$0</b>	<b>\$0</b>	<b>\$0</b>	<b>\$0</b>	<b>\$335,100</b>

**Next Steps\Update:**

**[Update]** Extending this roadway to Taylor Station is currently being investigated as part of the Throughfare Planning Process

As part of the ADB Safegate development a portion of this extension was constructed to provide better access to the facility. Approximately, 1,300 ft remains to complete this extension as described above.

# TR-22-1405 - Taylor Station/Claycraft Rd Roundabout

Start Year: 2022  
Project Created: January-22  
Last Updated: August-24

<b>Project Priority:</b>	1 Imperative	<b>Project Type:</b>	Transportation & Mobility
<b>Projected Cost:</b>	\$1.6M	<b>Project Category:</b>	Roads & Bridges
<b>Duration:</b>	36 Months	<b>Project Area:</b>	South Gateway
<b>Current Status:</b>	Design & Permitting	<b>Project Completion:</b>	December-24

## Project Overview:

The intersection at Taylor Road and Claycraft Road is critical to the City's industrial area. During peak hours, the intersection operates at an E or failing level of service. This can result in backups on Taylor Road as far south as East Broad Street. The proposed roundabout will improve the level of service at this intersection and improve travel along Taylor Rd and Claycraft Rd. Captured under a separate project sheet will be the replacement of the water lines that service this area.

## Next Steps\Update:

[Update] Construction of this project began in the early spring 2024 with utility relocations. Construction of the roundabout will follow and be completed in the summer 2025.

# TR-23-1401 - Old Gahanna Traffic Circulation Improvements

Start Year: 2023  
Project Created: January-22  
Last Updated: August-24

Project Priority:	3 Important	Project Type:	Transportation & Mobility
Projected Cost:		Project Category:	Roads & Bridges
Duration:		Project Area:	Downtown
Current Status:	Planning & Assessment	Project Completion:	December-24

## Project Overview:

With the progression of the Creekside Development plan, evaluating the traffic and pedestrian circulation in the Old Gahanna - Creekside area is critical to the success of that redevelopment. Public parking will be evaluated and in relation to the circulation network. An overall strategy that works minimizes traffic related conflicts will be presented and project that improve circulation will be programed in subsequent years.

# Gahanna TR-23-1401 - Havens Corners Rd - Hawk Signal

Start Year: 2023  
Project Created: January-22  
Last Updated: August-24

Project Priority:	0 Identified	Project Type:	Transportation & Mobility
Projected Cost:		Project Category:	Roads & Bridges
Duration:		Project Area:	Central Corridor
Current Status:		Project Completion:	December-24

## Project Overview:

To improve pedestrian safety within the school zone along, Havens Corners Road, a high-intensity activated crosswalk (HAWK) beacon will be installed. This improvement would require the construction of a traffic control device over Havens Corners Road, that when activated would require motorist to stop and allow pedestrians to cross in a controlled setting.

	-	-	-	-	-	-	-	\$0
Total	\$0	\$0	\$0	\$0	\$0	\$0	\$0	\$0

## Next Steps\Update:

[Update] In coordination with the Gahanna Jefferson School District, Gahanna Police, and the City Administration this crosswalk will be permanently closed. Pedestrian will utilize the Hamilton Road - Havens Corners intersection to cross at a signalized intersection.

Start Year: 2023  
Project Created: January-22  
Last Updated: August-24

**Project Priority:** 3 Important  
**Projected Cost:** \$700K  
**Duration:** 12 Months  
**Current Status:** Design & Permitting

**Project Type:** Transportation & Mobility  
**Project Category:** Roads & Bridges  
**Project Area:** South Gateway  
**Project Completion:** December-25

**Project Overview:**

The medical campus and apartment complex being developed at the Crescent at Central Park will require a signalized intersection be installed at Tech Center Drive. This is part of the development agreement between the City and the developer. The medical campus portion of this development currently underway with the construction of the apartment complex to begin in 2024.

**Current Status:** Planning & Assessment

**Project Type:** Transportation & Mobility  
**Project Category:** Roads & Bridges  
**Project Area:** Citywide  
**Project Completion:** December-25

**Project Overview:**

There are a number of entry points into the City that designate you are now entering the City of Gahanna. These entry points have been identified and categorized into primary (2), secondary (8), and tertiary (5) locations. This project will create and coordinated design at each of these locations, focusing first on the primary gateways and then on the secondary entryways into the city. The updated gateways will be designed to be more visible, communicate the borders of Gahanna. In addition, the Community Sign Boards will be evaluated for upgrades as well. Wayfinding signage that is located at strategic points directing visitors and alike to Gahanna landmarks will also be designed.

**Next Steps\Update:**

**[Update]** This project was added to the 825 Tech Center Drive scope of services to bring coordination to each of the entry signs throughout the city to also include City Hall, Police, and Senior Center.

An RFP is being drafted to hire a design consultant who specializes in this work. It is anticipated work to begin on this project by the end of 2023. The chosen vendor will be responsible for providing cost estimates for the construction of each of these signs. Financial information will be updated once it becomes available.

# TR-24-02 - Stygler Rd - Agler Rd - US 62 Improvements

CIP Worksheet

Start Year: 2024  
Project Created: January-22  
Last Updated: August-24

<b>Project Priority:</b>	1 Imperative	<b>Project Type:</b>	Transportation & Mobility
<b>Projected Cost:</b>		<b>Project Category:</b>	Roads & Bridges
<b>Duration:</b>		<b>Project Area:</b>	West Gateway
<b>Current Status:</b>	Planning & Assessment	<b>Project Completion:</b>	

## Project Overview:

This project is intended to alleviate congestion in the area by removing the Stygler/Agler signalized intersection, installing a median in Stygler Road; adding a signal, roundabout or other traffic control measure at Stygler/Amfield intersection, creating backage roads resulting from the removal of the Stygler/Agler signal, implementing access management strategies, and future LinkUS regional coordination. Utility improvements (Water, Sanitary, Storm, Fiber, others) will be made in partnership with these improvements.

TR-24-03 - Speed Awareness Signs

Start Year:	2024
Project Created:	Sep-23
Last Updated:	Aug-24

Project Priority:	3      Important	Project Type:	Transportation & Mobility
Projected Cost:	\$25,000	Project Category:	Roads & Bridges
Duration:	12 Months	Project Area:	Citywide
Current Status:	Delivery & Implementation	Project Completion:	

Project Overview:

Radar equipped speed awareness signs will be installed on three throughfares within the City of Gahanna where speed concerns have been observed. These signs are used for driver awareness and not for enforcement purposes. Initially three locations have been identified for these signs to be placed: Clark State Road, E. Johnstown Road, and Hines Road.

**Project Completion:** December-26

**Project Overview:**

The intersection of Gary Lee Drive and the access to the High School will be aligned creating a 4 way intersection, replacing the offset intersection that exist today. This project is being coordinated and with the GJPS site improvements for the High School project. This project would include the complete upgrade of all of the equipment currently running the intersection. Off site improvements are being designed by GJPS and will be Bid and Constructed by City of Gahanna. This project will be funded by both the City and School District.

 City to inquire about moving project to Summer\Fall of 2026.

# TR-25-04 - Middle School East Transportation Improvements

Start Year:2025

Project Created:June-24

Last Updated:August-24

Project Priority:	1Imperative	Project Type:	Transportation & Mobility
Projected Cost:	GJPS Funded	Project Category:	Roads & Bridges
Duration:	24 Months	Project Area:	Central Corridor
Current Status:	Planning & Assessment	Project Completion:	December-26

Project Overview:

Transportation improvements along Clotts Rd in the area of Middle School East are required as part of the renovation of middle school. This includes the addition of a south bound left turn lane into the property. Off site improvements are being designed by GJPS and will be Bid and Constructed by City of Gahanna. This project will be funded by the School District.

# SS-CM-01 - Sanitary Sewer Rehab & Replacement

Start Year: 2023  
 Project Created: January-23  
 Last Updated: August-24

**Project Priority:** 1 Imperative  
**Projected Cost:** Annual  
**Duration:** 12 Months  
**Current Status:** Planning & Assessment

**Project Type:** Utilities  
**Project Category:** Sanitary Sewers  
**Project Area:** Citywide  
**Project Completion:** On Going

## Project Overview:

The City manages a complex network of sewer infrastructure throughout the city. This project creates a program for maintaining the sanitary collection system which ensures the safe and reliable conveyance of waste water. The project includes items such as the replacement of sanitary sewer mains, addresses identified capacity issues, rehabs manhole facilities, and addresses minor infiltration concerns. This program will also establish an inspection and cleaning process of the City's sanitary sewer infrastructure each year beginning in 2023. Planning and programming for an annual rehab and replacement of the system is critical to ensuring the system is being maintained and managed appropriately.

## Next Steps\Update:

## SS-CM-02 - Stormwater CCTV Program

Start Year: 2023  
 Project Created: January-23  
 Last Updated: August-24

**Project Priority:** 1 Imperative  
**Projected Cost:** Annual  
**Duration:** 12 Months  
**Current Status:** Planning & Assessment

**Project Type:** Utilities  
**Project Category:** Sanitary Sewers  
**Project Area:** Citywide  
**Project Completion:** On Going

**Project Overview:**

The City manages a complex network of sewer infrastructure throughout the city. This project creates a program to capture video from inside our sewer mains and laterals (CCTV). The project will help identify issues within the system that will need inventoried and prioritized so that they can be addressed in subsequent years. This proactive approach will help ensure the overall health of the sanitary system. Each piece of the system should be inspected and assessed through this program on a 10 year cycle.

**Next Steps\Update:**

## SS-21-01 - West Gahanna Sanitary Sewer

Start Year: 2020  
 Project Created: January-22  
 Last Updated: August-24

**Project Priority:** 1 Imperative  
**Projected Cost:**  
**Duration:**  
**Current Status:** Design & Permitting

**Project Type:** Utilities  
**Project Category:** Sanitary Sewer  
**Project Area:** West Side  
**Project Completion:** December-23

**Project Overview:**

This analysis continues the work of the West Gahanna Sanitary Sewer System Phase 1 efforts. During heavy rain events in March and May of 2020, some residents in the Royal Manor, Brentwood, Cliffview, and College Park neighborhoods experienced water and raw sewage in their basements associated with surcharging sanitary sewers. Phase 2 of this project involves intensive field investigations to identify private and public sources of storm water intrusion into the sanitary sewer. Testing techniques will be used to identify leaks from roof drains, foundation drains, yard drains, storm sewer cross-connections, and other unauthorized connections to the sanitary sewer.

Projected Cost	Encumbered	2023	2024	2025	2026	2027 - 2031	2032 - 2042	Totals
<i>Duration (in months)</i>

	-	-	-	-	-	-	-	\$0
<b>Total</b>	<b>\$602,122</b>	<b>\$0</b>	<b>\$0</b>	<b>\$0</b>	<b>\$0</b>	<b>\$0</b>	<b>\$0</b>	<b>\$602,122</b>

**Next Steps\Update:**

The City was presented with alternate solutions to address the problems identified in previous phases of this project. The chosen alternative requires an additional connection to the City of Columbus interseptor and approval by Columbus. Approval to proceed was granted by Columbus in June 2024 and design on the chosen solution will begin in summer of 2024.

Start Year: 2022  
 Project Created: January-22  
 Last Updated: August-24

**Project Priority:** 2 Essential  
**Projected Cost:** \$1M  
**Duration:**  
**Current Status:** Planning & Assessment

**Project Type:** Utilities  
**Project Category:** Sanitary Sewer  
**Project Area:** Citywide  
**Project Completion:** August-24

**Project Overview:**

Gahanna owns and operates four sewage pumping stations. These stations serve as sewage collection points for areas not serviced by gravity trunk sewers. Submersible pumps capable of moving 4,000 gallons per minute transfer sewage from these stations to Gahanna's gravity sewers. During power interruptions, these stations can become inoperable. To improve the resilience of these essential pieces of infrastructure outfitting each station with standby power systems is critical. In addition, this project will upgrade the existing stations to meet current standards and will replace other pieces of aging the infrastructure.

**Next Steps\Update:**

## SS-22-03 - Serran Dr Sewer Line Replacement

Start Year: 2022  
 Project Created: January-22  
 Last Updated: August-24

**Project Priority:** 1 Imperative  
**Projected Cost:** \$290K  
**Duration:** 12 Months  
**Current Status:** Planning & Assessment

**Project Type:** Utilities  
**Project Category:** Sanitary Sewer  
**Project Area:** Neighborhoods  
**Project Completion:** December-23

**Project Overview:**

Approximately 545 feet of 8-inch sanitary sewer in the backyards of properties located along west side of Serran Drive needs to be upgraded. A CCTV-inspection of this line from May 2021 indicated that a majority of the pipe is in poor structural condition and also features many open joints that have allowed for stormwater and root intrusion. Originally constructed in 1958, the current condition of the pipe would not allow for lining. Another trenchless method (pipe-bursting) is preferable to open cut construction for this replacement. The 2022 cost estimate includes construction costs as well as engineering design and inspection services.

Projected Cost	Encumbered	2023	2024	2025	2026	2027 - 2031	2032 - 2042	Totals
<i>Duration (in months)</i>

# SS-23-01 - Middle School East Capacity Improvements

Start Year: 2023  
Project Created: January-23  
Last Updated: August-24

**Project Priority:** 1 Imperative  
**Projected Cost:** \$150,000 Est.  
**Duration:** 24 Months  
**Current Status:** Planning & Assessment

**Project Type:** Utilities  
**Project Category:** Sanitary Sewers  
**Project Area:** Central Corridor  
**Project Completion:** Dec-25

## Project Overview:

Approximately 230 feet of 15-inch sanitary sewer located along the east side of Clotts Road immediately south of Riva Ridge Blvd needs to be upsized to 18-inch diameter pipe. An assessment of this sewer performed in conjunction with the City's review of plans for the Middle School East expansion indicated potential issues with the capacity of the 15-inch sewer. Engineering design of the project will be completed in 2023 with construction planned for 2024. The Middle School East sewer improvements will be constructed as a joint-bid package with the Serran Drive sewer replacement project.

## Next Steps\Update:

**[Update]** The city will bid this project with other Sanitary Sewer projects of similar size to increase the likelihood of receiving bids. Bids will be published in fall 2024 for construction in 2025.

Design of this project is currently underway and is expected to be concluded by the end of 2023.

# SS-23-02 - Olde Gahanna Sewer Study

Start Year: 2020  
 Project Created: January-22  
 Last Updated: August-24

**Project Priority:** 1 Imperative  
**Projected Cost:** \$238,329  
**Duration:** 12 Months  
**Current Status:** Planning & Assessment

**Project Type:** Utilities  
**Project Category:** Sanitary Sewer  
**Project Area:** Downtown  
**Project Completion:** December-23

## Project Overview:

This engineering study is focused on assessing the condition and capacity of the existing sanitary sewer system in the Olde Gahanna portion of the City. The overall goal of the project is the development of planning-level improvement alternatives for the sewer system, if the analysis indicates the need. The project area (roughly bounded by Big Walnut Creek at the west, Sycamore Run at the east, Heil Drive at the north and Friendship Park at the south) includes approximately 150 miles of sewers with original construction dates as early as 1939. The scope of services for the project includes data review, field investigations, sewer cleaning / televising, lift station assessment, hydraulic modeling and sewer system capacity analysis.

# SS-24-01 - Gahanna Lincon High School Capacity Improvements

Start Year: 2023  
Project Created: January-23  
Last Updated: August-24

**Project Priority:** 1 Imperative  
**Projected Cost:** \$400,000 Est.  
**Duration:** 24 Months  
**Current Status:** Planning & Assessment

**Project Type:** Utilities  
**Project Category:** Sanitary Sewers  
**Project Area:** Central Corridor  
**Project Completion:** Dec-23

## Project Overview:

During the City's review of plans for the new Gahanna Lincoln High School project, issues with the receiving sanitary sewer system became apparent. These issues include conflicts with commercial structures and capacity concerns with the existing sewers. Based on preliminary analysis, an engineering assessment followed by design and construction of improvements is recommended. The location of improvements is the existing sanitary sewer system beginning at Hamilton Rd and continuing westward across Rocky Fork Creek (total distance of approximately 1,700-ft). These existing sewers range in size from 8-inch to 12-inch pipe.

# SS-23-01 - Storm Sewer Improvements

Start Year: 2023  
 Project Created: January-23  
 Last Updated: August-24

**Project Priority:** CM Capital Maintenance  
**Projected Cost:** Annual  
**Duration:** 12 Months  
**Current Status:** Planning & Assessment

**Project Type:** Utilities  
**Project Category:** Storm Sewer  
**Project Area:** Citywide  
**Project Completion:** On Going

## Project Overview:

Gahanna is responsible for 115 miles of storm sewers, 2,767 catch basins, 2,922 curb inlets, 2,067 storm manholes, 762 outfalls, and 35 water quality structures. This project creates a program for maintaining the stormwater collection system which ensures the safe and reliable conveyance of stormwater. The project includes items such as dredging stormwater ponds, stabilizing creek banks, minor storm rehab projects, and small storm sewer extensions. This program will also establish an inspection and cleaning process for 20% of the City's storm sewer infrastructure each year beginning in 2023.

## Next Steps\Update:

As projects are identified this project will be broken out into individual project.

## SW-CM-02 - CCTV Program

Start Year: 2023  
 Project Created: January-23  
 Last Updated: August-24

**Project Priority:** 1 Imperative  
**Projected Cost:** Annual  
**Duration:** 12 Months  
**Current Status:** Planning & Assessment

**Project Type:** Utilities  
**Project Category:** Storm Water  
**Project Area:** Citywide  
**Project Completion:** On Going

**Project Overview:**

Gahanna is responsible for 115 miles of storm sewers, 2,767 catch basins, 2,922 curb inlets, 2,067 storm manholes, 762 outfalls, and 35 water quality structures. This project creates a program to capture video from inside storm sewers(CCTV). The project will help identify issues within the system that will need inventoried and prioritized so that they can be addressed in subsequent years. This proactive approach will help ensure the overall health of the storm water system. Each piece of the system should be inspected and assessed through this program on a 10 year cycle.

## SW-21-01 - E. Johnstown Drainage Improvements

Start Year: 2022  
 Project Created: January-22  
 Last Updated: August-24

**Project Priority:** 1 Imperative  
**Projected Cost:** \$488K  
**Duration:** 12 Months  
**Current Status:** Construction & Inspection

**Project Type:** Utilities  
**Project Category:** Storm Water  
**Project Area:** Central Corridor  
**Project Completion:** July-23

**Project Overview:**

This stormwater project includes significant roadside grading improvements and the installation of approximately 500-ft of new 18-inch and 24-inch storm sewer piping to resolve a long-standing drainage issue that could not be corrected with private, on-site improvements. The project site is E Johnstown Road near Larry Lane.

# W-CM-01 - Water System Improvements

Start Year: 2023  
 Project Created: January-23  
 Last Updated: February-23

**Project Priority:** CM Capital Maintenance  
**Projected Cost:** Annual  
**Duration:** 12 Months  
**Current Status:** Planning & Assessment

**Project Type:** Utilities  
**Project Category:** Water  
**Project Area:** Citywide  
**Project Completion:** On Going

## Project Overview:

The City manages a complex network of water infrastructure located throughout the city. This project creates a program for maintaining the water system and ensuring the safe and reliable conveyance of potable water to the residents and businesses. The project includes items such as the replacement of water mains, addresses identified capacity issues, rehabbing zone valves, and addresses issues with an aging infrastructure. Planning and programming for an annual rehab and replacement of the system is critical to ensuring the system is being maintained and managed appropriately.

# W-CM-02 - Fire Hydrant Replacement

Start Year: 2023  
 Project Created: January-23  
 Last Updated: May-23

**Project Priority:** CM Capital Maintenance  
**Projected Cost:** Annual  
**Duration:** 12 Months  
**Current Status:** Planning & Assessment

**Project Type:** Utilities  
**Project Category:** Water  
**Project Area:** Citywide  
**Project Completion:** On Going

## Project Overview:

The City manages a complex network of water infrastructure along with 1,750 fire hydrants. This project creates a program for replacing fire hydrants that have either reached or are reaching their useful life. This ensures the safe and reliable operation of these hydrants when the need arises. The useful life of a hydrant is approximately 50 years. Planning and programming for an annual replacement of hydrants is critical to ensuring they are in proper working order.

 Southwind Drive - 3 Hydrants Replaced - \$18,000

## SS-22-1402 - Water Tower Rehabilitation

Start Year: 2022  
 Project Created: January-22  
 Last Updated: August-24

**Project Priority:** 1 Imperative  
**Projected Cost:**  
**Duration:**  
**Current Status:** Construction & Inspection

**Project Type:** Utilities  
**Project Category:** Water  
**Project Area:** Citywide  
**Project Completion:** December-23

**Project Overview:**

A thorough inspection of the tower in June of 2018 revealed some deficiencies on both the interior and exterior of the tank that should be completed in the next three to four years. These repairs and upgrades include abrasive blast cleaning, exterior and interior recoating with polyurethane and epoxy systems, and miscellaneous hatch, pipe, handrail, roof vent, and ladder repairs and/or replacement.

# W-20-1401 - Claycraft Rd Waterline Replacement

Start Year: 2022  
 Project Created: January-22  
 Last Updated: August-24

**Project Priority:** 1 Imperative  
**Projected Cost:** \$3.5M  
**Duration:** 36 Months  
**Current Status:** Utility Relocation\Clearance

**Project Type:** Utilities  
**Project Category:** Water  
**Project Area:** South Gateway  
**Project Completion:** December-23

## Project Overview:

Replace approximately 4,100 feet of 12-inch waterline from Morrison Rd to Taylor Station Rd. This line is one of the main source feeds to the water tower and serves some of the City's largest water consumers in the Industrial Area. Originally constructed in 1968, this main has experienced four (4) breaks since 2016 which caused water outages to residents and some of the biggest industrial users. request has been updated to cover the replacement of the entire transmission line that was installed in 1968.

## W-22-01 - Havens Corners Waterline Replace

Start Year: 2021  
 Project Created: January-22  
 Last Updated: August-24

**Project Priority:** 1 Imperative  
**Projected Cost:** \$2.4M  
**Duration:** 36 Months  
**Current Status:** Construction & Inspection

**Project Type:** Utilities  
**Project Category:** Water  
**Project Area:** Central Corridor  
**Project Completion:** August-24

**Project Overview:**

This waterline replacement project consists of the installation of approximately 3,300-ft of new 12-inch water main and 550-ft of new 6-inch water main. The new mains will be installed along the south side of Havens Corners Road, between Oak Creek Place and Helmbright Drive, as well as St. Stephens Court and St. Martin Court. Existing water infrastructure in the project area has been subject to frequent main breaks due to the age of the existing piping (originally installed in 1961).

**Next Steps\Update:**

A construction contract was awarded in May 2023 and all work is scheduled to be completed by the summer of 2024.

# W-23-1401 - Water Distribution Planning Study - Zone 2

Start Year: 2023

Project Created: July-23

Last Updated: July-23

Project Priority: 1 Imperative

Projected Cost: \$100K

Duration: 6 Months

Current Status: Planning & Assessment

Project Type: Utilities

Project Category: Water

Project Area: South Corridor

Project Completion: January-24

Project Overview:

The City has the need to study the water distribution system in Zone 2 (Industrial Park Area). This study would identify nessusary improvements in meeting future demands for potential high usage users\development. The services sought under this Request for Proposals (RFP) include data review, booster station evaluations, hydraulic modeling, conceptual planning of water distribution improvements, development of planning-level cost estimates.

W-24-01 - Taylor Road Waterline Replace

Start Year:2024

Project Created:January-24

Last Updated:August-24

Project Priority:1Imperative

Projected Cost:\$3.3M

Duration:36 Months

Current Status:Design & Permitting

Project Type:Utilities

Project Category:Water

Project Area:South Gateway

Project Completion:August-26

Project Overview:

This waterline replacement project consists of the installation of approximately 3,300-ft of new 16-inch water main. The new mains will be installed along the south side of Taylor Road, between Morrison Road and Helmbright Drive. Existing water infrastructure in the project area has been subject to frequent main breaks due to the age of the existing piping (originally installed in 1964). This line also serves the pump station on the corner of Helmbright Drive which feeds the water tower. Increasing the capacity of the line will increase the efficiency of the pump station.

### Next Steps\Update:

This project will be further scoped. Larger projects that exceed \$50,000 threshold will be cataloged individually and reduced from this total. Smaller projects that meet the Capital Improvement definition will be completed under this heading and listed herein.

# PK-22-081 - Academy Park Mountain Bike Trail

Start Year: 2022  
Project Created: January-22  
Last Updated: March-23

**Project Priority:** 3 Important  
**Projected Cost:** \$250K  
**Duration:** 24 Months  
**Current Status:** Construction & Inspection

**Project Type:** Parks & Recreation  
**Project Category:** Park Renovation  
**Project Area:** Parks  
**Project Completion:** December-24

## Project Overview:

With the support of a resident group, Central OH Mountain Biking Organization (COMBO) and local businesses, Academy Park has been identified as a site for a mountain bike trail. The site has recognized some challenges while being an old dumping site from the Columbus water treatment plant. Lovingly referred to as the sludge field, this space is the residual effect of the water treatment plant. MORPC awarded the City with a brownfield assessment grant to study the environmental impacts and viability of the intended development. The City entered into contract with the American Ramp Company to design and build the Mountain Bike Trail. The trail is expected to begin and be completed by the end of 2023.

## Next Steps\Update:

American Ramp Company has delivered the final alignment of the trail. In coordination with the resident group, the City has approved the alignment. American Ramp Company has submitted the local floodplain permits in an effort to secure a timeline for construction.

# PK-22-02 - Price Road House Renovations

Start Year: 2022  
 Project Created: January-22  
 Last Updated: March-23

**Project Priority:** 2 Essential  
**Projected Cost:** \$675,000  
**Duration:** 36 Months  
**Current Status:** Design & Permitting

**Project Type:** Parks & Recreation  
**Project Category:** Park Renovation  
**Project Area:** Parks  
**Project Completion:** December-24

## Project Overview:

In 2010 the City acquired a residential property located at 94 Price Rd. In addition to the property being surrounded by over 40 acres of city park land, the property also has a 3,000 square foot outbuilding that is used for storage. The City is transforming the property to allow for much needed indoor programming space as well as provide an additional rentable location for the community. Equipment such as tables and chairs, shelving, storage, and electronic features will be needed to operate and secure the facility.

## Next Steps\Update:

MA Architects are finalizing construction documents to prepare for a formal bid. Bid Opening was held 8/17/23.

# PK-23-02 - Park Entrance Signs Replacement

Start Year: 2022  
Project Created: January-22  
Last Updated: August-24

**Project Priority:** CM Capital Maintenance  
**Projected Cost:** \$139,000  
**Duration:** 36 Months  
**Current Status:** Construction & Inspection

**Project Type:** Parks & Recreation  
**Project Category:** Park Renovation  
**Project Area:** Parks  
**Project Completion:** December-25

## Project Overview:

The park entrance signs, kiosks and instructional signage are showing their age and in many cases, falling apart. These funds will be used to replace and enhance the visual appearance and improve education in the parks and facilities.

Projected Cost	Encumbered	2023	2024	2025	2026	2027 - 2031	2032 - 2042	Totals

# PK-24-08 Friendship Pk - Pickleball & Basketball Fencing

Start Year: 2024

Project Created: January-23

Last Updated: March-23

Project Priority: CM Capital Maintenance

Projected Cost: \$60,000

Duration: 12 months

Current Status: Design & Permitting

Project Type: Parks & Recreation

Project Category: Park Renovation

Project Area: Parks

Project Completion: December-24

## Project Overview:

The fence that surrounds the pickleball and basketball courts at Friendship Park is in disrepair. This project will replace the fence.

## Next Steps\Update:

PK-24-09 Action Sports Park

Start Year: 2024  
Project Created: January-23  
Last Updated: August-24

Project Priority:	2	Essential
Projected Cost:	\$1,275,000	
Duration:	24 months	
Current Status:	Planning & Assessment	

Project Type:	Parks & Recreation
Project Category:	Park Renovation
Project Area:	Parks
Project Completion:	December-25

Project Overview:

The skate park and roller rink at Shull Park are at the end of their life. The existing location is not ideal for a replacement due to the frequent flooding and buildup of sediment on the play surfaces. This project would relocate and reimagine the skate park into an actions sports park that meet the current trends for these recreation activities. This project would include a pump track and bike park, among other action amenities at Lower McCorkle Park.

Next Steps\Update:

[Update]  
The removal of the existing skate park at Shull Park is included in this project worksheet.

# PK-24-10 Woodside Green Pond Rebuild

Start Year: 2024

Project Created: January-23

Last Updated: March-23

Project Priority:	CM    Capital Maintenance	Project Type:	Parks & Recreation
Projected Cost:	\$500,000	Project Category:	Park Renovation
Duration:	12 months	Project Area:	Parks
Current Status:	Planning & Assessment	Project Completion:	December-24

Project Overview:

The Woodside Green pond has become too shallow due to the buildup of sediment over time. The pond is in desperate need of dredging to improve the water quality. An expanded service of an observation deck will also be included with this project.

Projected Cost	Encumbered	2023	2024	2025	2026	2027 - 2031	2032 - 2042	Totals

Next Steps\Update:

# PK-24-12 Academy Park - Baseball Field Fencing

Start Year: 2024  
Project Created: Aug-24  
Last Updated: Sep-23

Project Priority:	1 Imperative	Project Type:	Parks & Recreation
Projected Cost:	\$70,000	Project Category:	Park Renovation
Duration:	6 months	Project Area:	Parks
Current Status:	Planning & Assessment	Project Completion:	May-24

## Project Overview:

Due to the layout of the minor league baseball\softball fields at Academy Park, there is s safety issue when foul balls flying into the opposing spectator area and field. Protective fencing\screening will be added to extend the overall height of the existing fencing down the first & third base lines to reduce (not eliminate) the risk.

# PK-25-081 Academy Park - Mountain Bike Trail Head

Start Year: 2024  
Project Created: January-23  
Last Updated: August-24

Project Priority:	3 Important	Project Type:	Parks & Recreation
Projected Cost:	\$175,000	Project Category:	Park Renovation
Duration:	12 months	Project Area:	Parks
Current Status:	Planning & Assessment	Project Completion:	December-25

## Project Overview:

Academy Park will be home to the City of Gahanna's only mountain bike trail by the end of 2023. The trail will be used by community members of all ages and expected to be frequented by visitors of the sport. A trail head will allow for trail riders and park visitors to rest, rehydrate and gather. The trail head will also be the main hub to provide trail riders with directional and safety information.

## Next Steps\Update:

[Update] This project and associated funding was advanced into 2024 to accommodate a grant award and required schedule.

## PK-25-084 Shull Park Redesign

Start Year: 2025  
Project Created: January-23  
Last Updated: March-23

**Project Priority:** 3 Important  
**Projected Cost:** \$1,250,000  
**Duration:** 24 months  
**Current Status:** Planning & Assessment

**Project Type:** Parks & Recreation  
**Project Category:** Park Renovation  
**Project Area:** Parks  
**Project Completion:** December-26

**Project Overview:**

The existing skate park and hockey rink will not remain at Shull Park. The location of the park presents an opportunity to provide infrastructure for outdoor programming and improved athletic fields.

**Next Steps\Update:**

# PK-26-081 Lower McCorkle Park Restroom Facility

Start Year: 2026

Project Created: January-23

Last Updated: March-23

Project Priority:	3	Important	Project Type:	Parks & Recreation
Projected Cost:	\$250,000		Project Category:	Park Renovation
Duration:	12 months		Project Area:	Parks
Current Status:	Planning & Assessment		Project Completion:	December-26

Project Overview:

This project would build a permanent restroom facility to service the Lower McCorkle location. Currently, this is being serviced by a portable restroom and is often used by golf participants, trail users and McCorkle Park visitors. The Parks Master Plan identifies the residents need for permanent restroom facilities in high use park areas.

# PK-CM-03 Asphalt Maintenance

Start Year: 2023

Project Created: January-22

Last Updated: August-24

Project Priority:	CM    Capital Maintenance	Project Type:	Parks & Recreation
Projected Cost:	\$300,000	Project Category:	Surfaces
Duration:		Project Area:	Parks
Current Status:	Construction & Inspection	Project Completion:	On Going

Project Overview:

Parking lots, trails, and other parks surfaces periodically require sealing, crackfilled, restriped and/or repaired over the course of their useful life. This preventative maintenace expendse the useful life of these surfaces.

PK-22-01 - Big Walnut Trail Section 8

Start Year: 2021  
Project Created: January-21  
Last Updated: August-24

Project Priority:	2 Essential	Project Type:	Parks & Recreation
Projected Cost:	\$2,331,781	Project Category:	Trails
Duration:	4 Years	Project Area:	Neighborhoods
Current Status:	Planning & Assessment	Project Completion:	December-26

Project Overview:

This project is the eighth and final phase of the regional, Big Walnut Trail in the City of Gahanna. The existing Big Walnut Trail travels from Gahanna’s northern boundary of Morse Rd south through for approximately 4.6 miles to Rocky Fork Drive. This three city, joint effort would have a huge impact for thousands of people who live within the walkshed of the regional trail. The project requires close coordination with the Hamilton Road bridge project. The bridge is incorporated into the final multi-use trail alignment. ODOT and the City of Gahanna have identified the bridge component of the trail, a separate project.

\*Grant opportunity exists. Application to be submitted in 2024

Next Steps\Update:

[Update] With the strat of construction of the Hamilton Road\I-270 bridge this project is technically in the construction phase. The completion of the bridge work is the first phase of realizing this project in full.

# PK-23-01 - Link to Literacy Trail

Start Year: 2023  
 Project Created: January-22  
 Last Updated: August-24

**Project Priority:** 2 Essential  
**Projected Cost:** \$1,600,000  
**Duration:** 24 Months  
**Current Status:** Design & Permitting

**Project Type:** Parks & Recreation  
**Project Category:** Trails  
**Project Area:** Neighborhoods  
**Project Completion:** December-25

## Project Overview:

The Link to Literacy Trail project includes two waterway crossings with a 10' wide multi-use trail to provide pedestrian and bicycle access to the newly constructed Columbus Metropolitan Library. The project will replace a deficient timber structure that crosses Sycamore Run Creek. The project will also include a prefabricated steel pedestrian truss to create a non-existing crossing over Rocky Fork Creek.

## Next Steps\Update:

[Update] Easement and trail alignments are being finalized.

Application for Clean OH Trails and Recreational Trails Grant was completed on April 17, 2023. Award from the State of Ohio was made in December 2023 for \$500,000.

# PK-23-04 - Price Parking Lot Replacement

Start Year: 2023

Project Created: January-21

Last Updated: March-23

Project Priority:	2 Essential	Project Type:	Parks & Recreation
Projected Cost:	\$341,356	Project Category:	Parking Lots
Duration:	24 Months	Project Area:	Parks
Current Status:	Design & Permitting	Project Completion:	December-24

### Project Overview:

The City acquired a residential property at 94 Price Road as it is surrounded by over 40 acres of city owned parkland. The home is being renovated to provide a location for indoor programming and rentable community space. With the updated use of the building, the parking lot needs to be replaced and expanded to meet programming needs and zoning requirements.

Next Steps\Update:

OHM is drafting a proposal for surveying and design through CDs. We would like to bid by summer for Fall construction.

# PK-24-04 - Golf Course Cart Path

Start Year: 2024

Project Created: January-21

Last Updated: March-23

Project Priority: 2 Essential

Projected Cost: \$405,000

Duration: 24 Months

Current Status: Design & Permitting

Project Type: Parks & Recreation

Project Category: Trails and Parking Lots

Project Area: Parks

Project Completion: December-24

Project Overview:

The cart part is an essential compnent of the golf operation due to the course's location in the floodway. The path has been pieced together over the last few decades. All funding has been utilized to complete the path and no maintenace has been completed. The path needs a complete replacement.

# PK-24-06 - Hannah to Headley Trail Connector Trail

Start Year: 2023  
Project Created: October-23  
Last Updated: October-23

**Project Priority:** 2 Essential  
**Projected Cost:** \$836,500  
**Duration:** 24 Months  
**Current Status:** Design & Permitting

**Project Type:** Parks & Recreation  
**Project Category:** Trails and Parking Lots  
**Project Area:** Parks  
**Project Completion:** December-25

## Project Overview:

Hannah and Headley Parks are in close proximity to each other and located next to residential neighborhoods. Today, there is not a safe way for pedestrians to commute to these park locations. This project would connect these two community resources with a safe and accessible route between the two.

Projected Cost	Encumbered	2023	2024	2025	2026	2027 - 2031	2032 - 2042	Totals
Duration (in months)

# PK-26-03 - E Johnstown Trail

Start Year: 2021  
 Project Created: January-21  
 Last Updated: August-24

**Project Priority:** 2 Essential  
**Projected Cost:** \$317,500  
**Duration:**  
**Current Status:** Planning & Assessment

**Project Type:** Parks & Recreation  
**Project Category:** Trails  
**Project Area:** North Gateway  
**Project Completion:**

## Project Overview:

This project will construct 1,300 feet of multi-use trail that will create a completed pedestrian connection between the adjacent subdivisions, YMCA, and skilled nursing facilities along East Johnstown Road between Riva Ridge Boulevard and YMCA Place.

## Next Steps\Update:

[Update] This project is being moved and resources returned to the Capital Fund. This project needs to be completed in coordination with any transportation improvement along E. Johnstown Road which will be identified as a result of the Thoroughfare Plan.

# PK-27-01 Friendship Park Parking Lot Replacement

Start Year: 2026

Project Created: January-21

Last Updated: March-23

Project Priority: CM Capital Maintenance

Projected Cost: \$330,000

Duration: 12 Months

Current Status: Planning & Assessment

Project Type: Parks & Recreation

Project Category: Trails and Parking Lots

Project Area: Parks

Project Completion: December-26

Project Overview:

The parking lot at Friendship Park is well beyond repair and is need of full replacement. The replacement will also allow a redesign of the lot to improve and maximize the space.

# PK-24-01 Aquatic Assessment/Facilities Plan

Start Year: 2024

Project Created: January-23

Last Updated: August-24

Project Priority:	1 Imperative	Project Type:	Parks & Recreation
Projected Cost:	\$60,000	Project Category:	Pool Infrastructure
Duration:	1 year	Project Area:	Parks
Current Status:	Planning & Assessment	Project Completion:	Dec-24

### Project Overview:

The Parks Master Plan identifies improved aquatic facilities as a priority for Gahanna residents. This includes the potential addition of an indoor aquatics facility and other aquatics related amenities. This assessment would provide the City with a plan on how to address aging facilities while identifying potential future improvements.

# FA-20-1401 - Creekside Flood Mitigation & Plaza Imp.

Start Year: 2020  
Project Created: January-22  
Last Updated: February-23

<b>Project Priority:</b>	1 Imperative	<b>Project Type:</b>	Facilities
<b>Projected Cost:</b>	\$10M	<b>Project Category:</b>	Accessory Structures
<b>Duration:</b>	60 Months	<b>Project Area:</b>	Downtown
<b>Current Status:</b>	Planning & Assessment	<b>Project Completion:</b>	

## Project Overview:

The City's maintenance complex, located on Oklahoma Avenue, was constructed in the 1960s. This complex is home to the Service and Parks Departments. This facility is inadequate for the needs of the City. Many of the structures are past their useful life and in disrepair. Much of the city's equipment for both departments does not have adequate shelter and is stored outdoors in the elements. A modernized 60,000 sq foot facility located on approximately 12 acres would require the facility to be located to another location in the city.

## Next Steps\Update:

In 2023 this project entered the design phase for both the flood mitigation and plaza improvements. A public engagement process will be conducted to gather community input on the types of improvements they would like to see in a plaza redesign. Design work is expected to take approximately 18 months and construction to begin immediately following.

**Project Completion:** Dec-25

**Project Overview:**

City facilities have long been identified as being inadequate to meet operational needs for service delivery. The property located at 825 Tech Center Drive was identified as an ideal property and building to address the needs for police headquarters, city hall and the senior center. 825 Tech Center Drive is a vacant 100,000 square foot Class A office building on approximately 8 acres. The city would renovate the existing facility and build an additional 31,000 square feet. This newly envisioned complex has the capacity to co-locate all City services currently located on South Hamilton Road for decades to come.

**Next Steps\Update:**

In September of 2022 the City acquired 825 Tech Center Drive for the purchase price of \$8.75 million. The design of the renovation and expansion of the facility began in November. The design process is to conclude in fall of 2023 with construction immediately following. Construction is estimated to take approximately 12 months and the City is anticipating moving into the facility in December 2024 or early 2025.

# FA-23-1401 - Parks & Service Maintenance Complex

Start Year: 2023  
Project Created: January-22  
Last Updated: May-23

<b>Project Priority:</b>	1 Imperative	<b>Project Type:</b>	Facilities
<b>Projected Cost:</b>	\$12-\$15 Million	<b>Project Category:</b>	City Buildings
<b>Duration:</b>	36 Months	<b>Project Area:</b>	
<b>Current Status:</b>	Planning & Assessment	<b>Project Completion:</b>	

## Project Overview:

The City's maintenance complex, located on Oklahoma Avenue, was constructed in the 1960s. This complex is home to the Service and Parks Departments. This facility is inadequate for the needs of the City. Many of the structures are past their useful life and in disrepair. Much of the city's equipment for both departments does not have adequate shelter and is stored outdoors in the elements. A modernized 60,000 sq foot facility located on approximately 12 acres would require the facility to be located to another location in the city.

## Project Overview:

Specialized pieces of equipment are used in many of the department that perform maintenance functions on behalf of the City. This equipment is generally smaller in profile then heavy equipment and are used to perform specific functions such as landscaping. Examples of equipment that would be funded through this project would be landscaping equipment, golf course maintenance equipment and other related pieces of specialty equipment. As the process for evaluating and rating equipment for replacement equipment will be programed by year so known costs can be annualized, prioritized, and strategically addressed.

## Project Overview:

Previously known as the Police Equipment Replacement Program this project has been update to capture the nature of the equipment being procured through this project. This project has largely been used to purchase police cruiser and other vehicles that support the police operation. Included in these costs are the outfitting of each vehicle with the nessusary equipment to perform the police function. For example, radio equipment, lights & sirens, police markings, cameras and other IT technology. Evaluating and rating equipment for replacement will be programed by year so known costs can be annualized, prioritized, and strategically addressed.

# FL-25-083 Golf Cart Replacement

Start Year: 2025  
Project Created: January-23  
Last Updated: March-23

**Project Priority:** 3 Important  
**Projected Cost:** \$120,000  
**Duration:** 12 months  
**Current Status:** Planning & Assessment

**Project Type:** Parks & Recreation  
**Project Category:** Park Renovation  
**Project Area:** Parks  
**Project Completion:** December-25

## Project Overview:

The fleet of golf carts are at the end of their useful life. The carts have begun to need more repairs and have caused delays in service to remedy. This request would be a replacement of 29 golf carts used by residents and guests of the golf course.

# EQ-22-01 - Police Radio Equipment Replacement

Start Year: 2022  
 Project Created: January-22  
 Last Updated: May-23

<b>Project Priority:</b>	1 Imperative	<b>Project Type:</b>	Equipment
<b>Projected Cost:</b>	\$765,000	<b>Project Category:</b>	Public Safety Equip
<b>Duration:</b>	24 Months	<b>Project Completion:</b>	Dec-23
<b>Current Status:</b>			

## Project Overview:

Reliable, durable, and interoperable radio communications are essential to the City's public safety mission. Portable and mobile radios have a finite life expectancy. Planned replacement must occur every 6-8 years to maintain reliability and compatibility with the State of Ohio's Multi-Agency Radio Communications System (MARCS) to which the City subscribes. The Division will begin the replacement of portable radios in late 2023 and should conclude the process by the end of the year. This project also has funding to replace radios utilized by the Parks & Recreation and Service Department Crews.

## Next Steps\Update:

The cost of subscriber fees paid to the State of Ohio for radio connectivity for all City radios is included in the Division's annual operating budget. Radio replacements are timed to maximize available incentives and grant funding opportunities are sought if\when available.

# EQ-24-01 - Brine Machine for Snow & Ice

Start Year: 2024  
Project Created: July-23  
Last Updated: July-23

**Project Priority:** 2 Essential  
**Projected Cost:** \$110K  
**Duration:** 12 Months  
**Current Status:** Base Equipment Cost

**Project Type:** Equipment  
**Project Category:** Streets  
**Project Completion:** Dec-24

## Project Overview:

The mixing and storage of brine that is used to pretreat roads prior to impending snow and ice events is critical to responding to these events. Currently the Public Service Department acquires brine from the City of Whitehall and other neighboring municipalities. This requires multiple staff and equipment travel to these locations to load the brine. To properly pretreat roads this often requires multiple trips. The addition of a brine mixing facility at our Public Service garage is critical to better managing snow and ice events. This equipment and small shed-like structure would be relocated to a new Service Complex once constructed.

# EQ-22-1405 - Electric Vehicle Charging Stations

Start Year: 2022  
Project Created: January-22  
Last Updated: August-24

Project Priority:	1 Imperative	Project Type:	Equipment
Projected Cost:	\$750K	Project Category:	Sustainability
Duration:	24 Months	Project Completion:	Dec-25
Current Status:			

## Project Overview:

This project would see the continued placement of electric charging stations throughout the City and support the growing market need for this level of service. Regional grant opportunities and other funding mechanisms are being sought. The request would be for the City to contribute up to 20% - 40% match towards the project(s). These stations would be located on public property throughout the City.

Total	\$30,000	\$0	\$970,000	\$60,000	\$0	\$0	\$0	\$1,060,000

## Next Steps\Update:

[Update] Our MORPC reapplied for the grant in early summer 2024. The project also includes a 2025 allocation to upgrade our existing chargers to bring uniformity throughout the city.

In coordination with MORPC the City of Gahanna has applied to be included in their application to the US Department of Transportation Charging & Fueling Infrastructure Grant Program. If funded the city would install 4 Level 2 and 4 Level 3 charging station at 825 Tech Center Dr as part of the building renovation and expansion project. It is

# EQ-25-01 - Dispatch Workstations

Start Year: 2025

Project Created: June-25

Last Updated: August-24

Project Priority:	1 Imperative	Project Type:	Equipment
Projected Cost:	\$185K	Project Category:	Public Safety
Duration:	12 Months	Project Completion:	Dec-25
Current Status:	Base Equipment Cost		

Project Overview:

Dispatch workstations are a nessesity in the Communications Center being constrcuted at 825 Tech Center Drive. These workstations are very specialized and can be of considerable cost. The expense of these workstations was not included as part of the FFE budget for the 825 project. This project adds 7 workstations into the 825 Communciation Center.

# EQ-25-01 - Emergency Alert Sirens

Start Year: 2025

Project Created: April-24

Last Updated: August-24

Project Priority:	1	Imperative	Project Type:	Equipment
Projected Cost:	\$175K		Project Category:	Emergency Management
Duration:	24 Months		Project Completion:	Dec-25
Current Status:				

Project Overview:

The City owns and is responsible for the maintenance of the tornado sirens that operate in conjunction with the Franklin County’s Emergency Management Agency (EMA). Throughout Franklin County there are 198 outdoor warning sirens with six located within Gahanna’s boundaries. The Department of Public Safety manages emergency management functions for the City including operational contracts with EMA. This project funds the replacement of this critical infrastructure and keeps the city and it's residents connected to the broader EMA-managed outdoor siren system.

# TE-YR-01 - Fiber Optic Network Expansion & Red.

Start Year: 2022  
Project Created: January-22  
Last Updated: January-23

**Project Priority:** 1 Imperative  
**Projected Cost:**  
**Duration:** Annual  
**Current Status:** Planning & Assessment

**Project Type:** Technology  
**Project Category:** Fiber Optic Network  
**Project Area:** City Wide  
**Project Completion:** Annual

## Project Overview:

There is currently 115,759 feet or 21.9 miles of fiber optic cable that makes up the Gahanna Fiber Network, also known as G-NET. Our current fiber-optic infrastructure has grown to serve public purpose, support economic development, and meet business needs. By strategically evaluating our current entire fiber-optic network for integrity and redundancy, we will identify and begin to eliminate our single points of failure thereby strengthening our network. This network is managed by a coordinated body made up from various city departments. Specific projects that support the expansion and redundancy mission of this program will be identified, planned, and prioritized by this coordinating body.

## Next Steps\Update:

In addition to this project being utilize for Capital Maintence, the coordinating body is in the process of identifying a number of projects that will be prioritized and completed in the coming years. These include; Trunk 4 Capacity Improvements, City Campus Redesign & Vacation Planning, 825 Tech Center Dr Diversity & Redundancy. Each of these projects once prograded, planned, and budgeted will be separated from this project and reported in the CIP as individual items.

# TE-22-701 - Big Walnut Fiber Optic Loop

Start Year: 2022  
Project Created: January-22  
Last Updated: May-23

<b>Project Priority:</b>	1 Imperative	<b>Project Type:</b>	Technology
<b>Projected Cost:</b>	\$593,145	<b>Project Category:</b>	Fiber Optic Network
<b>Duration:</b>	18 Months	<b>Project Area:</b>	North Gateway
<b>Current Status:</b>	Construction & Inspection	<b>Project Completion:</b>	Jul-23

## Project Overview:

The Big Walnut Fiber Optic Loop is a expansion project that will connect the west portions of the network with trunk lines that run through the north\central portion of the city. This project will create redundant and divers pathways for communications to run. This is critical given the number of public safety facilities that utilize the network for their daily operations. This project eliminates single points of failure within the network and bolster the networks reliability and overall ability to minimize the impacts of potential outages.

## Next Steps\Update:

In 2022 the Big Walnut Fiber Loop project was begun. This project is anticipated to be completed in the spring or early summer of 2023. Once the main construction is completed the City will plan to connect major intersections into the traffic network.

# TE-23-701 - 400 W. Johnstown Lateral Improvements

Start Year: 2022  
Project Created: March-23  
Last Updated: May-23

**Project Priority:** 1 Imperative  
**Projected Cost:** \$49,370  
**Duration:** 6 Months  
**Current Status:** Planning & Assessment

**Project Type:** Technology  
**Project Category:** Fiber Optic Network  
**Project Area:** North Gateway  
**Project Completion:** Dec-23

## Project Overview:

There are a number of fiber optic connection into the Mifflin Township facility located at 400 West Johnstown Road. These connections are utilized by various public safety agencies for emergency communication purposes. The fiber laterals that service the facility are low on capability. This project would install 48 additional fibers into the facility increasing this capacity to meet future needs.

**Project Completion:** On-going

## Project Overview:

Lifecycle replacement of our networking equipment is critical. These devices are necessary to provide even basic levels of IT connectivity. Access layer switches provide network connectivity for all servers and endpoints at each city operated location. Core switches function as the backbone for the City's core networking infrastructure. These switches provide network capabilities to our access layer switches, thereby providing complete networking capabilities. Firewall and Wi-Fi networking equipment is also replaced as part of this project. Standard lifecycle for this equipment is 5-6 years depending on manufacturer support and equipment reliability. By replacing these devices proactively we mitigate our risk of unplanned network outages and security vulnerabilities.

Projected Cost	Encumbered	2023	2024	2025	2026	2027 - 2031	2032 - 2042	Totals
Duration (in months)		12 Months						30 Months
Base Equipment Cost			\$300,000			\$300,000		\$600,000
Options & Accessories								\$0
Delivery & Implementation								\$0
								\$0
								\$0
								\$0
Totals	\$0	\$0	\$300,000	\$0	\$0	\$300,000	\$0	\$600,000

## Funding Sources:

Capital Improvement Fund			\$300,000			\$300,000		\$600,000
								\$0
								\$0
								\$0
								\$0
Total	\$0	\$0	\$300,000	\$0	\$0	\$300,000	\$0	\$600,000

## Next Steps\Update:

Our network infrastructure was upgraded with the moving of our communication center in 2022, that equipment will be due for upgrade in 2027. Networking equipment at City Hall is due for replacement in 2024 we have chosen to incorporate these upgrades into the 825 Tech Center Drive project.

# TE-26-750 - Server Lifecycle Replacement

Start Year: 2026  
Project Created: January-23  
Last Updated: May-23

Project Priority:	1	Imperative	Project Type:	Technology
Projected Cost:	\$125,000		Project Category:	Technology Infrastructure
Duration:	12 Months		Project Completion:	
Current Status:				

## Project Overview:

Lifecycle replacement of our server infrastructure is critical. This equipment is necessary to provide even basic levels of IT service to each department within the City. The city operates from 2 locations ensure failover capabilities of these resources. As cloud based technologies become more prolific it does reduce the City's need for on-premises server resources. However, given the public safety functions, server infrastructure is still considered critical. As 2026 approaches this project will be sized appropriately and potential cost shifting (to cloud services) may be desirable. Standard lifecycle for this infrastructure 5-6 years depending on manufacturer support and equipment reliability.

Projected Cost	Encumbered	2023	2024	2025	2026	2027 - 2031	2032 - 2042	Totals
Duration (in months)	12 Months							
Base Equipment Cost					\$125,000			\$125,000
Options & Accessories								\$0
Delivery & Implementation								\$0
								\$0
								\$0
								\$0
Totals	\$0	\$0	\$0	\$0	\$125,000	\$0	\$0	\$125,000

## Funding Sources:

Capital Improvement Fund	\$24,000				\$125,000			\$149,000
								\$0
								\$0
								\$0
								\$0
Total	\$24,000	\$0	\$0	\$0	\$125,000	\$0	\$0	\$149,000

## Next Steps\Update:

Our server infrastructure was upgraded in 2021 and 2022. Given the nature of our configuration and remaining life moving these resources to 825 Tech Center Dr will be planned to minimize the downtime.

# TE-27-750 - Storage Network Lifecycle Replacement

Start Year: 2027  
Project Created: January-23  
Last Updated: May-23

**Project Priority:** 1 Imperative  
**Projected Cost:** \$300,000  
**Duration:** 12 Months  
**Current Status:**

**Project Type:** Technology  
**Project Category:** Technology Infrastructure

**Projected Cost:** \$300,000  
**Duration:** 18 Months  
**Current Status:**

**Project Type:** Technology  
**Project Category:** Systems & Applications  
**Project Completion:** On-going

## Project Overview:

In 2021 the Administration began the process of implementing CityWorks an asset management system that tracks Service Requests, Work Orders, and Inspections. This system is in place and is utilized by the Public Service and Parks Maintenance Departments. This system is also capable of managing the City's fleet vehicles and materials & supplies for all city departments.

Projected Cost	Encumbered	2021	2022	2023	2024	2025	2026	Totals

## Next Steps\Update:

As the initial implementation of the CityWorks asset amendment components come to a conclusion it is desirable that both the Fleet Management and all material & supply's are managed in the system. Budgetary estimates for both of these implementations have been gathered and are presented here. Any annual licensing fees (after initial year 1) are maintained in the IT operating budget.

# TE-23-01 - Police Dispatch & Records System

Start Year: 2022  
Project Created: January-23  
Last Updated: May-23

<b>Project Priority:</b>	1 Imperative	<b>Project Type:</b>	Technology
<b>Projected Cost:</b>	\$1.1M	<b>Project Category:</b>	Systems & Applications
<b>Duration:</b>	24 Months	<b>Project Completion:</b>	On-going
<b>Current Status:</b>			

## Project Overview:

The current Computer Aided Dispatch (CAD) and Records Management System (RMS) utilized by the Division of Police was implemented in 2006 and is continually updated by the vendor. This product is due to be sunset by the manufacturer and will require a complete platform upgrade, after 15-18 years of life. Moreover, technology advancement in this time cannot be properly integrated into the existing system. Through this project a more robust real-time exchange of CAD/RMS data among other Central Ohio public safety agencies would be possible. Given the complexity of the project, a two-year implementation timeline is anticipated.

Projected Cost	Encumbered	2023	2024	2025	2026	2027 - 2031	2032 - 2042	Totals

## Next Steps\Update:

The Division of Police is in the process of working with Mission Critical Partners to draft an Request for Proposals that will be published in the first quarter of 2023. It is anticipated that selection of a preferred vendor would take place sometime mid 2023 and project kickoff slated for the second half of the year. A 24 month implementation period is expected due to the complexity of the project.

# TE-23-2001 - Code & Permitting Management System

Start Year: 2023  
Project Created: May-23  
Last Updated: May-23

**Project Priority:** 1 Imperative  
**Projected Cost:** \$92,000  
**Duration:** 18 Months  
**Current Status:** Software Licensing

**Project Type:** Technology  
**Project Category:** Systems & Applications  
**Project Completion:** Dec-24

## Project Overview:

The Code Enforcement and Permitting software that is currently implemented is experiencing numerous quality and reliability issues. The department has worked with the vendor over a number of months with little success. These systems are critical to the operations of the department and should be upgraded to an enterprise class system appropriate for the City. An enterprise class system will improve the overall workflow between the external customer and internal processes. Upgrading this system also see improved interdepartmental workflows and streamline these processes. In addition, the City should recognize an increase in digital submissions given a modern web based interface.

Projected Cost	Encumbered	2021	2022	2023	2024	2025	2026	Totals
<i>Duration (in months)</i>

## Next Steps\Update:

A competitive process was conducted in early 2023 to identify suitable applications that will meet the overall City need.

# TE-24-2001 - Parks & Recreation Programing System

Start Year: 2023  
Project Created: May-23  
Last Updated: May-23

Project Priority:	1	Imperative	Project Type:	Technology
Projected Cost:	\$77,500		Project Category:	Systems & Applications
Duration:	18 Months		Project Completion:	Dec-24
Current Status:				

## Project Overview:

The Parks & Recreation department utilize a highly customized software product. This product manages all P&R programs for the entire department. In addition, this system is the interface that the public accesses to signup for programing and make various purchases. Given critical deficiencies in the existing product and the poor user experience this system should be upgraded to better meet the needs of the department and the customers it serves,

Projected Cost	Encumbered	2021	2022	2023	2024	2025	2026	Totals

## Next Steps\Update:

A competitive process will need to be conducted beginning in 2023 to identify suitable applications that will meet the overall need of the Parks and Recreation Department.

# TE-24-0111 - Police Cruiser & Officer Technology

Start Year: 2024  
Project Created: May-23  
Last Updated: May-23

**Project Priority:** 2 Essential  
**Projected Cost:** \$800K  
**Duration:** 18 Months  
**Current Status:**

**Project Type:** Equipment  
**Project Category:** Public Safety  
**Project Completion:** Dec-24

## Project Overview:

The technology installed in a police cruiser serves a number of purposes in support of public safety operations. In addition, technology such as body worn camera, deployed to each officer interact with the overall technology offering. This equipment should be evaluated periodically to ensure the latest technology is deployed in our cruiser and to our police officers.

Projected Cost	Encumbered	2023	2024	2025	2026	2027 - 2031	2032 - 2042	Totals
Duration (in months)								
Base Equipment Cost	-	-	\$200,000	\$150,000	\$150,000	\$300,000	-	\$0

## Funding Sources:

Capital Improvement Fund	-	-	\$200,000	\$150,000	\$150,000	\$300,000	-	\$800,000
General Fund	-	-	-	-	-	-	-	\$0
	-	-	-	-	-	-	-	\$0
	-	-	-	-	-	-	-	\$0
	-	-	-	-	-	-	-	\$0
<b>Total</b>	<b>\$0</b>	<b>\$0</b>	<b>\$200,000</b>	<b>\$150,000</b>	<b>\$150,000</b>	<b>\$300,000</b>	<b>\$0</b>	<b>\$800,000</b>

## Next Steps\Update:

An RFP will be developed in 2023 to fully program, scope, and assess various technology offerings. These services will range from equipment provisioning, digital storage and indexing of data, providing integration with other public safety systems, and to provide annual maintenance. We anticipate signing 3-5 year contract with the successful respondent.

# TE-24-01 - Community ALPR Cameras

Start Year: 2024  
Project Created: May-23  
Last Updated: October-23

**Project Priority:** 3 Important  
**Projected Cost:** \$125,000 Budgetary Est.  
**Duration:** 18 Months  
**Current Status:**

**Project Type:** Equipment  
**Project Category:** Public Safety  
**Project Completion:** Dec-24

## Project Overview:

Community or Neighborhood based Automated License Plate Recognition technology (ALPR) is deployed in many of our neighboring communities. This camera based technology reads license plates and sends instant alerts to law enforcement officers when the cameras identify license plates that match those on lists of cars that are stolen or otherwise of interest to the police. This technology also allows public safety to search a database of images based on a car's color and various other features.

Projected Cost	Encumbered	2023	2024	2025	2026	2027 - 2031	2032 - 2042	Totals
Duration (in months)								
Base Equipment Cost	-	-	\$66,000	-	-	-	-	\$0
Options & Accessories	-	-	\$44,700	-	-	-	-	\$44,700
Delivery & Implementation	-	-	\$14,300	-	-	-	-	\$14,300
