Re: Proposal to Provide Inspection Services for the Taylor Road Realignment, FRA-CR 205

Dear Karl,

We are pleased to offer inspection and testing services for the Subject Project as follows:

Full time on site inspection as required during construction. Work will include inspection of the roadway excavation and embankment, erosion and sediment control, stormwater and drainage improvements, asphalt pavement, waterline relocation, traffic detour signage and testing of the materials and utilities as required. We propose to provide these services for an estimated amount of \$40,000.00 based on our review of the plans. We estimate the project will take less than 3 months and that we will be required to inspect the site reclamation and associated repairs to the private driveways.

Actual billing will be based on our hourly rate schedule. The City will be billed only for the services provided. This estimate includes final inspection, punchlist inspection and the one year warranty inspection.

We appreciate the opportunity to assist the City on this project. If this description and proposal meet with your approval, please authorize with your signature below. If you should have any questions, please do not hesitate to contact me.

Thank you,

David B. Koch, P.E.  
Engineer in Charge  
Inspection Services
