Overall Comments / Reconciliation	
Comments	
<p>Regarding land and assuming all other factors being equal, larger parcels typically sell for a lower price per unit than smaller parcels, and parcels with favorable frontage-to-depth ratios will typically for a higher price per unit than parcels with ratios less favorable. A property's zoning determines the legal uses of the site. Topography is another important element of comparison because it impacts the degree of necessary site work, as well as the usability of the finished product. The presence or lack of public utilities makes a property more or desirable, and accordingly, valuable.</p> <p>The sale values indicate a range of \$112,069 / acre to \$236,842 / acre. Each sale is relevant to the analysis due to its similar highest and best use as vacant. All of the land sales are located in the City of Gahanna. Each sale has been included as they represent a sale of a lot in an older, established neighborhood, like the subject parcel. Considering all indicators and the differences that exist between the Sales and the subject property, a value of \$190,476 / acre is concluded.</p>
