Re: Tech Center Drive Improvements  
Morrison Road Improvements

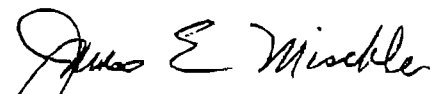

Dear Mr. Wetherholt:

Reference is made to our proposal for improvements to Morrison Road dated December 15, 1999 and subsequent request for modification dated October 23, 2000. Reference is also made to our proposal for improvements to Tech Center Drive dated July 25, 2000 and subsequent request for modification dated February 7, 2001.

The projects are being designed and constructed in several phases with some of the design work held until 2002. Total fee requested for the two projects, including modifications is \$408,000. A portion of the fee was authorized in previous encumbrances totaling \$212,492. We anticipate that amounts billed for work in 2001 for the two referenced projects (EMH&T Project Nos. 2000-0240.01 and 2000-1231.01 respectively), combined with previous billings, will not exceed \$375,492. We therefore anticipate that the additional encumbrance for 2001 would be \$163,000. Remaining fees (estimated to be \$32,508) will be billed in 2002.

If you have any questions, please call.

Sincerely,  
EVANS, MECHWART, HAMBLETON & TILTON, INC.

  
James E. Mischler, P.E.
