Westerville, Ohio 43081

Dear Mr. Nduati:

Subject: Report of Phase I Environmental Site Assessment (ASTM E1527-21)
Proposed Hotel Property
4530 North Hamilton Road
Columbus, Franklin County, Ohio
CEC Project 356-939

Civil & Environmental Consultants, Inc. (CEC) is pleased to submit the attached Phase I Environmental Site Assessment (ESA) report for the above-referenced Subject Property. This Phase I ESA was performed at your request in accordance with our proposal, dated October 24, 2025.

We appreciate the opportunity to be of service to you. If you have any questions or require additional services, please feel free to contact us at 614-540-6633.

Sincerely,

CIVIL & ENVIRONMENTAL CONSULTANTS, INC.

Emily Rastorfer
Project Manager

Andrew G. McCorkle, CPG, PG
Principal

EXECUTIVE SUMMARY

The Executive Summary below is an overview of the results of this Phase I Environmental Site Assessment (ESA) and should not be considered apart from the entire report, which contains the rationale and qualifications used by Civil & Environmental Consultants, Inc. (CEC) in making the opinions and conclusions presented herein.

PROPERTY NAME/ADDRESS:	Proposed Hotel Property 4530 North Hamilton Road, Columbus, Franklin County, Ohio 43230
INTENDED USER(S):	Tijen Incorporated, LLC
PROPERTY/TAX ID(S):	027-000002-00
PROPERTY OWNER(S):	Tijen Incorporated, LLC
PROPERTY DESCRIPTION	
Land Area:	± 2.26 -acres
Improvements:	A 1,752-sqft single-family dwelling and an approximately 1,120-square foot pole garage.
CURRENT USE:	Residential
HISTORICAL USE:	The Subject Property was agricultural land with no structures present until 1955 when a residence was constructed in the northwest portion fronting Hamilton Road. The pole garage was constructed in 1986.
ADJOINING PROPERTY USE:	North: Vacant land East: Condominiums (The Woods at Shagbark) South: Shagbark Road followed by Valvoline Instant Oil Change and a single-family dwelling. West: Hamilton Road followed by multi-tenant commercial businesses and a single-family dwelling.
RECOGNIZED ENVIRONMENTAL CONDITIONS (RECS):	None identified.
CONTROLLED RECs (CRECs):	None identified.
HISTORICAL RECs (HRECs):	None identified.

SIGNIFICANT DATA GAPS:	None identified.
DE MINIMIS CONDITIONS:	None identified.

COMPLETION DATES:

Interviews:	October 24, 2025
AUL/Lien Search:	Not provided by the User
Database Search:	October 28, 2025
Site Reconnaissance:	November 5, 2025

CONTINUED VIABILITY:

180 Days:	April 22, 2026
1 year:	October 24, 2026

1.0 INTRODUCTION

This report documents the results of a Phase I ESA for the property located at 4530 North Hamilton Road, Columbus, Franklin County, Ohio (the "Subject Property"). A Site Location Map and Subject Property Diagram are attached as Figures 1 and 2, respectively. Property assessing records for the Subject Property are provided in Appendix A.

Civil & Environmental Consultants, Inc. (CEC) conducted this assessment on behalf of Tijen Incorporated LLC (Tijen) in accordance with our proposal dated October 24, 2025. Tijen requested that CEC perform this Phase I ESA as part of their due diligence associated with redevelopment of the Subject Property. As such, CEC understands that Tijen is the user[1] of this Phase I ESA.

1.1 PURPOSE

The purpose of this Phase I ESA is to identify, to the extent feasible pursuant to the process prescribed herein, recognized environmental conditions (RECs)[2] in connection with the Subject Property in accordance with ASTM International (ASTM) E1527-21 "Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process" (the "Standard"). In doing so, this Phase I ESA is intended to permit the user to satisfy one of the requirements to qualify for the innocent landowner, contiguous property owner, or bona fide prospective purchaser limitations on liability (hereinafter, the "landowner liability protections") available under the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA), as amended (42 U.S.C. §9601). No sampling or testing of materials, soil, water, air, or other environmental media was performed.

1.2 SCOPE OF SERVICES

CEC performed the following scope of services to meet the purpose of this Phase I ESA.

1.2.1 Records Review

The purpose of the records review is to identify, obtain, and review reasonably ascertainable records from standard sources that will help identify RECs in connection with the Subject Property. The records review consisted of the following:

[1] The term user is defined in the Standard as "the party seeking to use Practice E 1527 to complete an environmental site assessment of the property. A user may include, without limitation, a potential purchaser of property, a potential tenant of property, an owner of property, a lender, or a property manager." The user is also the party that intends to use the Phase I ESA to satisfy one of the requirements to qualify for the landowner liability protections under CERCLA.

[2] The term recognized environmental conditions (RECs) is defined in the Standard as "(1) the presence of hazardous substances or petroleum products in, on, or at the Subject Property due to a release to the environment; (2) the likely presence of hazardous substances or petroleum products in, on, or at the Subject Property due to a release or likely release to the environment; or (3) the presence of hazardous substances or petroleum products in, on, or at the Subject Property under conditions that pose a material threat of a future release to the environment."

(1) Standard Environmental Record Sources: A review of records obtained through a search of reasonably ascertainable government agency databases was performed to determine if the Subject Property and/or properties within prescribed search distances are listed in databases indicative of conditions or activities that may have a negative impact on the Subject Property. The sources and approximate minimum search distances included in the search were those set forth in the Standard.

(2) Physical Setting Sources: A review of the current USGS 7.5-Minute Topographic Map showing the area of the Subject Property described in Section 4.1 to gain a general understanding of its physical setting.

(3) Historical Use Information: A review of select reasonably ascertainable historical resources to develop a history of the previous uses of the Subject Property, its adjoining properties, and properties in the surrounding area to identify the likelihood of past uses having led to RECs in connection with the Subject Property. CEC utilized various historical resources to identify the obvious uses of the Subject Property back to its first developed use, or back to 1940, whichever is earlier, as described in Section 4.3, and to the extent practical based on the available resources.

1.2.2 Subject Property Reconnaissance

A reconnaissance was performed by a CEC Environmental Professional (EP) to obtain information indicating the likelihood of RECs in connection with the Subject Property. The reconnaissance consisted of a visit to observe the interior and exterior portions of the Subject Property and evaluate its current and former uses. The current uses of adjoining properties were identified to the extent that they were visually and/or physically observable from the Subject Property or from public areas during the reconnaissance.

1.2.3 Interviews

CEC's EP conducted interviews with the individuals identified in Section 5.0 to obtain information indicating RECs in connection with the Subject Property.

1.2.4 Report

After completion of the above tasks, CEC prepared this Phase I ESA report describing the scope of services performed, the findings that include the identification of RECs and opinions of the impact of the RECs on the property, and whether additional appropriate investigations would be necessary.

1.2.5 Non-Scope Considerations and Additional Services

Unless otherwise explicitly stated, the scope of services for the Phase I ESA does not include the collection and analysis of any environmental media. In accordance with the Standard, issues considered beyond the scope of this Phase I ESA include asbestos-containing building materials, radon, lead-based paint, lead in drinking water, wetlands, regulatory compliance, cultural and historic resources, industrial hygiene, health and safety, ecological resources, endangered species, indoor air quality unrelated to releases of hazardous substances or petroleum products into the environment, biological agents, and mold. In addition, issues such as substances not defined as hazardous substances (i.e., "emerging contaminants," etc.), PCB-containing building materials, ionizing radiation, oil/gas production, mineral rights and mining, and geotechnical suitability are also considered beyond the scope of this project.

1.3 SIGNIFICANT ASSUMPTIONS

CEC completed this Phase I ESA using the following significant assumptions:

- The information obtained from presumably knowledgeable parties (e.g. Subject Property owner, manager, user, tenants, etc.), regulatory agencies, or other sources was assumed to be accurate and reliable.

- The obtained regulatory database information was assumed to accurately reflect the information contained in the regulatory agency records unless it was obviously contradicted by other data.

- Shallow groundwater flow was assumed to mimic area topography as depicted on the local USGS 7.5-minute topographic map and as observed during the reconnaissance. Within the scope of this Phase I ESA, no subsurface data was obtained to evaluate the actual groundwater flow direction beneath the Subject Property. Local factors, such as underground utilities, heterogeneous subsurface features, and seasonal fluctuations, among other factors may influence the actual direction of groundwater flow at and near the Subject Property. Site-specific groundwater flow can only be determined through the installation of piezometers into the transmissive zone being evaluated.

1.4 LIMITATIONS AND EXCEPTIONS

CEC performed this Phase I ESA consistent with professional standards and in accordance with the scope and limitations defined in the Standard. This report presents CEC's field observations, results, and opinions as they existed on the date of the reconnaissance, and is subject to modification by CEC, if CEC or any other party develops subsequent information. Limiting

conditions encountered as part of this Phase I ESA, if any, are discussed in the corresponding sections of this report.

Performance of this Phase I ESA is intended to reduce, but not eliminate, uncertainty of environmental conditions associated with the property. Therefore, the information and comments made in this report should not be construed to warrant or guarantee the property, or express or imply, without limitation, warranties as to its marketability or fitness for a particular use. Furthermore, the information that is provided in this report is not intended, nor should it be construed to be, legal advice. The review of site-specific documentation was limited to those items referenced in this report.

It should be noted that this report is time sensitive and has specific limitations related to the viability of the information contained herein. Specific to Phase I ESAs, the Standard imposes a "shelf life"[3] on the reports and components thereof, as well as specific user obligations. It is the responsibility of the user to verify the continued viability of the report.

1.5 SPECIAL TERMS AND CONDITIONS

There are no special terms or conditions associated with this Phase I ESA.

1.6 USER RELIANCE

This report is intended for the sole use of Tijen. The scope of services performed in execution of this evaluation may not be appropriate to satisfy the needs of others, and use of this document or the findings, conclusions, or recommendations contained herein by others is at their sole risk. Reliance by Tijen on the facts, conclusions, and recommendations presented in this report is subject to the agreed upon specific scope of services and contractual terms and conditions, including explicit indemnification statements and limitations on CEC's financial liability.

This report and its findings shall not, in whole or in part, be disseminated or conveyed to another party, nor used by another party in whole or in part, without prior written consent of CEC, except as permitted by the Standard.

[3] According to the Standard, the shelf life, or "continued viability," of the ESA is "Subject to [Section] 4.8 and the user's responsibilities set forth in Section 6, an environmental site assessment meeting or exceeding this practice is presumed to be viable when it is conducted within 180 days to the date of acquisition of the subject property (or, for transactions not involving an acquisition such as a lease or refinance, the date of the intended transaction). The dates of the components presented in [Section] 4.6.2(i), (iii), (iv), and (v) for interviews, review of government records, visual inspections, and declaration by environmental professional, shall be identified in the report. Completion of searches for recorded environmental cleanup liens [Section] (4.6.2(ii)) is a user responsibility; however, if the user has engaged the environmental professional to conduct these searches, then that date shall also be identified in the report."

2.0 USER PROVIDED INFORMATION

The EPA All Appropriate Inquiries Rule (40 CFR Part 312) and ASTM E1527 require the User to answer certain questions related to the Subject Property to obtain certain Landowner Liability Protections from CERCLA Liability. CEC provided the client with a User Questionnaire. The User Questionnaire was completed by Elias Nduati with Tijen Incorporated, LLC on October 24, 2025. A copy of the completed user questionnaire is provided in Appendix B. A summary of the responses is provided below.

2.1 ENVIRONMENTAL LIENS OR ACTIVITY AND USE LIMITATIONS

Mr. Nduati indicated that a search for environmental liens or activity and use limitations (AULs) was not performed.

2.2 SPECIALIZED KNOWLEDGE

Mr. Nduati does not have specialized knowledge or experience related to the Subject Property or nearby properties. Based on his knowledge and experience related to the Subject Property, there are no obvious indicators of the presence or likely presence of contamination at the Subject Property.

2.3 VALUATION REDUCTION FOR ENVIRONMENTAL ISSUES

Mr. Nduati indicated that the purchase price is not applicable, as Tijen is the current owner of the Subject Property.

2.4 COMMONLY KNOWN OR REASONABLY ASCERTAINABLE INFORMATION

Mr. Nduati stated that the past use of the Subject Property was residential. He is not aware of any other commonly known or reasonably ascertainable information about the Subject Property that would be indicative of releases or threatened releases.

2.5 PROCEEDINGS INVOLVING THE SUBJECT PROPERTY

Mr. Nduati is not aware of any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on, or from the Subject Property; any pending, threatened, or past administrative proceedings relevant to hazardous substances or petroleum products in, on, or from the Subject Property; or any notices from any governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products.

2.6 OTHER HELPFUL DOCUMENTS

Mr. Nduati was asked if he knew of the existence of the documents listed below with respect to the Subject Property to which he indicated no knowledge:

- Previous ESA reports;
- Environmental compliance audit reports;
- Environmental permits [i.e., solid waste disposal permits, hazardous waste disposal permits, wastewater permits, National Pollutant Discharge Elimination System (NPDES) permits, underground injection permits, etc.];
- Registrations for underground storage tanks (USTs) and aboveground storage tanks (ASTs);
- Registrations for underground injection systems;
- Safety Data Sheets (SDS);
- Community right-to-know plan (SARA Title III);
- Safety plans; preparedness and prevention plans; spill prevention, countermeasure, and control plans; facility response plans; etc.;
- Reports regarding hydrogeologic conditions on the Subject Property or surrounding area;
- Notices or other correspondence from any government agency relating to past or current violations of environmental laws with respect to the Subject Property or relating to environmental liens encumbering the Subject Property;
- Hazardous waste generator notices or reports;
- Geotechnical studies;
- Risk assessments; or
- Recorded AULs

2.7 REASON FOR PERFORMING

CEC was engaged by Tijen to perform this Phase I ESA as part of their due diligence for the planned hotel development on the Subject Property.

2.8 INTENDED USE OF THE SUBJECT PROPERTY

According to Mr. Nduati, the Subject Property is intended to be redeveloped with a hotel.

3.0 SUBJECT PROPERTY RECONNAISSANCE

3.1 METHODOLOGY AND LIMITING CONDITIONS

On November 5, 2025, Ms. Abigail Bullock of CEC performed a reconnaissance to observe the Subject Property and the immediate vicinity visually and physically for potential evidence and/or practices that could represent RECs. Ms. Bullock was unaccompanied during the inspection.

At the time of the reconnaissance, the visibility at the Subject Property was good and weather conditions did not restrict observation of the Subject Property. The following methodology was used when performing the reconnaissance:

- Observed the exterior portions of the Subject Property by traversing the grounds in a random pattern and traveling the perimeter.
- Observed the structures on the Subject Property from the exterior. Interiors were not accessed during reconnaissance, as the buildings are currently occupied by residents.
- Observed land use and types of operations of the immediate adjoining properties from the Subject Property and public areas.

A Subject Property Location Map and Subject Property Diagram are attached as Figures 1 and 2 respectively. Photographs are provided in Appendix C.

3.2 SUBJECT PROPERTY SUMMARY

General Subject Property Information	
Street Address:	4530 North Hamilton Road
City, County, State:	Columbus, Franklin County, Ohio
Parcel Number:	027-000002-00
Property Size (acres):	± 2.26 -acres
Owner:	Tijen Incorporated, LLC
Improvements:	Single-family residential dwelling and a detached garage.
Roads:	North Hamilton Road follows the western border and Shagbark Road follow its southern border.
Parking:	Gravel driveway off North Hamilton Road in the northwest corner.
Surface Water:	None observed on the Subject Property.
Potable Water Source:	Well
Sewage Disposal System:	Septic
Heating/Cooling Source:	Forced Air / Central Air.

3.3 CURRENT USE OF THE SUBJECT PROPERTY

The Subject Property is currently used for residential purposes.

3.4 CURRENT USES OF THE ADJOINING PROPERTIES

The Subject Property is surrounded by vacant land to the north, multi-family residential development to the east, Valvoline Instant Oil Change and single-family residential property to the south, and Hamilton Road followed by multi-tenant commercial property to the west.

3.5 SUBJECT PROPERTY WIDE OBSERVATIONS

The Subject Property is accessed from North Hamilton Road via a gravel driveway at the northwest corner of the parcel. The driveway leads to a one-story, single-family residential dwelling and a detached garage, both surrounded by a sparsely wooded area. The dwelling is a ranch-style residence constructed in 1955 with an attached two-car garage, and a crawl space foundation. The detached garage is a slab-on grade metal pole building, constructed in 1986. The eastern portion of the Subject Property consists of maintained grassy land. Overhead telephone lines traverse the Subject Property. The conditions in the following table were specifically assessed for their potential to indicate RECs and may include conditions inside or outside structures on the Subject Property. If observed, relevant information regarding identified features is discussed further in this section.

Subject Property Observations	Observed?	
	Yes	No
Hazardous Substances and Petroleum Products in Connection with Identified Uses	☐	☒
Underground Storage Tanks (USTs)	☐	☒
Aboveground Storage Tanks (ASTs)	☐	☒
Strong, Pungent, or Noxious Odors	☐	☒
Standing Surface Water and Pools or Sumps Containing Liquids Likely to be Hazardous Substances or Petroleum Products	☐	☒
Drums, Totes, and Intermediate Bulk Containers	☐	☒
Hazardous Substance and Petroleum Product Containers Not in Connection with Identified Uses	☐	☒
Unidentified Substance Containers	☐	☒
Suspect PCB Containing Equipment	☒	☐
Stains or Corrosion on Floors, Walls, or Ceilings	☐	☒
Drains and Sumps	☐	☒
Pits, Ponds, or Lagoons	☐	☒
Stained Soil or Pavement	☐	☒
Stressed Vegetation	☐	☒
Solid Waste	☐	☒
Water/Wastewater	☐	☒
Wells	☒	☐
Septic Systems or Cesspools	☒	☐

3.5.1 Suspect PCB Containing Equipment

A pole-mounted electrical transformer was observed along the north border of the Subject Property, near the central portion of the boundary. A manufacturer's label indicated the dielectric fluid in the transformer does not contain PCBs. The transformer appeared in good condition with no obvious evidence of leaks, staining, or releases.

3.5.2 Wells

No wells were observed at the Subject Property during the site reconnaissance. However, according to the Ohio Department of Natural Resources (ODNR) Water Well database[4], a domestic water well is or was present south of the dwelling. The well log indicates the well was installed in 1955 to a depth of approximately 33-feet. A copy of the well log is provided in Appendix E.

3.5.3 Septic Systems or Cesspools

A septic system was observed at the east exterior (rear) of the dwelling. The system appeared to be in good condition with no evidence of staining, seepage, or other indications of failure. No cesspools were observed.

[4] ODNR, Division of Geological Survey. Water Well Database. https://waterwells.ohiodnr.gov/search

4.0 RECORDS REVIEW

4.1 PHYSICAL SETTING

CEC reviewed information from various physical setting sources to evaluate the general characteristics of the subsurface geology in the vicinity of the Subject Property. This information was reviewed to evaluate how those characteristics may influence movement of potential subsurface impact identified on or near the Subject Property. It was not the intent of this review to evaluate the geotechnical conditions of the Subject Property or to assess geologic concerns such as foundation conditions, faulting, subsidence, mining, or oil/gas wells. Physical setting information is summarized in the table below.

Summary of Physical Setting Information	
Subject Property Elevation:	± 925 feet above mean sea level (amsl)
Topographic Gradient:	Generally southwest
Nearest Surface Water Body:	A tributary of Big Walnut Creek is located approximately 250-feet southeast of the Subject Property.
Regional Geology:	According to the Ohio Geology Interactive Map[5], bedrock underlying the Subject Property is comprised of Mississippian age clayey shale and siltstone beds in the upper 25-feet.
Anticipated Regional Groundwater Flow Direction*:	Generally southwestward

*Actual groundwater characteristics cannot be determined without a Subject Property specific subsurface investigation.

4.2 ENVIRONMENTAL RECORD SOURCES

4.2.1 Government Environmental Databases

CEC contracted Environmental Data Resources, Inc. (EDR) of Shelton, Connecticut to search for reasonably ascertainable environmental record sources published by Federal, State, and/or Tribal regulatory agencies with jurisdiction over the Subject Property. EDR also searches its proprietary databases of the historical auto station, dry cleaner, and manufactured gas plant locations. The search of each database was conducted using the approximate minimum search distances from the Subject Property defined by the Standard. The results of EDR's search were used to evaluate if the Subject Property and/or properties within prescribed search distances are listed as having a past or present record of actual or potential environmental impact. Please note that regulatory listings include only those properties, which are known to the regulatory agencies at the time of

[5] Ohio Department of Natural Resources, Division of Geological Survey. Ohio Geology Interactive Map. https://gis.ohiodnr.gov/website/dgs/geologyviewer/#

publication to be 1) contaminated, 2) in the process of evaluation for potential contamination, or 3) regulated. The inclusion of a property in a government database list does not necessarily indicate that the property has an environmental problem.

EDR plotted the locations of the listed properties identified in the search relative to the Subject Property and provided the regulatory information available for each in a Radius Map Report, dated October 28, 2025. Refer to Appendix D for a copy of EDR's Radius Map Report, which includes an "Overview Map" and a "Detail Map" showing the locations of the identified properties.

4.2.1.1 Subject Property Listings

The Subject Property was not listed on the databases included in the EDR Radius Map Report.

4.2.1.2 Non-Subject Property Listings

EDR's Radius Map Report identified several surrounding properties on the various databases within the approximate minimum search distances from the Subject Property. CEC's EP reviewed the data presented for these listings and evaluated them based on their regulatory status (according to EDR's report), their distance from the Subject Property, and the general hydrogeology of the region (refer to Section 4.1). Information related to the nearest listings interpreted to be up-gradient and/or to have a potential to impact the subsurface at the Subject Property is provided below:

- Martinizing Dry Cleaning (Martinizing), located at 1177 North Hamilton Road (west adjoining), was identified in the EDR Historical Cleaner, Drycleaners, and Resource Conservation Recovery Act – Non-generator / No Longer Regulated (RCRA-NonGen/ NLR) databases. The Drycleaner database indicated the facility status is shut down. According to the RCRA database, the facility status was changed to a non-generator in 2025 but was historically classified as a Small Quantity Generator (SQG) in 1996, with reported generation of ignitable waste, chromium, lead, tetrachloroethylene (PCE), trichloroethylene (TCE), and other spent halogenated solvents, consistent with its operation as a dry cleaner. No violations have been identified at the facility. Because the database listings do not indicate any violations or reported spills, and the facility is located down-gradient from the Subject Property, the facility is not considered a REC.

Based on distance, regulatory status, and operational nature of the remaining non-Subject Property listings, none are interpreted to pose an environmental concern to the Subject Property.

4.2.1.3 Orphan Listings

Not all sites or facilities identified in the database records can be accurately located in relation to the Subject Property due to incomplete information being supplied to the regulatory agencies and are referred to as "orphan sites" by EDR. The "Orphan Summary" section of the EDR Radius Map Report identified no orphan sites.

4.2.2 Regulatory Agency File Review

Based on the evaluation of the government environmental database listings described herein, CEC determined that a review of regulatory agency files was not warranted as there were no listings for the Subject Property. One adjoining property was identified in the EDR report through the Drycleaners and RCRA NonGen/NLR databases. A search of the Ohio EPA eDocument website was conducted, but no records pertaining to the facility were identified. Because the database listings do not indicate any violations or reported spills, and the facility is located down-gradient from the Subject Property, no further review of agency files is considered necessary.

4.2.3 Local Agencies

CEC contacted local agencies to inquire whether files were available that indicate potential environmental impacts on the Subject Property or surrounding properties. CEC contacted local agencies to inquire whether files were available that indicate potential environmental impacts on the Subject Property or surrounding properties.

On October 28, 2025, a records request was submitted by Ms. Kristen Gill to the Jefferson Township Fire via email and via to the Franklin County Health Department through the NextRequest online submission portal. A response was received on October 29, 2025, from Chad Mast, Fire Marshall with the Jefferson Township Fire, indicating that no records were identified for the Subject Property. On November 3, 2025, the Franklin County Health Department responded with two documents pertaining to the Subject Property: A Daily Call Report (DCR) and a Complaint Investigation Form (CIF). The DCR indicates that the Subject Property has been subject to routine inspections under the Off-Lot Operation Permit program, which refers to the on-site septic system, from at least 2014 through 2024. Several entries document that corrective action was necessary due to system performance issues. The most recent entry from September 2024 indicated that no corrective action was required. The CIF documents a solid waste complaint received on October 30, 2015, alleging junk yard conditions at the residential property; however specific details and outcomes were not documented. Copies of the agency correspondence and supporting documents provided are included in Appendix F.

4.3 HISTORICAL USE INFORMATION ON THE SUBJECT PROPERTY AND ADJOINING PROPERTIES

CEC reviewed the reasonably ascertainable historical sources described in the following sections to ascertain the historical uses of the Subject Property and immediately adjoining properties to evaluate the presence of activity that could present RECs.

4.3.1 Ownership Records

Ownership information for the Subject Property was obtained from the Franklin County Auditor website. Additional information obtained from the County website including property size, building size, and construction data have been incorporated throughout the report. The Subject Property was under consistent residential private ownership from March 1984 until its transfer to Tijen Incorporated in December 2023. Ownership prior to 1984 was not available on the auditor website. Parcel records are provided in Appendix A.

4.3.2 Aerial Photographs

Aerial photographs were obtained for the vicinity of the Subject Property from EDR. In addition, aerial photographs were viewed using Google Earth. Copies of the EDR aerial photographs are provided in Appendix F. A summary of the aerial photography is presented in the table below.

Date	Summary of Historical Aerial Photographs
1938, 1953	The Subject Property and adjoining properties were agricultural land. No structures occupied the Subject Property. Hamilton Road followed the west border of the Subject Property, with sparse residential development along. Land beyond the south and east adjoining properties were vacant and sparsely wooded.
1957, 1965, 1972, 1980	A significant increase in residential development occurred. A residential structure was constructed in the northwest corner of the Subject Property, fronting Hamilton Road, while the eastern half of the Subject Property appeared as maintained grassy land. Additional residential structures were also developed on the north, southeast, and west adjoining properties. Shagbark Road was newly developed following the south border of the Subject Property. Land opposite Shagbark Road was forested.
1988	An outbuilding was constructed east of the dwelling on the Subject Property. Vegetation increased around residential structures. A portion of the west adjoining property remained as agricultural land.

Date	Summary of Historical Aerial Photographs
1995	The Subject Property remained unchanged. A significant number of multi-tenant residential structures were developed beyond adjoining properties, opposite Hamilton Road. Ground disturbance and equipment storage was observed on the west adjoining property.
2000	Increased vegetation was observed on the Subject Property as well as on the north and south adjoining properties. A large parking area with a multi-tenant commercial structure was developed on the west adjoining property. Ground disturbance was observed on the east adjoining properties.
2006, 2011, 2015	The Subject Property remained unchanged. Multi-tenant residential structures were constructed on the east adjoining properties. A small parking area was observed on the north adjoining property, suggesting a transition to commercial use.
2019	Vegetation on the Subject Property partially obscured view of the existing structures. A portion of the multi-tenant commercial structure on the west adjoining property was demolished and replaced with a new standalone commercial structure.
2023, 2025*	Two apparent boats were observed in the central portion of the Subject Property. The structure on the north adjoining property was demolished and appeared vacant. A commercial structure was constructed on the south adjoining property, opposite Shagbark Road.

*= Aerial viewed via Google Earth

4.3.3 Fire Insurance Maps

CEC engaged EDR to search their library for Sanborn® Fire Insurance Company Maps (Sanborn® maps) available for the Subject Property. According to EDR, Sanborn maps were unavailable for the vicinity of the Subject Property. A copy of the EDR Sanborn Report - No Coverage Letter is attached in Appendix G.

4.3.4 Historical Topographic Maps

Historical USGS Topographic Maps were obtained for the Subject Property and surrounding area from EDR. Copies of the historical topographic maps are provided in Appendix H. A summary of the topographic maps is presented in the table below.

Date	Summary of Historical Topographic Maps
1902, 1904, 1912	The Subject Property was situated at an approximately 920-feet amsl and exhibited generally flat topography with a gradual downslope toward the southwest. A tributary to Big Walnut Creek was observed approximately 250-

Date	Summary of Historical Topographic Maps
	feet southeast of the Subject Property. Hamilton Road followed the west border of the Subject Property. No structures occupied the Subject Property, and the surrounding area was characterized by sparse structural development.
1954	The Subject Property remained unchanged. Two new structures were indicated to the south/ southeast, on adjoining properties. Green-shaded areas indicated that the land beyond the south and east adjoining properties were forested land.
1964, 1973, 1982	A structure was depicted on the Subject Property, as well as on the north, southeast, and west adjoining properties. Shagbark Road was indicated following the south border of the Subject Property. Green shading indicated that the land opposite Shagbark Road was forested land.
2013, 2016, 2019	These maps no longer depict individual structures. No changes were noted on the Subject Property or adjoining properties.

4.3.5 Historical City Directories

City directories provide historical information based on the physical street address and are designed to evaluate potential liability on a property resulting from past activities. EDR prepared a city directory search for the Subject Property and nearby addresses at approximately 5-year intervals for the years 1985 through 2022. Copies of the City Directories are included in Appendix I. The Subject Property was consistently occupied as a private residence throughout the reviewed period. Listings for the surrounding properties indicated mix-use of primarily residential and commercial properties from 1965 through 2022. Of note, Martinizing Dry Cleaning, which was listed at the address, 1177 North Hamilton Road (west adjoining) in 2000. No earlier entries were identified for the address. No other listings of potential environmental significance were identified.

4.3.6 Previous Reports

CEC was not provided with any previous reports regarding the Subject Property.

4.4 HISTORICAL USE SUMMARY

4.4.1 Summary of the Historical Use of the Subject Property

Historical sources reviewed indicate that the Subject Property was agricultural land with no structures present from prior to 1938. The Subject Property was improved with the existing dwelling in 1955 and the pole garage in 1986. The eastern portion of the Subject Property has consistently remained as maintained grassy land. City directory listings from 1985 through 2022

confirmed continuous private residential occupancy. Aside from increased vegetation over time, no other significant changes to the Subject Property were noted.

4.4.2 Summary of the Historical Use of the Adjoining Properties

Historical sources reviewed indicate that from at least 1938, the adjoining properties were agricultural land. By 1957, residential structures were constructed on the north, southeast, and west adjoining properties. A portion of the west adjoining property remained agricultural until the mid-1990s when the property was redeveloped with a multi-tenant commercial structure. Martinizing Dry Cleaning has been one of the tenants of this commercial structure since that time. In 2006, the east adjoining property was improved with a multi-family residential development. In 2011, a small parking area was observed on the north adjoining property, suggesting a potential transition to commercial use. By 2019, a portion of the commercial structure on the west adjoining property was demolished and replaced with a new standalone commercial building. As of 2023, the structure on the north adjoining property was demolished and the parcel appeared vacant. Additionally, a commercial structure (Valvoline Oil Services) was developed on the south adjoining property, opposite Shagbark Road.

5.0 INTERVIEWS

CEC interviewed various individuals familiar with the Subject Property, as identified to us, and/or government officials to evaluate historical uses and identify potential RECs. The individuals interviewed were asked to provide responses in good faith and to the best of their knowledge. The following sections identify the individuals interviewed and summarize the information each provided; however, additional information provided by these individuals may be presented in other sections of this report.

5.1 CURRENT OWNER

The Subject Property is currently owned by Tijen, who is also the User of this report. Mr. Elias Nduati, representing Tijen, completed a User Questionnaire regarding the Subject Property, as discussed in Section 3.0. A copy of the completed questionnaire is included in Appendix B.

5.2 CURRENT OCCUPANTS

No current occupants of the Subject Property were interviewed as part of this assessment as the Subject Property is rental-occupied.

5.3 GOVERNMENT OFFICIALS

CEC did not conduct interviews with local government officials. Written requests for information regarding the environmental condition of the Subject Property were submitted to local agency officials (Section 4.2.3).

5.4 OTHER INTERVIEWS

No other individuals were interviewed as part of this Phase I ESA.

6.0 NON-SCOPE SERVICES

Tijen did not request the performance of additional services as part of this Phase I ESA.

7.0 EVALUATION

7.1 FINDINGS

Based upon the information gathered as part of this Phase I ESA, the following is a summary of CEC's findings:

- The ± 2.26-acre Subject Property is located at 4530 North Hamilton Road, Columbus, Franklin County, Ohio. The Subject Property encompasses Franklin County Parcel No. 027-000002-00, currently owned by Tijen Incorporated, LLC.

- The Subject Property is developed with a 1,752-sqft one-story, single-family residential dwelling and 1,120-sqft pole building, both surrounded by a sparsely wooded area. The residence is currently occupied and appears to be maintained for residential use. The eastern portion of the Subject Property consists of maintained grassy land. Overhead electrical lines, with one (1) modern pole-mounted transformer, traverse the Subject Property. A septic system was observed at the east exterior (rear) of the dwelling. A domestic water well was documented south of the dwelling in the ODNR Water Well database, however, was not observed during the site reconnaissance.

- Historical sources reviewed indicate that the Subject Property was agricultural land with no structures present from prior to 1938. The Subject Property was improved with the existing dwelling in 1955 and the pole garage in 1986. The eastern portion of the Subject Property has consistently remained as maintained grassy land. City directory listings from 1985 through 2022 confirmed continuous private residential occupancy. Aside from increased vegetation over time, no other significant changes to the Subject Property were noted.

- The Subject Property was not listed on the databases included in the EDR Radius Map Report.

- Historical sources reviewed indicate that from at least 1938, the adjoining properties were agricultural land. By 1957, residential structures were constructed on the north, southeast, and west adjoining properties. A portion of the west adjoining property remained agricultural until the mid-1990s when the property was redeveloped with a multi-tenant commercial structure. In 2006, the east adjoining property was improved with a multi-family residential development. In 2011, a small parking area was observed on the north adjoining property, suggesting a potential transition to commercial use. By 2019, a portion of the commercial structure on the west adjoining property was demolished and replaced with a new commercial building. As of 2023, the structure on the north adjoining property was demolished and the

parcel appeared vacant. Additionally, a commercial structure (Valvoline Instant Oil Change) was developed on the south adjoining property, opposite Shagbark Road.

- EDR's Radius Map Report identified thirteen (13) surrounding properties on the various databases within the approximate minimum search distances from the Subject Property. The following adjoining property was identified:

    - Martinizing Dry Cleaning, formerly located at 1177 North Hamilton Road (west adjoining), was identified on the EDR Historical Cleaner, Drycleaners, and Resource Conservation Recovery Act – Non-generator / No Longer Regulated (RCRA-NonGen/ NLR) databases. The Drycleaner database indicates the facility status as "shut down". According to the RCRA database, the site was classified as a non-generator in 2005, and was historically a SQG in 1996, with reported generation of ignitable waste, chromium, lead, PCE, TCE, and other spent halogenated solvents, consistent with dry cleaning operations. No violations have been identified at the facility.

7.2 OPINIONS

Based on the findings of this ESA, CEC offers the following opinions relative to the potential for environmental impacts on the Subject Property by the conditions identified:

- Based on the rural setting depicted in the 1938 aerial photograph, it is reasonable to assume that agriculture was the first developed use of the Subject Property. While it is reasonable to anticipate that pesticides and herbicides were used as part of past agricultural activities, when applied for their intended purpose by label directions, pesticide and herbicide use does not constitute a release of hazardous substances and generally poses a low potential for environmental impact. Therefore, it is the opinion of the EP that the past agricultural use of the Subject Property does not constitute a REC.

- The observed septic system appeared in good condition, the documented domestic water well is typical of residential use, and the pole-mounted transformer appeared modern with no evidence of leakage. None of these conditions are indicative of RECs.

- Although Martinizing Dry Cleaning was identified on the west adjoining property and operated as a dry cleaner, based on the distance and downgradient location, combined with the absence of violations or reported spills, the facility is not considered a REC.

- Based on distance, regulatory status, and operational nature of the remaining non-Subject Property listings, none are interpreted to pose a significant environmental concern to the Subject Property.

7.3 SIGNIFICANT DATA GAPS

CEC did not identify significant data gaps in the information collected that would affect our ability to provide an opinion as to whether the ESA has identified conditions that could represent a REC to the Subject Property.

7.4 CONCLUSIONS

We have performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E1527-21 for the property located at 4530 North Hamilton Road, Columbus, Franklin County, Ohio (the Subject Property). Any exceptions to, or deletions from, this practice are described in Sections 1.4 and 8.0 of this report. This assessment has revealed no recognized environmental conditions, controlled recognized environmental conditions, or significant data gaps in connection with the Subject Property.

8.0 DEVIATIONS

CEC has performed this Phase I ESA in general conformance with the scope and limitations of the Standard with no identified deletions and no additions.

9.0 REFERENCES

Copies of published sources of information used in preparing this Phase I ESA are included as appendices to this report or referenced within the section of this report where cited.

10.0 QUALIFICATIONS AND SIGNATURES OF ENVIRONMENTAL PROFESSIONALS

This report was prepared by Abigail Bullock and Emily Rastorfer. The report was reviewed by Andrew G. McCorkle. Their qualifications are attached in Appendix J.

We declare that, to the best of our professional knowledge and belief, we meet the definition of an Environmental Professional as defined in 40 CFR 312.10 and we have the specific qualifications based on the education, training, and experience to assess a property of the nature, history, and setting of the Subject Property. We have developed and performed all the appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

APPENDIX B

USER PROVIDED INFORMATION

ASTM E 1527-21
USER QUESTIONNAIRE

In order to qualify for one of the Landowner Liability Protections (LLPs*) offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the "Brownfields Amendments"), the user must conduct the following inquiries required by 40 CFR 312.25, 312.28, 312.29, 312.30, and 312.31. These inquiries must also be conducted by EPA Brownfield Assessment and Characterization grantees. The user should provide the following information to the environmental professional. Failure to conduct these inquiries could result in a determination that "all appropriate inquiries" is not complete.

(1) Environmental liens that are filed or recorded against the subject property (40 CFR 312.25).

Did a search of recorded land title records (or judicial records where appropriate[1]) identify any environmental liens filed or recorded against the subject property under federal, tribal, state or local law?

NO SEARCH WAS DONE

(2) Activity and use limitations that are in place on the subject property or that have been filed or recorded against the property (40 CFR 312.26(a)(1)(v) and (vi)).

Did a search of recorded land title records (or judicial records where appropriate[1]) identify any AULs, such as engineering controls, land use restrictions or institutional controls that are in place at the property and/or have been filed or recorded against the subject property under federal, tribal, state or local law?

NO RECORD SEARCH

(3) Specialized knowledge or experience of the person seeking to qualify for the LLP (40 CFR 312.28).

Do you have any specialized knowledge or experience related to the subject property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the subject property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?

NO KNOWLEDGE

(4) Relationship of the purchase price to the fair market value of the subject property if it were not contaminated (40 CFR 312.29).

a. Does the purchase price being paid for this subject property reasonably reflect the fair market value of the property?

NOT APPLICABLE

b. If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the subject property?

NOT APPLICABLE

1: In certain jurisdictions, federal, tribal, state, or local statutes, or regulations specify that environmental liens and AULs be filed in judicial records rather than in land title records. In such cases judicial records must be searched for environmental liens and AULs.

(5) Commonly known or reasonably ascertainable information about the subject property (40 CFR 312.30).

Are you aware of commonly known or reasonably ascertainable information about the subject property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example,

a. Do you know the past uses of the subject property?

RESIDENTIAL PROPERTY

b. Do you know of specific chemicals that are present or once were present at the subject property?

NOT TO MY KNOWLEDGE

c. Do you know of spills or other chemical releases that have taken place at the subject property?

NOT TO MY KNOWLEDGE

d. Do you know of any environmental cleanups that have taken place at the subject property?

NOT TO MY KNOWLEDGE

(6) The degree of obviousness of the presence or likely presence of contamination at the subject property, and the ability to detect the contamination by appropriate investigation (40 CFR 312.31).

Based on your knowledge and experience related to the subject property are there any obvious indicators that point to the presence or likely presence of releases at the subject property?

NO

The ASTM International, Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process E 1527-21 (the "Standard") also requires that the following be asked of the "user."

Questions about Helpful Documents: Do you know whether any of the following documents exist? If so, identify the title of the report, when it was prepared, and by what firm, and/or provide a copy if within reasonable time and cost constraints. Note that even partial information may be useful.

- Previous environmental site assessment reports,
- Environmental compliance audit reports,
- Environmental permits (i.e., solid waste disposal permits, hazardous waste disposal permits, wastewater permits, NPDES permits, underground injection permits, etc.),
- Registrations for underground and above ground storage tanks,
- Registrations for underground injection systems,
- Safety data sheets (SDS),
- Community right-to-know plan (SARA Title III),
- Safety plans; preparedness and prevention plans; spill prevention, countermeasure, and control plans; facility response plans, etc.,
- Reports regarding hydrogeologic conditions on the property or surrounding area,
- Notices or other correspondence from any government agency relating to past or current violations of environmental laws with respect to the property or relating to environmental liens encumbering the property,
- Hazardous waste generator notices or reports,
- Geotechnical studies,
- Risk assessments, and
- Recorded activity use limitations (AULs).

NO TO ALL OF THE ABOVE LISTED ITEMS

Proceedings Involving the Subject Property: Do you know of:

- any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on, or from the subject property; NO
- any pending, threatened, or past administrative proceedings relevant to hazardous substances or petroleum products in, on, or from the subject property; and NO
- any notices from any governmental entity regarding any possible violation of environmental laws, environmental liens, or possible liability relating to hazardous substances or petroleum products.

NO

What is the reason for performing the ESA (e.g. purchase, refinance, lease, construction loan, etc.)?

CONSTRUCTION

What is your intended use for the subject property?

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527 - 21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E2247 - 23), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E1528 - 22) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

EXECUTIVE SUMMARY

TARGET PROPERTY SEARCH RESULTS

The target property was not listed in any of the databases searched by EDR.

DATABASES WITH NO MAPPED SITES

No mapped sites were found in EDR's search of available ("reasonably ascertainable ") government records either on the target property or within the search radius around the target property for the following databases:

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

EXECUTIVE SUMMARY

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal RCRA generators

RCRA-VSQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-VSQG list, as provided by EDR, and dated 06/02/2025 has revealed that there is 1 RCRA-VSQG site within approximately 0.25 miles of the target property.

Lists of state- and tribal hazardous waste facilities

DERR: The DERR database is an index of sites for which Ohio EPA maintains files. It includes sites with known or suspected contamination, but a site's inclusion in the database does not mean that it is now or has ever been contaminated.

A review of the DERR list, as provided by EDR, and dated 03/21/2025 has revealed that there is 1 DERR site within approximately 1 mile of the target property.

Lists of state and tribal landfills and solid waste disposal facilities

SWF/LF: The Solid Waste Facilities/Landfill Sites records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data come from the Ohio Environmental Protection Agency's Licensed Solid Waste Facilities.

A review of the SWF/LF list, as provided by EDR, and dated 06/30/2025 has revealed that there is 1 SWF/LF site within approximately 0.5 miles of the target property.

Lists of state and tribal leaking storage tanks

LUST: The Leaking Underground Storage Tank Incident Reports contain an inventory of reported leaking underground storage tank incidents. The data come from the Department of Commerce Division of State Fire Marshal's List of Reported Petroleum Underground Storage Tank Release Incidents.

A review of the LUST list, as provided by EDR, and dated 10/17/2025 has revealed that there are 5 LUST sites within approximately 0.5 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 06/02/2025 has revealed that there is 1 RCRA NonGen / NLR site within approximately 0.25 miles of the target property.

UST FINDER RELEASE: US EPA's UST Finder data is a national composite of leaking underground storage tanks. This data contains information about, and locations of, leaking underground storage tanks. Data was collected from state sources and standardized into a national profile by EPA's Office of Underground Storage Tanks, Office of Research and Development, and the Association of State and Territorial Solid Waste Management Officials.

A review of the UST FINDER RELEASE list, as provided by EDR, and dated 06/08/2023 has revealed that there are 5 UST FINDER RELEASE sites within approximately 0.5 miles of the target property.

EXECUTIVE SUMMARY

UST FINDER: EPA developed UST Finder, a web map application containing a comprehensive, state-sourced national map of underground storage tank (UST) and leaking UST (LUST) data. It provides the attributes and locations of active and closed USTs, UST facilities, and LUST sites from states and from Tribal lands and US territories . UST Finder contains information about proximity of UST facilities and LUST sites to: surface and groundwater public drinking water protection areas; estimated number of private domestic wells and number of people living nearby; and flooding and wildfires.

A review of the UST FINDER list, as provided by EDR, and dated 06/08/2023 has revealed that there is 1 UST FINDER site within approximately 0.25 miles of the target property.

GETGO FROM GIANT EAG	***1310 N HAMILTON RD***	***N 1/8 - 1/4 (0.214 mi.)***	***E14***	***37***

E MANIFEST: EPA established a national system for tracking hazardous waste shipments electronically. This system, known as ?e-Manifest,? will modernize the nation?s cradle-to-grave hazardous waste tracking process while saving valuable time, resources, and dollars for industry and states.

A review of the E MANIFEST list, as provided by EDR, and dated 06/02/2025 has revealed that there are 7 E MANIFEST sites within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories

reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there is 1 EDR Hist Cleaner site within approximately 0.125 miles of the target property.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 06/26/2025

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 06/26/2025
Date Data Arrived at EDR: 07/01/2025

Next Scheduled EDR Contact: 01/05/2026
Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 06/26/2025
Date Data Arrived at EDR: 07/01/2025
Date Made Active in Reports: 07/17/2025

Lists of Federal sites subject to CERCLA removals and CERCLA orders

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 05/05/2025
Date Data Arrived at EDR: 06/20/2025
Date Made Active in Reports: 08/27/2025
Number of Days to Update: 68

Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Data Release Frequency: Quarterly

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Lists of Federal RCRA generators

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Lists of state- and tribal hazardous waste facilities

SHWS: This state does not maintain a SHWS list. See the Federal CERCLIS list and Federal NPL list.

State Hazardous Waste Sites. State hazardous waste site records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. Available information varies by state.

State and tribal institutional control / engineering control registries

HIST ENG CONTROLS: Operation & Maintenance Agreements Database

Volunteers that complete a voluntary action that relies on the ongoing operation and maintenance (O&M) of an engineered control to make the site protective (e.g" cap systems and ground water treatment systems) must enter into a legally binding agreement with the Ohio EPA before the director issues a covenant not to sue. This O&M Agreement must describe how the remedy is constructed and how itwill be monitored, maintained and repaired. It also lays out inspection opportunities for the agency. Companies must document that they have the financial capability to operate any remedy relied on, before the agency will agree to enter into the O&M Agreement. The statute requires that the agency be notified of any change in ownership. This database is no longer updated or maintained by the state agency.

Date of Government Version: 05/10/2005

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites
Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

EPA WATCH LIST: EPA Watch List

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

PFAS NPDES: Clean Water Act Discharge Monitoring Information

Any discharger of pollutants to waters of the United States from a point source must have a National Pollutant Discharge Elimination System (NPDES) permit. The process for obtaining limits involves the regulated entity (permittee) disclosing releases in a NPDES permit application and the permitting authority (typically the state but sometimes EPA) deciding whether to require monitoring or monitoring with limits. Caveats and Limitations: Less than half of states have required PFAS monitoring for at least one of their permittees and fewer states have established PFAS effluent limits for permittees. New rulemakings have been initiated that may increase the number of facilities monitoring for PFAS in the future.

PFAS ECHO FIRE TRAIN: Facilities in Industries that May Be Handling PFAS Listing

A list of fire training sites was added to the Industry Sectors dataset using a keyword search on the permitted facilitys name to identify sites where fire-fighting foam may have been used in training exercises. Additionally, you may view an example spreadsheet of the subset of fire training facility data, as well as the keywords used in selecting or deselecting a facility for the subset. as well as the keywords used in selecting or deselecting a facility for the subset. These keywords were tested to maximize accuracy in selecting facilities that may use fire-fighting foam in training exercises, however, due to the lack of a required reporting field in the data systems for designating fire training sites, this methodology may not identify all fire training sites or may potentially misidentify them.

PFAS PT 139 AIRPORT: All Certified Part 139 Airports PFAS Information Listing

Since July 1, 2006, all certified part 139 airports are required to have fire-fighting foam onsite that meet military specifications (MIL-F-24385) (14 CFR 139.317). To date, these military specification fire-fighting foams are fluorinated and have been historically used for training and extinguishing. The 2018 FAA Reauthorization Act has a provision stating that no later than October 2021, FAA shall not require the use of fluorinated AFFF. This provision does not prohibit the use of fluorinated AFFF at Part 139 civilian airports; it only prohibits FAA from mandating its use. The Federal Aviation Administration?s document AC 150/5210-6D - Aircraft Fire Extinguishing Agents provides guidance on Aircraft Fire Extinguishing Agents, which includes Aqueous Film Forming Foam (AFFF).

UST FINDER RELEASE: UST Finder Releases Database

US EPA's UST Finder data is a national composite of leaking underground storage tanks. This data contains information about, and locations of, leaking underground storage tanks. Data was collected from state sources and standardized into a national profile by EPA's Office of Underground Storage Tanks, Office of Research and Development, and the Association of State and Territorial Solid Waste Management Officials.

UST FINDER: UST Finder Database

EPA developed UST Finder, a web map application containing a comprehensive, state-sourced national map of underground storage tank (UST) and leaking UST (LUST) data. It provides the attributes and locations of active and closed USTs, UST facilities, and LUST sites from states and from Tribal lands and US territories . UST Finder contains information about proximity of UST facilities and LUST sites to: surface and groundwater public drinking water protection areas; estimated number of private domestic wells and number of people living nearby; and flooding and wildfires.

PFAS: PFOA & PFOS Site Listing

PFAS have been widely used in numerous industrial and residential applications since the 1950a??s. Their stability and unique chemical properties produce waterproof, stain resistant, and nonstick qualities in products. They are found in some firefighting foams and a wide range of consumer products such as carpet treatments, non-stick cookware, water-resistant fabrics, food packaging materials, and personal care products.

HIST USD: Urban Setting Designations Database

A USD may be requested for properties participating in the VAP when there is no current or future use of the ground water by local residents for drinking, showering, bathing or cooking. In these areas, an approved USD would lower the cost of cleanup and promote economic redevelopment while still protecting public health and safety. If these USDs were to be approved, the ground water cleanup or response requirements for the areas could be lessened. The Ohio EPA director may approve a USD request based on a demonstration that the USD requirements are met and an evaluation of existing and future uses of ground water in the area. The Ohio EPA director's decision on approval or denial of the request is needed before cleanup requirements for the site can be determined. This database is no longer updated or maintained by the state agency.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants
The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

Version Date:	2019
West Map:	14405643 NORTHEAST COLUMBUS, OH
Version Date:	2019

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

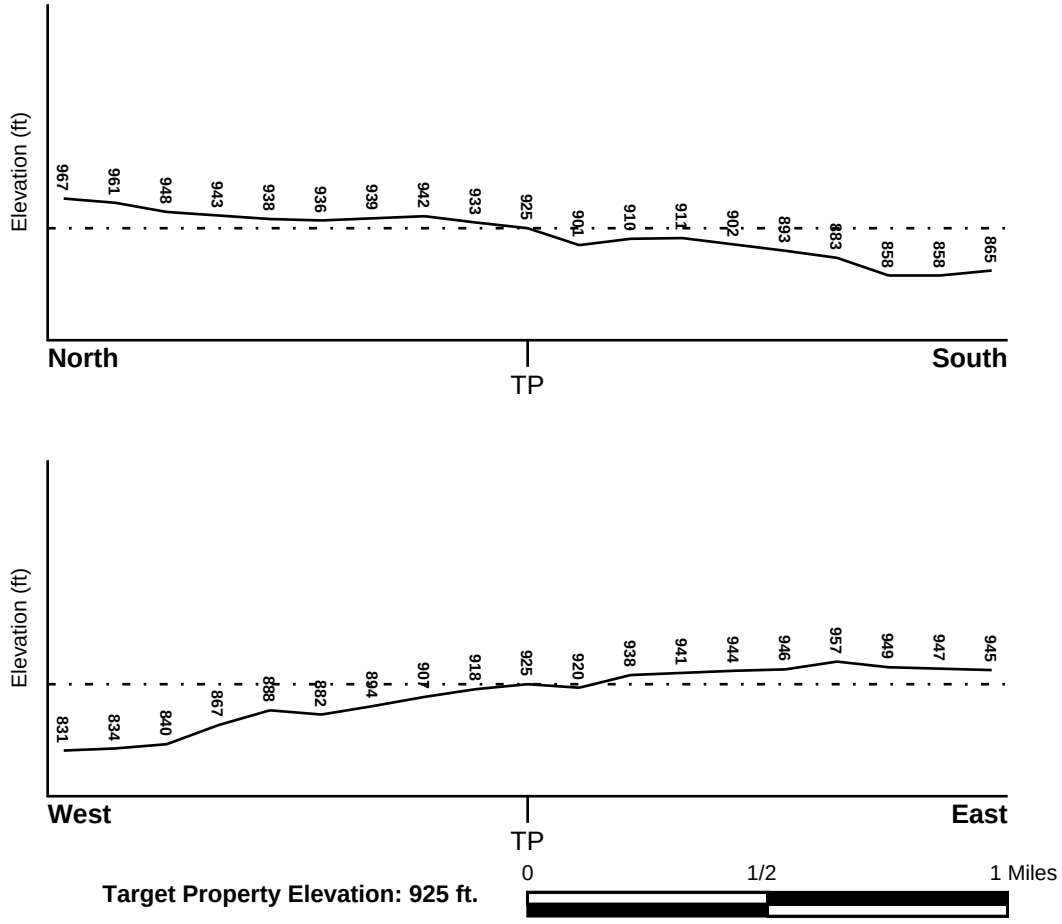
TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General SW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES



Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
39049C0211K	FEMA FIRM Flood data

Additional Panels in search area:	FEMA Source Type
39049C0203K	FEMA FIRM Flood data
39049C0192K	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
NEW ALBANY	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era:	Paleozoic
System:	Mississippian
Series:	Mississippian
Code:	M *(decoded above as Era, System & Series)*

GEOLOGIC AGE IDENTIFICATION

Category: Stratified Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: Bennington

Soil Surface Texture: silt loam

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Somewhat poorly drained

Hydric Status: Unknown

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 31 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	9 inches	silt loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 1.41 Min: 0.42	Max: 8.4 Min: 7.4
2	9 inches	35 inches	silty clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 1.41 Min: 0.42	Max: 8.4 Min: 7.4
3	35 inches	70 inches	loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 1.41 Min: 0.42	Max: 8.4 Min: 7.4

Soil Map ID: 2

Soil Component Name: Alexandria

Soil Surface Texture: silt loam

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Well drained

Hydric Status: Unknown

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information

	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	7 inches	silt loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 4.23 Min: 1.41	Max: 8.4 Min: 7.4
2	7 inches	42 inches	silty clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 4.23 Min: 1.41	Max: 8.4 Min: 7.4
3	42 inches	70 inches	loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 4.23 Min: 1.41	Max: 8.4 Min: 7.4

Soil Map ID: 3

Soil Component Name: Medway

Soil Surface Texture: silt loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Moderately well drained

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 69 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	14 inches	silt loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Clayey sand.	Max: 42.34 Min: 4.23	Max: 8.4 Min: 6.6
2	14 inches	29 inches	loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Clayey sand.	Max: 42.34 Min: 4.23	Max: 8.4 Min: 6.6
3	29 inches	70 inches	gravelly sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Clayey sand.	Max: 42.34 Min: 4.23	Max: 8.4 Min: 6.6

Soil Map ID: 4

Soil Component Name: Cardington

Soil Surface Texture: silt loam

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Moderately well drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 76 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil

2	5 inches	33 inches	silty clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 4.23 Min: 1.41	Max: 8.4 Min: 7.4
3	33 inches	70 inches	clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 4.23 Min: 1.41	Max: 8.4 Min: 7.4

Soil Map ID: 5

Soil Component Name: Pits

Soil Surface Texture: silt loam

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class:
Hydric Status: Unknown

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

No Layer Information available.

Soil Map ID: 6

Soil Component Name: Pewamo

Soil Surface Texture: silty clay loam

Hydrologic Group: Class B/D - Drained/undrained hydrology class of soils that can be drained and are classified.

Soil Drainage Class: Very poorly drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 15 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	12 inches	silty clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 4.23 Min: 1.41	Max: 8.4 Min: 7.4
2	12 inches	50 inches	clay	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 4.23 Min: 1.41	Max: 8.4 Min: 7.4
3	50 inches	70 inches	clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 4.23 Min: 1.41	Max: 8.4 Min: 7.4

Soil Map ID: 7

Soil Component Name: Alexandria

Soil Surface Texture: silt loam

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Well drained

Hydric Status: Unknown

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005, 2010 and 2015 from the U.S. Fish and Wildlife Service.

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

STATE RECORDS

Public Water System Data
Source: Ohio Environmental Protection Agency
Telephone: 614-644-2752
The database includes community, transient non-community and non-transient non-community water wells; and source treatment unit locations.

Water Treatment Facilities

Subject: FD Public Records Request - 4530 N Hamilton Road (CEC 356-939)

Good morning,

Civil & Environmental Consultants, Inc. (CEC) is conducting a Phase I Environmental Site Assessment of the property located at 4530 N Hamilton Road in Columbus, Ohio (the "Subject Property"). The Franklin County Parcel ID is 027-000002-00.

As part of due diligence activities, CEC contacts local agencies to inquire whether files are available that indicate potential environmental impacts on the Subject Property or surrounding properties. Therefore, CEC is requesting records of any current or former petroleum underground storage tanks (USTs) and/or aboveground storage tanks (ASTs), fires, or other potential environmental concerns for the Subject Property or surrounding properties including any complaints, violations, spills, dumps, etc.

Please let me know if you have any questions.

Thank you,

Kristen Gill | *Project Scientist*

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Civil & Env Consultants were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Certified Sanborn Results:

Certification # 58DC-4CF6-902F

PO # NA

Project 356-939

UNMAPPED PROPERTY

This report certifies that the complete holdings of the Sanborn Library, LLC collection have been searched based on client supplied target property information, and fire insurance maps covering the target property were not found.

Sanborn® Library search results

Certification #: 58DC-4CF6-902F

The Sanborn Library includes more than 1.2 million fire insurance maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow and others which track historical property usage in approximately 12,000 American cities and towns. Collections searched:

- ☑ Library of Congress
- ☑ University Publications of America
- ☑ EDR Private Collection

The Sanborn Library LLC Since 1866™

Limited Permission To Make Copies

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at approximately five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1923 through current. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

Summary information obtained is provided in the text of this report.

RECORD SOURCES

The EDR City Directory Report accesses a variety of business directory sources, including Haines, InfoUSA, Polk, Cole, Bresser, and Stewart. Listings marked as EDR Digital Archive access Cole and InfoUSA records. The various directory sources enhance and complement each other to provide a more thorough and accurate report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer.

QUALIFICATIONS OF CEC PERSONNEL

Abigail M. Bullock
Staff Scientist

2 YEARS OF EXPERIENCE

EDUCATION

B.S., Environmental Science / Geology, Edinboro University, 2020

Abigail Bullock is a staff scientist based out of CEC's Columbus, Ohio office. Ms. Bullock has a degree in Enviornmental Geology and experience as a geotechnical engineer testing soil, concrete, asphalt, and inspecting steel and utility installations. Since joining CEC, Ms. Bullock has diversified the types of projects she assists on to include Phase I Enviornmental Site Assessments, groundwater and compliance monitoring at solid and hazardous waste landfills, explosive gas monitoring, NPDES sampling, vapor intrusion investigations, and technical report writing.

PROJECT EXPERIENCE

Groundwater Monitoring and Reporting Activities, Multiple Sites, Ohio
Role: Staff Scientist
Performed groundwater sampling on dozens of petroleum and PFAS contaminated sites. These sites included gas stations, commercial properties, residential properties, landfills, and manufacturing facilities. Assisted with data entry of analytical results, potentiometric maps, and the technical writing of reports.

Phase I Environmental Site Assessments, Multiple Sites, Ohio
Role: Staff Scientist
Ms. Bullock assists with Phase I ESAs in accordance with most up to date ASTM standard for various clients requiring assistance during commercial real estate transactions or site development. Responsibilities include site reconnaissance, historical and government records review, government inquiries, interviews, and report authoring.

NPDES Monitoring Programs, Multiple Sites, Ohio
Role: Staff Scientist
Ms. Bullock conducts quarterly stormwater sampling, visual assessments of industrial stormwater, and routine facility inspections required by the NPDES Multi-Sector General Permit (MSGP) for multiple facilities in Ohio.

AMP SPCC Inspections, AMP, American Municipal Power, Inc., Ohio
Role: Staff Scientist
Assisted field technician with monthly SPCC on-site inspections for the Reciprocating Internal Combustion Engine, Combustion Turbine, and Behind the Meter Facilities for the Ohio North and West AMP route. Inspections are carried out to evaluate the site conditions related to fuel storage, levels, and possible spills. Any SPCC issues while on-site are reported directly to the client and on the AMP-provided field checklist forms.

Explosive Gas Monitoring, Multiple Sites, Ohio
Role: Staff Scientist
Ms. Bullock assists with explosive gas monitoring (EGM) fieldwork, data collection and reporting activities for municipal solid waste landfills. This information is incorporated into a report for submittal to the Ohio EPA.

EXPERTISE

- Phase I Enviornmental Site Assessments
- Groundwater Sampling & Monitoring per BUSTR
- Soil Sampling & Classification
- Vapor Pin Monitioring
- SPCC Inspections
- Explosive Gas Monitoring
- Concrete & Asphalt Testing
- Steel & Utility Inspections

CERTIFICATIONS

- 40-Hour OSHA HAZWOPER, Safety Unlimited, Inc.
- Basic Blueprint Reading, The Ohio Building Officials Association
- Nuclear Gauge Safety & USDOT HAZMAT Certification, APNGA
- ACI Concrete Field Testing Technician - Grade 1, American Concrete Institute

TRAINING

- ASTM Phase I Environmental Site Assessments for Commercial Real Estate Course

Emily A. Rastorfer

Project Manager II

11 YEARS OF EXPERIENCE

EDUCATION

A.A.S., Geology and Environmental Science, Hocking College, 2013

Ms. Rastorfer is an environmental professional, specializing in environmental due diligence for property transactions, including Phase I and Phase II Environmental Site Assessments (ESAs). She has assessed a diverse range of properties, from vacant land and multi-unit residential sites to commercial facilities such as gasoline stations, automobile dealerships, and manufacturing plants. Ms. Rastorfer is also experienced in Ohio's Voluntary Action Program (VAP) and conducting underground storage tank (UST) closure assessments in compliance with Bureau of Underground Storage Tank Regulations (BUSTR).

Ms. Rastorfer routinely conducts Phase I ESAs following the latest ASTM standard, helping clients identify environmental liabilities and meet due diligence requirements during real estate transactions or site development. She collaborates with clients to assess their risk tolerance and ensure early identification of potential recognized environmental conditions (RECs) or other potential environmental concerns. In addition, Ms. Rastorfer has managed numerous Phase II ESAs, developing scope of services, overseeing project logistics (including subcontractor coordination and health & safety planning), and conducting field investigations (soil borings, groundwater, and air sampling). She supervises data analysis and communicates findings and recommendations to clients.

EXPERTISE

- Phase I Environmental Site Assessments
- Phase II Subsurface Investigations
- Records Search with Risk Assessments
- Transaction Screen Assessments
- Environmental Reviews for HUD Assisted Projects
- Underground Storage Tank Removal
- Ohio Voluntary Action Program

CERTIFICATIONS

- 40-Hour OSHA HAZWOPER, Occupational Safety & Health Administration

TRAINING

- ASTM Phase I Environmental Site Assessments for Commercial Real Estate Course
- ASTM Phase II Environmental Site Assessment Process Course
- HUD Web-Based System Instructional System for Environmental Reviews

PROJECT EXPERIENCE

Pumphouse District, Ashland, Ohio

Role: Project Manager

Led the environmental assessment of a former industrial property in Ashland, Ohio, for a private developer and the City of Ashland, planned for redevelopment into an apartment complex and public park. Initial activities included Phase I ESA, Phase II Subsurface Investigation, a ground penetrating radar (GPR) survey, and exploratory excavation to identify potential underground storage tanks (USTs). These investigations identified one UST that had been abandoned in place. Ms. Rastorfer successfully coordinated the UST removal and prepared a closure assessment in compliance with BUSTR requirements. The closure assessment revealed soil contamination above BUSTR closure action levels, prompting additional BUSTR-required assessments. Ms. Rastorfer led the Tier 1 Investigation and delineation activities to further evaluate the contamination. Based on Tier 1 findings, removal of impacted soils was determined to be the most efficient path to closure under BUSTR guidelines. Ms. Rastorfer prepared a sampling and analysis plan and coordinated the removal of impacted soils, along with additional sampling and preparation of an Interim Response Action (IRA) report.

Former Vertiv Property, Columbus, Ohio

Role: Project Manager

Completed UST removal activities at an industrial property for a private investor acquiring the site. Coordinated and supervised the removal of a 20,000-gallon underground storage tank (UST), including soil screening, and sample collection. Reviewed and interpreted analytical data and prepared and submitted the closure assessment to BUSTR on June 8, 2023. BUSTR issued the No Further Action (NFA) letter for the closure on June 28, 2023.

Emily A. Rastorfer
Project Manager II

Gateway Corporate Center, Elyria, Ohio

Role: Project Manager
Assisted with various stages of investigation for a large industrial property in Elyria, Ohio that was being evaluated under the Ohio VAP. The property has been developed for industrial/manufacturing purposes since as early as 1874; with the current on-site structures developed between 1900 and 1980. Ms. Rastorfer coordinated soil, groundwater, sub-slab soil vapor, and indoor air sampling events and assisted with the management and tabulation of analytical data, and preparation of the Phase II Property Assessment report and NFA letter.

Former American Commodore Tuxedo, South Euclid, Ohio

Role: Project Manager
Assisted with implementation of various stages of investigation at a former commercial/industrial facility in South Euclid, Ohio. The facility formerly housed the American Commodore Tuxedo showroom, warehouse, and cleaning facility. The project was completed for a private developer that demolished the existing building, completed a remedial soil removal, and built a new public storage facility during the investigation. The project followed Ohio VAP protocol, including the installation of soil borings, sub-slab soil vapor ports, and soil vapor probes, and corresponding sample collection. The project also included a limited, site-specific risk assessment. CEC also provided remedial oversight services during the soil removal and site redevelopment. Ms. Rastorfer assisted with field investigations including the installation of soil-vapor probes and sub-slab vapor pins for collection of soil vapor samples, management of analytical data, and was the primary author of the Phase II Property Assessment report and NFA letter.

Former School Property, Carrollton, Ohio

Role: Project Manager
Led the completion of an expedited Phase I Environmental Site Assessment to meet a tight deadline for a Brownfield grant application through the Ohio Department of Development (ODOD). The client, the Board of Commissioners of Carroll County, Ohio, was applying for grant funding to support the abatement of asbestos-containing materials (ACM) at a former school building in Carrollton, Ohio. Ms. Rastorfer expedited the process, delivering the report within approximately one week and ensuring all requirements were met. The successful completion of the assessment contributed to the project being awarded the grant.

Grant Management Services, Delaware County, Ohio

Role: Project Manager
Provided grant administration services to Delaware County for active and pending grants awarded as part of the Ohio Department of Development (ODOD) Brownfield Remediation Program (BRP) and Building Demolition and Site Revitalization Program (BDSRP). Ms. Rastorfer assisted the County with resolving application questions from ODOD, prepared quarterly progress reports and reimbursement requests throughout the duration of each grant, and coordinating new grant applications. Associated tasks included preparing narrative summaries, budget updates, and coordinating project communication between the County, property owners, subconsultants, and contractors.

Desktop Review, Multiple Sites

Worked as part of a team consisting of individuals across multiple offices at CEC to prepare desktop review of over 300 sites across the U.S. The project was confidential and completed on an expedited timeline. Responsibilities included reviewing a database report and historical sources to identify any potential environmental concerns associated with the Subject Property and surrounding properties.

HUD Environmental Reviews*[1]

Assisted Responsible Entities in preparing Environmental Reviews for HUD-assisted projects to ensure proposed projects did not negatively impact the surrounding environment and that the property site itself would not have an adverse environmental or health effect on end users. Reviews included preparation of the environmental review record and documenting compliance with Federal related laws and authorities listed at 24 CFR 50.4, 58.5, and 58.6 through the HUD Environmental Review Online System (HEROS).

** Work Performed prior to joining CEC*

Emily A. Rastorfer

Project Manager II

Environmental Reviews for Public Housing Agencies*

Prepared Environmental Reviews on behalf of public housing agencies in accordance with the applicable funding source standard such as the Ohio Housing Trust Fund (OHTF) and National Housing Trust Fund (NHTF). Reviews included coordinating with developers, conducting a review of prior Phase I Environmental Site Assessments and other supporting environmental studies or investigations, performing site visits, and documenting compliance with the applicable funding source standard. Project sites ranged from multi-family development projects to numerous scattered single-family housing projects.

Desktop Noise Assessment*

Conducted several desktop noise analyses on properties receiving state or federal funding in accordance with HUD's noise standards at 24 CFR Part 51, Subpart B. Evaluation included the identification of potential noise generators in the vicinity of the project and determining if the calculated combined day-night average sound level (DNL) was Acceptable, Normally Unacceptable or Unacceptable. If Normally Unacceptable or Unacceptable, coordinated with developers to identify noise attenuation requirements.

Peer Review of Environmental Site Assessments*

Conducted peer reviews of Phase I Environmental Site Assessment reports prepared by other consultants on behalf of various clients. Provided an opinion as to the completeness of the reports, findings, and their adherence to ASTM E1527-13 "Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process" and/or client-specific requirements.

Andrew McCorkle
Principal

35 YEARS OF EXPERIENCE

EDUCATION

B.A., Geology, The Ohio State University, 1985

EXPERTISE

- State and Federal Underground Storage Tank Regulations
- Ohio Voluntary Action Program
- Ohio Solid Waste Regulations
- Phase I/II Environmental Site Assessments
- State and Federal Brownfields
- Contaminant Fate and Transport
- Subsurface Remedial Techniques
- NPDES
- Health and Safety

CERTIFICATIONS

- Certified Professional Geologist, American Institute of Professional Geologists

Mr. McCorkle has more than 30 years leadership experience in the environmental industry, including six years environmental management for a major oil company, more than 25 years project/program management for international consulting firms, and two years geotechnical field experience. He has expertise in hydrocarbon/ petrochemical investigation and remediation, large-scale environmental project management, federal and state environmental regulations, risk-based corrective action, environmental/risk communication, legal issues related to contaminated property, and hydrogeologic data interpretation.

PROJECT EXPERIENCE

Litigation Support

Former Dry Cleaner, Confidential, Cincinnati Hamilton, OH

Role: Expert Witness

Provided expert witness support for plaintiff's attorney in litigation concerning a property contaminated with perchloroethylene. Prepared expert report in support of the plaintiff's claim that contamination was caused by the most recent dry cleaning operation, not a prior dry cleaner or some other unknown source. The case settled prior to trial.

Former Service Station, Confidential, Grandview Heights Franklin, OH

Role: Technical Reviewer

Provided litigation support during a complex state enforcement action related to contamination from a former service station. Support was provided to counsel in defense of an investor-owner whose sole interest in the property was as landlord. The support included, among other things, providing review and expert opinions on the adequacy of subsurface investigations and proposed remedial approaches to address contamination from the former service station. Franklin County Court of Common Pleas, Case No. 10 CV 007231, Ohio State Attorney General Richard Cordray v. National Properties, Inc.

Wastewater Treatment Plant-Land Application Management Plan Dispute, T&R Properties, Delaware, Ohio

Role: Expert Witness

Provided expert witness testimony by deposition on behalf of the plaintiff concerning the operation of a wastewater treatment plant and land application of wastewater onto a golf course. Services included review and opinions concerning Permit to Install (PTI) documents submitted to Ohio EPA and a Land Application Management Plan (LAMP) approved by Ohio EPA. Delaware County Court of Common Pleas, Case No. 16CV H 08 0532, Delaware Golf Club, LLC v. Dornoch Estates Homeowners Association, Inc. et. al.

Apartment Community on C&DD Landfill, Marble Cliff Crossing Apartments, LLC, Columbus Franklin, OH

Role: Expert Witness

Expert Witness testimony in support of debtor-in-possession during a complex bankruptcy that centered on an apartment complex constructed over Construction and Demolition Debris (C&DD) fill. Testimony included estimates of the technical feasibility of potential remedial options to mitigate potential hazards from methane accumulation under the site, estimated costs to complete the remediation, and the likelihood of success after initiation of the remediation. The bankruptcy was discharged and the parties were

allowed to reach a settlement agreement. US Bankruptcy Court, Southern District of Ohio, Eastern Division Case No. 11-61545, Marble Cliff Crossing Apartments, LLC, Debtor.

Petroleum Refiner and Marketer*
As Regional Environmental Manager for a major US petroleum refiner/marketer, Mr. McCorkle was called upon to provide expert witness testimony in several cases related to soil and groundwater contamination from petroleum underground storage tanks (USTs). In each of those cases, testimony was provided in defense of the company related to the fate and transport of gasoline or other contaminants in soil and or groundwater, the reasonableness of various remediation methods, and the estimated costs to complete the remediation.

Canton Drop Forge, Canton, Stark County, Ohio (2019), McMahon DeGulis
Role: Expert Witness
Prepared expert report and provided testimony at deposition in support of Plaintiff with respect to remediation and impacts to groundwater associated with former operation of ponds that managed oil and water from the facility operation. Remedial action was performed pursuant to a 3008(a) order from US EPA and Ohio EPA. US District Court, Northern District Of Ohio, Case Number 5:18cv01253, Canton Drop Forge v. Travelers Insurance

Manufacturing Facilities / Power Generation
Steel Manufacturing, Groundwater Investigation, Arcelor Mittal, Georgetown, SC
Project Manager for subsurface investigation at a steel plant in the Coastal Plain region of South Carolina. The investigation included evaluation of groundwater flow direction and quality to address concerns for potential on-site migration of contaminants from an off-site. The investigation included collection and analysis of soil and groundwater samples, plus hydrocarbon fingerprinting analysis to identify potential sources of contaminants. Results of the Phase II ESA activities identified the presence of contaminants from multiple sources, and the outcome of the investigation determined that further work is warranted to assess the distribution of the contaminant plume(s) and to evaluate risk to potential environmental receptors.

Hazardous Waste Post-Closure Plan, Kenton, OH*
Project Manager for post-closure plan implementation for two former hazardous waste surface impoundments at a facility in Kenton, Ohio. The project included post-closure monitoring pursuant to approved Post-Closure Plans for each facility. The scope of work also included evaluating alternatives for shortening the post-closure care period and negotiating with the Ohio EPA to develop an approach for moving toward ending post-closure care.

Power Plant Demolition Support, Marietta, OH
Principal-in-Charge/Client Manager for an evaluation of waste materials disposal options and Asbestos-Containing Materials (ACM) survey prior to demolition of a 212 megawatt (MW), pulverized coal-fired co-generation station. The plant included four coal fired electric generating units with one common stack, electrostatic precipitators, switchyard, coal storage and handling, fly ash silos, and three ponds for bottom ash, and a small waste water treatment plant. Subsequent to demolition, the facility was re-purposed as a materials handling facility for off-loading river barges. Additional tasks included evaluation and submittal of the NPDES renewal, which included an Antidegradation Demonstration based on the change in use for the facility.

Wastewater Treatment*
Project Manager for addition of a plate-and-frame filter press to the waste water treatment plant (WWTP) for a major manufacturing facility in Marion Ohio. The prior configuration of the WWTP included one filter press that was operating at near capacity. The addition of the second filter press allowed for additional capacity to process waste sludge during peak times. The project included an evaluation of a previous feasibility study for the addition of a second filter press, development of a design layout for installing the press within the existing building, and development of design drawings for the facility to use during its bidding and construction process.

Compliance Audits
Project Manager for numerous facility compliance audits to assess compliance with federal, state, and/or local environmental regulations, which included air, sewer, storm water, solid waste, hazardous waste, universal waste, community right-to-know reporting, hazardous materials handling, Toxic Substance Control Act (TSCA), emergency response, and other environmental regulations. The types of facilities audited included solid waste transfer facilities, slag processing facilities, electronic waste (e-waste) facilities, solid waste landfills, and construction & demolition debris (C&DD) landfills.

Andrew McCorkle
Principal

Environmental Permitting Support
Client Manager for a major manufacturing facility in Northwest Ohio. The primary focus of environmental issues at the facility related to negotiation of reasonable terms for the facility's Title V permit. Other environmental issues relate to Leaking USTs, an aging wastewater treatment plant, SPCC Plans, Facility Response Plans, and NPDES Permitting.

Stormwater
Project Manager/Principal for preparation of numerous Stormwater Pollution Prevention Plans (SWPPPs) to comply with requirements of Ohio EPA's Multi-Sector General Industrial Stormwater Permit (MSGP). Responsibilities included evaluating applicability of various types of facilities with respect to permitting under the MSGP, directing staff in the preparation of multiple plans, and performing overall quality assurance reviews of the SWPPPs.

Real Estate Transactions / Environmental Due Diligence
Methane Remediation
Principal-in-Charge of remediation of an apartment complex that was constructed over Construction and Demolition Debris (C&DD) fill. Phase I and Phase II activities showed that as much as 45% by volume methane and other landfill gases were present in the soil vapor beneath the buildings. Principal activities included interfacing with attorneys in coordination with agencies, public notice, and a complicated bankruptcy. Led and interfaced with engineers, contractors, and attorneys on the design of the remediation system.

Environmental Site Assessments
Client Manager for a national developer, owner and operator of grocery-anchored and community shopping centers. Services included Phase I/ Phase II Environmental Site Assessments (ESAs) for potential acquisitions or divestments, assisting with review and critical evaluation of prior environmental documents, typically prepared by an owner/seller, during evaluation of potential acquisitions, and development of cost estimates for remediation at sites with known environmental issues.

Remedial Options Consulting
Project Manager for potential purchaser due diligence at a Clean Ohio Revitalization Fund (CORF) project in Cincinnati, Ohio. The project included review/evaluation of previous Phase I/Phase II assessment work and proposed remedial techniques for chlorinated hydrocarbons. Advised client and outside counsel on property conditions to successfully negotiate more favorable cleanup standards.

Grant Applications and Environmental Site Assessments
Project Director for implementation of the USEPA Brownfield Assessment Grant at the All-Quip/Weir City Zinc Property. The property is a former zinc smelter that ceased operation in the 1920s. The USEPA Grant funded $200,000 for hazardous substance investigations at the property. Assisted the City of Pittsburg with preparation and submittal of the grant application, and directed the work under the award, which included a Phase I ESA, Phase II ESA, Corrective Action Plan preparation, Public Education and Outreach, access agreement negotiations, and quarterly report preparation.

Retail Commercial Property
Account Manager for environmental due diligence with a national retail commercial property management firm. Responsible for directing multiple Phase I/II Environmental Site Assessments throughout the Midwest and advising corporate environmental staff as well as outside counsel on environmental risks.

Petroleum Refiner and Marketer
As Environmental Manager for a major petroleum refiner, assisted real-estate representatives and in-house attorneys with environmental issues on property transfers including right-of-access issues and negotiations for acquisitions and divestments.

Solid Waste Facilities
Groundwater Remediation
Project Manager for evaluation and upgrade of a groundwater remediation system at a solid waste landfill in north-central Indiana. The purpose for the recovery and treatment system was to address groundwater exceedances beneath the landfill, including arsenic, ammonia, chloride, and volatile organic compounds (VOCs). The recovery system's objective was to control groundwater flow in the area and prevent off-site migration of constituents of concern. Review of information indicated that control of groundwater could not

be demonstrated because certain wells were terminated above the water-bearing zone and others were only pumping intermittently. Recommendations were made for further evaluation of shallow groundwater and modifications to deepen certain pumping wells. Those recommendations are currently being implemented.

Landfill Post-Closure Maintenance

Project Manager for Post-Closure Operation and Maintenance Activities at the North Cove Landfill in Toledo, Ohio. The North Cove Landfill is a closed landfill that was used for waste generated from an adjacent automobile assembly plant. In 1973, the Ohio Department of Transportation (ODOT) constructed a portion of Interstate I-75 over the landfill and the U.S. Army Corps of Engineers realigned the channel of the Ottawa River along the landfill and I-75. Responsible for managing all activities associated with the Operations and Maintenance Plan for Post-Closure Activities including field inspections and sampling, reporting, as well as coordinating with the responsible parties for the former landfill, including ODOT, the City of Toledo, and a major U.S. automobile manufacturer.

Groundwater Monitoring

Project Manager for Groundwater Monitoring at the Preble County Sanitary Landfill in Eaton, Ohio. Monitoring activities included semi-annual detection monitoring, compliance monitoring due to the detection of sodium and chloride in one well, and assessment monitoring because of the detection of volatile organic compounds (VOCs) in shallow groundwater. The scope of the work also included additional drilling and sampling to determine the source for the VOCs. Based on the results of the assessment, the source for constituents in the shallow groundwater was the presence of landfill gas in a leachate collection trench. A corrective measures plan was developed and implemented to control the landfill gas.

Superfund

PRP Representation Support

Technical Committee Member representing Sunoco for investigation and remediation of the Dura Avenue Landfill in Toledo, Ohio. Sunoco was a PRP at the 70 acre Dura Avenue facility that was used for waste disposal from 1952 to 1980. The site accepted industrial and commercial wastes until 1968. After significant levels of PCBs were discovered in the Ottawa River, a remedial program was initiated in 1993. Responsibilities included attending Technical Committee meetings and coordinating with legal counsel regarding consultants' work on the project.

Underground Storage Tanks

Remedial Investigations

Consultant Program Manager for two major oil companies. Responsible for directing Project Managers conducting multiple concurrent remedial investigations at more than 100 LUST sites throughout Ohio. Overall responsibility for client satisfaction including budgetary issues, QA/QC, compliance, and seeking reimbursement from the state petroleum fund.

Environmental Liability Management

Environmental representative for a major US petroleum refiner and marketer. Responsible for managing more than $2 Million annual long-term environmental liability at more than 200 retail, terminal, and pipeline locations in Ohio, Kentucky, Indiana, West Virginia, Louisiana and Texas. Responsibilities included annual budgeting, retaining environmental consultants to perform assessments and remedial activities, critically evaluating their work, and negotiating with state regulators on compliance issues.

Environmental Remediation

Project Coordinator for removal of a satellite fueling system and remediation of a Jet-A fuel release at Cleveland Hopkins International Airport. Responsible for reviewing and critically evaluating remedial approaches, negotiating and coordinating with Airport personnel with respect to investigative and remedial approaches, developing and implementing the final remedial approach.

Portfolio Manager - BP

Consultant Portfolio Manager for three portfolios of long-term environmental liability sites: Northern Ohio and two in Illinois (Lake County and Southern Illinois-on temporary assignment during Portfolio Manager replacement). Responsible for directing Project Managers conducting multiple concurrent remedial investigations at more than 50 release sites in each portfolio. Developed and presented Portfolio Spend, Forecasts, and Work Release Requests to BP ERM (Environmental Remediation Management). Conducted BWT (Basic Work Team) meetings, developed and oversaw Key Performance Indicators (KPIs) for the consultant team including site visits, safety behavior discussions, near-miss reporting, and Peer Assist reviews, and directed input/uploading site-specific information into ENFOS. Presented safety topic at ERM annual meeting.

Andrew McCorkle
Principal

Regional Environmental Manager - Sunoco
Environmental representative for Sunoco. Responsible for managing more than $2 Million annual long-term environmental liability at more than 200 retail, terminal, and pipeline locations in Ohio, Kentucky, Indiana, West Virginia, Louisiana and Texas. Responsibilities included annual budgeting, retaining environmental consultants to perform assessments and remedial activities, critically evaluating their work, and negotiating with state regulators on compliance issues.
