**Re: Professional Services Proposal for
Taylor Road Plan Revision:**

Dear Mr. Christian:

Thank you for the opportunity to discuss the above referenced project with you. We are pleased to submit this proposal to be part of your team, working toward the successful completion of this project.

We propose to provide professional services in accordance the following.

Purpose:

To extend the culvert at Station 9 + 96 and reduce the ditch depths between stations 8 + 00 to 12 + 00 on the left side. This will eliminate the guardrail on the left and create a yard section storm sewer.

Plan Changes and Additions:

These changes will involve engineering and Cad changes on the following sheets:

- 2 - General Summaries
- 2 - Plan & Profile Sheets
- 7 - Cross-sections
- 1 - Culvert Detail (New)
- 1- Property Map
- 1- Right-of-Way Plan Sheet
- 2- Legal Descriptions
- Storm Sewer (New)

EXHIBIT A

These changes will require the addition of a culvert detail which had been shown on the cross-sections. It now must be detailed because the culvert is being extended an additional 15' to allow room for a 30' clear zone. The clear zone is required when there is no guard rail.

This additional culvert length will now be skewed to allow it to align with the existing creek channel. A new culvert will now be required in a different location since it will be skewed with the roadway.

Fee:

Franklin's fee to complete the tasks as outlined above is \$6,870. This includes the costs of Franklin's labor and overhead; however, this fee does not include reimbursable expenses. Reimbursable expenses will be invoiced at cost.

Please contact me if you have any questions regarding this proposal. We at Franklin | CT Consultants, Inc. look forward to the opportunity to provide these professional services.

Sincerely,
Franklin | CT Consultants, Inc.

Steven R. Brown, P.E.
President
