Re: **Proposal for Engineering Services**
2003 Street Repair Program
Improvement #838

Dear Mr. Wetherholt:

Per your request, we are pleased to submit our proposal to provide engineering services for the preparation of construction documents, general construction engineering, resident project representation, and material testing for the 2003 Street Repair Program.

Engineering services for the preparation of construction documents for bidding the 2003 Street Repair Program included several visits to all streets within the program, preparing an estimate of all quantities required to repair the streets, identification of ADA compliant curb ramps included in the program, the preparation of detailed specification, and a final construction estimate. The total cost of engineering services for the preparation of construction bidding documents is a lump sum of \$8,000.

The cost of engineering services during construction of the program shall not exceed \$53,000 for a construction period of 16 weeks. Engineering services during construction will be invoiced based upon payroll costs for the actual discipline hours expended on the project, times a multiplier of 2.10, plus material testing costs times a factor of 1.10, and reimbursable expenses.

We appreciate the opportunity to submit this proposal and should you have any questions or need additional information, please call us.

Sincerely,

STILSON CONSULTING GROUP, LLC

William E. Stilson, P.E.
President
