Dear Mike,

Couple of comments:

1. Thank you for adding the requirement for sidewalks along driveways to connect public sidewalks to businesses. See 1109.01(b)(2) on page 67 of the draft. I am tired of having to walk either in the mud or fight cars on the driveway to enter our Gahanna post office when I park across the street at Shull Park or on Lincoln Circle itself.
2. SUGGESTION: Add a paragraph under 1109.01 titled "Traffic Circulation Signage" to require that internal signs which designate "STOP", "YIELD", "ONE WAY" and "DO NOT ENTER" meet the requirements of the *Manual on Uniform Traffic Control Devices for Streets and Highways* regarding size, reflectivity and posting. My suggestion is based on Stoneridge shopping center and their four way stop in the middle. Their fancy wood stop signs are very difficult to see at night, especially during rain. I've seen cars go through during the night hours. And I would guess that standard highway signs would cost less than their home made wooden ones. I've written the property manager over the years but was ignored. And now, the library has spent a mint on tiny yield signs that are posted so low to the ground that they are difficult to see behind vehicles.

Please let me know if you will follow through on my suggestion before the meeting this Wednesday.

Best regards, Tom Liskay, 457 Tresham Rd
