Gahanna, OH 43032

Re: Proposal for Engineering Services
North High Street

Dear Mr. Wetherholt:

Per your request, we are pleased to submit our proposal to provide professional engineering services for the design and preparation of construction plans and specifications for improvements to North High Street from Granville Avenue to Carpenter Road.

The project consists of milling and resurfacing High Street; installing a new waterline with new fire hydrants; repairing, adjusting, or relocating storm water inlets, rebuilding curbs and sidewalks where required, and installing ADA approved ramps at each of the intersections.

Plans, specifications, and construction documents will be prepared using Ohio Department of Transportation and the City of Gahanna specifications, standards, policies, and procedures.

Preliminary and final plans along with a final cost estimate will be submitted to the City for review.

Upon approval of the final plans, copies of the plans, specifications, and contract documents will be reproduced for distribution to contractors for bidding. We will attend the bid opening and provide a recommendation as to the lowest and best bid received.

The design and preparation of the construction plans and specifications will be completed within 7 months after authorization to proceed. The engineering fee for the services described herein will be a lump sum of \$62,608. Invoices will be prepared monthly based upon our estimated percentage of completion.

We appreciate the opportunity to submit this proposal and look forward to working with the City on this project.

Sincerely,

STILSON CONSULTING GROUP, LLC

William E. Stilson, P.E.
President
