CREEKSIDE PROJECT --- SURVEYING SERVICES

The following is in response to our telephone conversation this morning regarding the letter of August 21, 2000, from Walter Heard of Urban Spaces, requesting additional survey information. As we discussed I think the property line and Mill Street R-O-W surveys should probably wait until Council has given a green light to acquisition of the subject properties. I believe that at this point having PSI prepare the mapping would be the most beneficial item for all of the parties involved in the project. Since the mapping will be in SPC's we could prepare layers to supplement it, which would contain the property and R-O-W lines imported from the Franklin County Auditor's mapping. This would not generate survey grade locations, but should be sufficient for planning and/or engineering purposes. To that we could also add the flood data x-sections, which also provide a rough location of the dam (walk) on the north end of the island. The following are the estimated fees for the foregoing services.

١. Contract w/PSI to prepare mapping from Spring 2000 flight: \$5500

2. Import P/L's, R-O-W's, X-Sections & dam location into mapping: 2500

TOTAL:

\$8,000

Should you have any questions or comments, please feel free to contact me. Thanks Karl.
