EVANS, MECHWART, HAMBLETON & TILTON, INC.  
CONSULTING ENGINEERS & SURVEYORS

October 10, 2000

Mr. Tom Komlanc  
City of Gahanna, Engineering  
200 South Hamilton Rd.  
Gahanna, OH 43230

Dear Tom:

In response to your inquiry, EMH&T proposes the following scope of services. For the City's existing set of 2,250 Storm and Water scanned images, we propose to create web files in DWF format from AutoCAD software.

Each file will also have vector address information from the Franklin County Auditor's information exported in the DWF file. This work will include the following steps:

1. Match scan to vector base information
2. Align selected features to horizontal
3. Export selected features

Our experience with your set of Sanitary drawings has demonstrated that each sheet costs roughly \$9.50 to convert. Therefore, EMH&T proposes to provide those services for a fee not to exceed Twenty-One Thousand Three Hundred Seventy-Five Dollars (\$21,375.00). EMH&T is prepared to start this work upon your approval. We estimate delivery to be within two months from approval.

Respectfully submitted,  
EVANS, MECHWART, HAMBLETON & TILTON, INC.

A handwritten signature in black ink, appearing to read 'D. Mair', is written over the printed name of the signatory.

Derek M. Mair, Associate  
Director, GIS/IT Services
