

Franklin Soil and Water Conservation District

Creating Conservation Solutions for Over 60 Years

2014 Intergovernmental Working Agreement with Gahanna

This working agreement is entered into on January 1, 2014 and becomes effective on the date of the last signature. The grant agreement expires on December 31, 2014. The agreement is subject to the limitations of authorities, resources and policies of the Franklin Soil and Water Conservation District (SWCD) and the City of Gahanna.

The purpose of this agreement is to provide environmental education and public participation on topics related to storm water pollution including water quality, soils and soil erosion in relation to Ohio State Science Standards, and to provide assistance to the City on illicit discharge detection and elimination, construction site storm water runoff control and management and post construction management.

For ease of understanding, this agreement is arranged according to the order of the Six Minimum Controls for the National Pollutant Discharge Elimination System (NPDES) Phase II for Storm Water as defined with the Ohio Revised Code 3745-39-04 (B)(1) through (6).

Franklin SWCD will provide the following services for the City of Gahanna:

Assist in compiling the Small MS4 Permit Annual Report in the format required by the Ohio Environmental Protection Agency with reporting and guidance from Gahanna staff. A meeting to review the City's comments is included within this task. The final report will be provided to Gahanna for the Ohio EPA. This task does not include the annual fee associated with the permit.

Minimum Control Measure

No. 1 & 2: Public Education / Outreach/ Participation and Involvement

Participate in a community event (either Creekside or Second Saturday) by staffing, providing literature, exhibits and other relevant materials and keeping informational booths stocked with such materials.

Provide targeted programming to 400 students through:

- 1) Outreach to teachers in the grades that correspond with the appropriate state curriculum standards to inform them of available resources. Assistance will include classroom programming and teacher workshops.

EXHIBIT A

- 2) Classroom activities and presentations upon teacher request. Various programs and hands on displays are available to teachers and are adaptable to meet specific needs.
- 3) A poster contest for participation from grades K-12.

Provide fact sheets and information through our website that the City of Gahanna and general public can utilize and

Provide at least 2 updates on available outreach and involvement resources and draft 2 articles to go into the newsletter.

Provide a combined rain barrel and rain garden workshop for residents in the City of Gahanna for the purposes of public education and public involvement. Rain barrels will be provided for an estimated 75 residents if they attend an educational workshop or complete an online presentation and quiz. Gahanna residents, who wish to install a rain garden, can receive cost share of up to \$250 per resident for a maximum of 3 residents to install a rain garden on their property. Cost share dollars are covered by previous grant agreements.

Provide guidance and education to approximately 3 property owners with significant natural resource, soil erosion, or drainage concerns; as well as rain garden assistance. Franklin Soil and Water may perform on-site inventory and evaluation of soils, drainage, erosion and sedimentation, stream bank erosion, and soil stabilization for residents within the City limits. Franklin Soil and Water will give an account of resident requests and site visit results to Gahanna.

Minimum Control Measure No. 5: Post Construction

Perform 5 site inspections for post construction facilities upon completion for the City acceptance of the site and 1 year post completion to ensure the Best Management Practices are still functioning as intended and the natural resources continue to be protected.

Assist the city in ensuring post construction BMPs are meeting the requirements of the Ohio EPA's general Construction permit and are being maintained and working correctly per the required post construction operation and maintenance plan.

Franklin Soil and Water Conservation District will give a full account of programming type and numbers once a year and upon request.

Franklin Soil and Water Conservation District will recognize City of Gahanna as a partner and supporter on programming and communication materials.

Minimum Control Measure No. 6: Good Housekeeping

Provide or organize NPDES related training for city staff members that meets a need identified by the City.

Gahanna will provide the following:

Gahanna shall provide the SWCD with a copy of the storm water management policies adopted by Gahanna for the SWCD's use in plan review and comment.

Gahanna shall provide the SWCD with a copy of the Notice of Intent application submitted to the Ohio Environmental Protection Agency (OEPA) as part of the NPDES Phase II storm water program, for their records and planning process.

Gahanna shall participate in the SWCD's annual planning process.

Compensation

The City of Gahanna shall compensate the SWCD in the form of a grant in the amount of \$8,015. Franklin SWCD reserves the rights to expend funds as needed to meet grant agreement and overhead costs. Franklin SWCD will not enter into any grant agreement that does not meet our current mission and goals.

In the event that assistance exceeds or is less than the estimated numbers for programs provided, landowners assisted, or trainings offered, the next years grant will be adjusted accordingly to compensate for previous year's overages or underage. If both parties agree that amount of assistance provided is on target or close to target, the next years grant will be calculated solely on anticipated assistance needed.

It is Mutually Agreed:

That the SWCD is a conservation technical and education service agency and therefore is not granted regulatory authority in the Ohio Revised Code

That the working relationship will be defined to include lines of communications with appropriate departments.

That the City and the SWCD will meet when necessary to review and coordinate activities and programs with the aim of developing a multi-discipline approach to resource management.

That the standards and specifications developed by Gahanna shall take precedence in planning and application of conservation measures. Where the Gahanna's policies are moot, the Natural Resources Conservation Service and ODNR Rainwater and Land Development handbook will be used in planning and application of conservation measures.

That all parties will review quality of service and address concerns as they arise and at least every six months.

That credit will be given jointly to the SWCD and the City in natural resource/ NPDES Phase II related publications prior to publication.

That this working agreement may be amended or terminated at any time by mutual consent of both parties, or the agreement may be terminated by either party giving sixty (60) days notice in writing to the other.
