Re: Endocrinology Rental for Diabetes Fun Fair  
Members of the Parks & Recreation Board-

The Department of Endocrinology at Nationwide Children’s Hospital provides care for a wide range of endocrine conditions, including diabetes. For this vulnerable patient population, ongoing education is essential for both families and children. One of the ways we support this need is through our annual Diabetes Fun Fair, which is designed to expand educational opportunities in an engaging and accessible way.

We would like to host the Diabetes Fun Fair at the Hannah Park Shelter on Saturday, October 24, 2026, from 8:00 a.m. to 2:00 p.m. This annual event is open to Nationwide Children’s Hospital patients, families, friends, and staff. Its purpose is to increase awareness of the services available to children with diabetes and to provide families with valuable education on how to best support their child’s health.

The event will feature multiple interactive booths representing various services, including therapeutic recreation, diabetes technology, healthy eating, insurance resources, the inpatient diabetes team, and more. In addition, we will offer a variety of fun and engaging activities such as games, crafts, and nutrition demonstrations.

We appreciate the opportunity to hold this event at the Hannah Park Shelter in Gahanna and look forward to continued partnership and collaboration

Sincerely,

*Maria M. Moauro*
